GOLD 7-30 LOAN. A profitable and secure Investment

THE Northern Pacific Railroad Companyoffer to the public an investment security which combines the ready negotiability, the convenience, and the high credit of a first-class Rail road Bond, with the solidity and safety of a Real Estate Mortgage on Land worth at least

twice the amount loaned.

Traffic. As officially reported, the gross sarp ings of the present Pacific Railroad (Union and Central) for 1871, the second year of throug business, (December earnings estimated) reach Seventeen Millions and a Quarter. Of this, 65 per cent. is from Local business, and, it is stated, fully 55 per cent., or nearly Nine and a Half Millions, are net over operating expenses.

An equal traffic on the Northern Pacific Road will pay a dividend of more than 9½ per cent. on its total cost. With its great and unquestioned advantages in distance, grades, climate and tributary fertile country, the Northern Pacific is assured of a vast and profitable business from the outset, with a large increase for the future.

The Value of Land Grants. The average price at which the twenty-six leading Land-grant Railroads have thus far sold their lands, is \$7.04

per acre—the highest average of any grant being \$13.98, and the lowest \$3.07. With few exceptions, the average selling price has steadtly increased from year to year. The lands of the Northern Pacific Road are admitted, by all who have seen them, to be better and more salable than those of most other grants, but, sold at the general average of \$7.04 per acre, they will yield more than \$161,000 per mile of road—more than three times the possible cost of construction and equipment; or, at the lowest average of any grant (\$3.07), they will produce more than \$70, grant (\$5.01), they will produce more than \$10,000 per mile. These facts regarding Pacific Railroad earnings, and the market value of Railroad Lands, as shown by actual sales to settlers, show the three-fold security of North-

DAGE RECTURES under construction on the Pacific coast. Including purchased lines, the Northern Pacific Company now has under its management 575 miles of finished track. Contracts are let for the

miles of finished track. Contracts are let for the construction of 635 miles more, to be finished before the close of 1872.

The 7-30 Gold Bonds. The first mortgage bonds of this company, which, after full investigation, we strongly recommend as a reliable and unusually profitable investment, and which nove stand among the solid and favorite securities of the country, have the following leading features;

1, They are exempt from United States tax:

the Principal and Interest are payable in gold the Principal and Interest are payable in gold— the principal in 30 years, and the interest semiannually at the rate of 73-10 per cent. per annum, Denominations, from \$100 to \$.0,000. Present selling price—par and accrued interest in United States currency at pres nt rate of gold (109) these bonds yield 8 per cent gold
