

TO STRENGTHEN THE LUNGS,  
SIR JAMES GRANT TELLS HOW TO  
AVOID TUBERCULOSIS.

Exercises Which Will Be Found Beneficial  
and Are to Be Recommended - Singing  
and Recting in the Open Air Good for  
the Lungs.

Sir James Grant, K. C. M. G., president  
of the Canadian Association for the  
Prevention of Tuberculosis, furnishes the  
following article, containing a series lately  
begun.

Young girls and boys, and especially  
those who are predisposed to consumption,  
often acquire a habit of stooping. To  
overcome this the following exercise is to  
be recommended. This child makes his  
best effort to stand straight, places his  
hands on his hips with the thumbs in  
front, and then bends slowly backward  
as far as he can during the act of in-  
haling. He remains in this position for a  
few seconds, while holding the breath,  
and then rises again somewhat more rap-  
idly, during the act exhaling.

WHAT DOES THIS  
MEAN FOR IRELAND?

Earl Cadogan's Enigmatical Speech  
on Abandonment of King's Visit.

Dublin, March 14-In an address de-  
livered at a public meeting here, Earl  
Cadogan, Lord Lieutenant of Ireland,  
made a rather enigmatical reference to  
King Edward's abandoned visit to Ire-  
land.

SENSATIONAL  
NEWS FROM ROME.

Tells of Fenians Organizing Uprising  
in Ireland-Clergy to Hold Aloof.

London, March 18-The Vatican has re-  
ceived confidential news, says the Rome  
correspondent of the Daily Chronicle, of  
a serious situation in Ireland. The Fenians  
have for some months been engaged in an  
active propaganda with a view to organiz-  
ing a general rising. It is believed the  
vatican will instruct the Irish clergy to  
hold aloof from revolutionary agitation.

British Steamer Affre, and Another Ashore  
Close the Waterway.

Suez, March 16-The canal is at present  
blocked by the British petroleum steamer  
Affre, from Marseilles, Feb. 24, for  
Bulsoes, from Constantinople, Feb. 24, for

latter is ashore and abandoned.

LORD BERESFORD MAKES  
SENSATIONAL SPEECH.

Lack of Administrative Efficiency in  
British Organization for Defence.

London, March 14-In an address today  
before the London Chamber of Commerce  
on the lack of administrative efficiency in  
the British organization for defence, Rear  
Admiral Lord Charles Beresford, said  
that initial naval reverses similar to the  
military reverses experienced in South  
Africa would entail a disaster which would  
be eternal in their effect. It was lack of  
organization which led to the rout and not  
other causes. His plan for insuring naval  
efficiency included the addition to the  
board of admiralty of a naval war  
lord of the admiralty, who would be re-  
sponsible for placing before parliament the  
full requirements of the navy.

LOOKED TOO MUCH  
LIKE SCALPING.

Threat of Haircut Brings Eight  
Cherokee Indians to Terms.

Muskogee, I. T., March 16-Rather than  
submit to a hair cut, eight full-blooded  
Cherokee Indians, arrested yesterday  
changed with being in contempt of the  
federal court, were today enrolled before  
the Dawgs commission. These Indians are  
members of the Ketsowah Society, com-  
posed of an element in the Cherokee na-  
tion opposed to enrollment. Last month  
Judge Raymond, of the United States  
Territorial Court, ordered them to present  
themselves for enrollment under pain of  
contempt. They disobeyed the order and  
were arrested and placed in the federal  
jail here. Last night the government offi-  
cials pleaded with them to submit, but they  
declined stoutly. Red Bird, their  
leader, made an impassioned speech in de-  
fense of their action. Argument being of  
no avail, an order was issued today that  
each prisoner should have his hair cut.  
They were lined up to take their turn in  
the barber's chair. When the first Indian  
had lost his shock of hair, the others  
broke down and signified their willingness  
to enroll. With sullen faces they signed  
their names to the enrollment and were  
released.

INFIDELITY AND JEALOUSY.

Wife Informed on Husband Who Sold Rus-  
sian's Secrets to Germany.

Vienna, March 16-About 60 arrests have  
been made in connection with the con-  
demnation to death by a court martial at  
Warsaw of a Russian colonel by the name  
of Grimm, for the systematic revelation of  
military secrets to a foreign power. Among  
the persons apprehended are a number of  
Russian officers of high rank. Colonel  
Grimm has not yet been executed.

INDIA'S POPULATION.

Revised Census Returns Show More Than  
Two Hundred and Ninety-four Millions.

Calcutta, March 14-The final revision  
of census returns show that the popula-  
tion of India is 294,266,701, or 95,975 more  
than the first totals, published last March.  
The error is thus remarkably low, com-  
pared with the census returns of 1891,  
which showed a difference of nearly 1,500,  
000 between the original and the final  
totals. The population of the provinces  
figures exactly 12 months after the first  
enumeration is a remarkable piece of work  
by H. H. Risley, C. I. E., the census com-  
missioner, and the officers engaged with him.

