

Put New System Into Your Old Cabinets

BY combining the best features of the Alphabetical and Numerical Letter Filing Systems, we have devised a new System which we call The Direct Name System of Vertical Filing.

The important features of this System are that you **FIND** your correspondence **ALPHABETICALLY** and **FILE** it **NUMERICALLY**.

If with your present filing system you cannot find any filed letter within 10 seconds, you should investigate at once this new Direct Name System. With it you can find any filed letter in 10 seconds and return it to the file in 5 seconds. There is also another feature which prevents mis-filing.

We want you to know more about the Direct Name System of Vertical Filing, and for this purpose we have printed a handsome folder giving detailed illustrations of the System. It will be to your interest to send for a copy at once.

FURNACES

STAND FOR
QUALITY
& SATISFACTION

A Winter Warmth in the home like the breath of a day in June, compared to the July like dryness and intensity of the furnace heat with which you are familiar. It's all in the big **CIRCLE WATERPAN** with its adequate provision for humidifying the heated air, and a furnace construction absolutely gas and dust tight.

Williams' Talc Powder

Deliciously soft, fine, antiseptic and absorbent. Whether used in the nursery or for the toilet or after shaving, Williams' Talc Powder has the same degree of perfection that has distinguished Williams' Shaving Soaps for generations.

Note the Patented Hinged-cover Box
Four odors, Violet, Carnation, Rose—fragrant as the flowers themselves—and Karsi, a rich Oriental perfume.

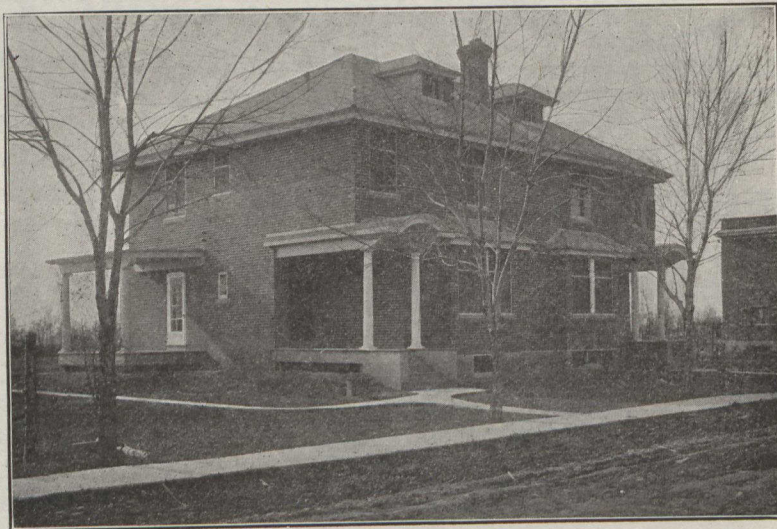

How to get a Dainty Silver-plated Vanity Box

Simply buy a box of Williams' Talc Powder, any odor; send us the name of the dealer from whom you bought it, the date of purchase and ten 2c stamps (20 cents), and we will send the Vanity Box to you at once. This is an article of real value—one that you would willingly pay a dollar or more for at a jeweler's, at least a good many women have told us so.

It has a Hinged-cover, Concentrating Mirror, and a French Powder Puff. The little mirror, alone, makes the Vanity Box indispensable to every woman.

Address **THE J. B. WILLIAMS CO.**
260 Maple Ave., Glastonbury, Conn., U. S. A.
Makers of Williams' Famous Shaving Soaps, Etc.

The Fire Next Door

How many things have you in your home which could never be replaced should they be burned up—articles of no intrinsic value, perhaps, but which are priceless to you because of associations? Think.

"Bestoslate"

Asbestos Shingles will protect your home from the embers and heat of a neighboring fire. And not only that. If the fire was IN your house, in the garret, for instance, these shingles would hold it INSIDE, and it would burn much more slowly than if it was allowed to burn through into the air, where it would be fanned to greater activity. You would have a chance to extinguish it before it made great headway, and to save those articles which you value so highly and which no fire insurance policy could replace.

Booklet—C—gladly sent to you upon request.
