RE: ONTARIO HYDRO BUILDING

Honorable Sir:-

As a point of information when considering the Tenders relative to the Cut Stone work in the above mentioned operation may we call to your attention the following facts:-

Indiana Limestone is brought into Canada in ROUGH blocks; all fabricating and labor is done in Canada by Canadian workmen, in addition to which the Canadian Government collects duty on same and the Railroads freight.

Some of our finest and most prominent buildings in Canada as you are probably aware are constructed of Indiana Limestone, the reason for which was only done after careful investigation and selected because of its beauty and durability and its low cost of fabrication, but mainly on account of the merits of the material itself which statement can be confirmed by any of your most prominent Architects and Engineers.

Further information will gladly be furnished you upon request, but from a point of saving to the people of Ontario as well as securing the best building material obtainable, this you can be assured of.

Hoping to be given favorable consideration, we are

Yours very respectfully

INDIANA LIMESTONE CO. OF CAN. LTD.

W. J. Kelly
Vice President.
