has it, it is absolutely true of mine. Editor Hutchinson says: 'All of this illustrates the great difference there is in stock.' Mr. Hutchinson should have used the word race in lieu of stock; but that would not be riding his hobby. Swarming! The bees have shown no more inclination to swarm than have the Italians, though they have stored a surplus of fifty pounds or more to each colony over that of the others."

"Some of these fair daughters of "Eetalv" will luxuriate the coming winter on Carniolan white-capped honey."

"Large hives! Yes, these black bees must have large hives; and perhaps two eight-frame bodies are not too large, though I believe the Draper barn to be about right. They must have a cool situation. On the 4th of May last, we had a gentle rain throughout the entire day; the Carniolans were out at work the whole day, with not a yellow bee in sight. There was not a day last winter but these bees were at work, and consumed none of the honey stored previously."

"We often read of the great loss of bees in the cold States, some losing all their bees. If they would stock up with Carniolans, such fatal results would never occur."

"Gentleness! The Italians with me are extremely gentle; while the Carniolans are also gentle, they are not so quiet and more inclined to fly from the combs and sting."