Fall River Manufacturers Raise Wages 10  
Per Cent. Today.

Fall River, Mass., March 15-At a  
meeting of the Fall River Manufacturers'  
Association this afternoon a vote was  
taken to increase wages in all Fall River mills  
10 per cent. next Monday morning. The  
meeting was attended by all those who  
had signed the agreement not to advance  
wages more than six per cent. and was  
one of the most downcast appearing aff-  
airs possible to imagine. None of the  
manufacturers was in favor of increasing  
wages beyond the amount named in their  
answer to the operatives.

TWELVE HORSES BURNED.

Narrowly Escape.

Concord, N. H., March 16-The well-  
known stallion J. R. Sled, sire of Wood-  
stock, (2:10) was burned to death,  
together with 11 other horses, in a fire  
which destroyed the livery stable of John  
Chadwick, on East Canal street, Penn-  
cook, early this morning. A fire which  
ignited in the stable of a young man  
filled by Much Ado was one of the victims.  
The total loss is about \$3,000; insurance,  
\$2,000. The fire caught from a stove in  
the stable office and two men sleeping  
there barely escaped with their lives.

OBITUARY.

Benjamin Hayes.

Hibernia, March 13-The body of Ben-  
jamin Hayes, an old and respected resi-  
dent of Hibernia, Queens county, whose  
death occurred very unexpectedly at his  
home on the night of the 9th inst., was  
interred on Tuesday afternoon. The  
burial took place at that place. Re-  
turning on Sunday morning apparently as  
well as usual, Mr. Hayes was found in  
the morning dead in bed, having passed  
away during the night. Deceased, whose  
scholarly attainments and kindly man-  
ner won him the respect and esteem of  
all, had reached the ripe age of 81  
years and was still in the unimpaired  
possession of his faculties and a consid-  
erable degree of bodily vigor. Coming from  
Ireland to this country when a young man  
he taught school in Hibernia and vicinity,  
until a few years ago, when he retired.

long been a member. The funeral sermon

Greenwich, from the words: "There shall  
be no more sea."

Wm. A. Boole, Prominent Shipbuilder.

San Francisco lost one of its most prom-  
inent shipbuilders, when William A. Boole  
died a few days ago. Boole was the head  
of the firm of W. A. Boole & Son. He  
was a Nova Scotian, having been born in  
Shelburne more than twenty years ago.  
He studied shipbuilding in Boston and  
went to San Francisco fifty years ago,  
where he started a shipyard. From a  
small beginning he developed a very ex-  
tensive enterprise, employing three or  
four hundred men and building some ex-  
cellent ships. Boole's experience regard-  
ing the repair of all kinds of ships in the  
drydock led him to conceive the plan of  
a marine railway where vessels even of  
large size could be docked and repaired  
under the most convenient and economical  
conditions. As a result his company now  
has in full operation a most completely  
equipped and modern shipbuilding plant,  
in conjunction with a remarkable marine  
railway capable of docking with the ut-  
most ease and in an almost incredible  
number of cases of time vessels of 3,000 tons-

IN ITS TRAIL FOLLOW  
HORRIBLE DREAMS, DESPONDENCY,  
MELANCHOLIA AND GENERAL  
WEAKNESS.

The proper elements needed to promote  
correct action of the bowels, and  
must be supplied when a bilious condition  
of the system is once established.  
It gives the stomach perfect rest, and allows  
you to partake of and enjoy the variety  
of food that is necessary for maintaining  
health. One Ferrozzone tablet taken after  
each meal will separate the nutritious  
portions of the food from the waste, which  
is carried off, thus preventing and curing  
constipation and its attendant evils, pie-  
being a potent blood purifier, Ferrozzone  
cleanses the crimson flood of all bile and  
impurities, and as a result the complexion  
is restored to a rosy, healthy hue, and the  
dark circles under the eyes and the deathly  
pallor of the cheeks, go away never to return.

Cotton Growing in West Africa.

Berlin, March 15-The negroes of the  
Tuskegee Normal and Industrial Insti-  
tute, who were engaged the latter part of  
1900 by the German government to teach  
the natives of Togoland, German West  
Africa, how to grow cotton, have succeed-  
ed, according to the report of the colonial  
committee, in producing cotton which is  
graded on the Bremen exchange about  
American middling. The Tuskegee negroes  
have demonstrated that the land in Togo-  
land is suitable for cotton, of which there  
is great abundance. The only obstacle to  
the commercial utilization of this product  
is transportation, and especially getting  
bales to the coast. The colonial commit-  
tee has sent an expedition of engineers  
to survey for a railroad from the coast  
town of Lome to Palime, in the interior.

American Coal in Germany.

Berlin, March 15-Herr August Schulze,  
who imported several thousand tons of  
Pennsylvania anthracite coal, and who  
placed orders for this product contingent  
upon the findings of the commission, says  
the result has been unsatisfactory, not  
owing to the quality of the coal, but be-  
cause the German householders do not  
know how to burn it, their stoves not  
having sufficient draught for such hard  
coal.
