

MARITIME MARKETS

Halifax, Feb. 22nd, 1904.

The chief features of the local markets is the advance in all classes of breadstuffs. In the last two weeks flour has advanced 75 cents, and stocks here are reduced to less than 4,000 barrels, with no prospect of getting any forward from the Ontario mills for several weeks owing to the freight blockade. Rolled oats and oatmeal have advanced to about five dollars, or fully a dollar more than January quotations. Cornmeal has advanced to three dollars flat.

The oat market is advancing and we now quote 45 cents for Ontario's, which is five to six cents a bushel higher than in December. Feeds are higher also, owing to the difficulty of moving freight.

Dairy produce is unchanged and dull, cheese especially having slow sale. Fresh dairy butter is scarcer. One consignment shipped from Ontario, January 29th, has not yet reached the purchaser here. There is a slight improvement in receipts of eggs, but the weather has been adverse to production. Dealers are paying 33 cents f.o.b. at country points for fresh gathered, and are jobbing them out at 35 to 37 cents. Hay is steady. There is no movement in Nova Scotian, but dealers here were fortunate in getting in fair supplies from Quebec before the railways became tied up.

Pork is a little scarce as no supplies have come forward from Prince Edward Island owing to the freezing in of the winter steamboats. Some small provincial pigs sold at seven cents this week. They are not actually scarce but if navigation should be closed for a few weeks longer they would be fully cleaned up.

Prices for apples are nominally the same, but there are scarcely any apples coming into the local market. Potatoes are selling at 45 to 48 cents per bushel and all other vegetables are very scarce. Any person having carrots, beets or parsnips could get a big price now.

BOOKS AND BULLETINS

AGRICULTURE FOR BEGINNERS.—By Professors Burkett, Stevens and Hill, of the North Carolina College of Agriculture. Ginn & Company, publishers, Boston, U.S.A. This book is well illustrated and specially adapted for those who are desiring an elementary training in agriculture. Though containing a lot of matter more applicable to American conditions, there is much useful information in it for Canadians. Price 7s cents.

TRADE AND COMMERCE.—
Weekly report, Feb. 8th, 1904. Department of Trade and Commerce, Ottawa.

PEACH GROWING.—Bulletin No. 70. Agricultural Experiment Station, Arkansas.

THE COW PEA.—Bulletin No. 80. Agricultural Experiment Station, Arkansas.

THE DAIRY HERD.—Farmers' Bulletin No. 55. U. S. Department of Agriculture, Washington, D.C.

Patent Report

Below will be found a list of patents recently granted by the Canadian Government, through the agency of Messrs. Marion & Marion, Patent Attorneys, Montreal, Canada, and Washington, D. C.

Information regarding any of the patents cited will be supplied free of charge by applying to the above-named firm.

No. 84,511—Denia Charron Vercheres, Que. Medical composition for cow fly.
No. 84,800—Fred Cords, Elmwood, Ont. Gate.

No. 84,824—Robert Burnside, Montreal, Que. Vibration Box Cup.

No. 84,991—Arthur Beauvais, La-
prairie, Que. Plow.

No. 85,005—Hughes Sauve, St. Timothee, Que. Potato digger.

also the musical and one of our record—Hiawatha. Dixie Girl, Annie Laurie, Carry me back to Old Virginia, My Old Kentucky Home, Old Oaken Bucket, Sail in our Dixie, The Holy City, He Me Sweet Home, etc., etc. Understand this it is not a toy or a machine that must be turned by hand, but a real self playing Graphophone, with which you can give concerts in any size hall or room, as it sings, talks and plays. Just as loud and clear as any \$10.00 Talking Machine. Write for seeds to-day sure.

Bruce's Giant Feeding

THESE GROUND FEEDING BEETS, introduced by us last season, have found great favor with all who have grown them. They combine the fine rich quality of the *Golden Wonder* with the hardiness and heavy-cropping qualities of the mangel. The roots are clean and tops small, white, flesh, solid, tender and sweet. They are also very hardy, and their length growing out of the ground, they are easily harvested. They will easily outyield all the other varieties of the mangel, and are the best of the heaviest-yielding mangels of the intermediate type. The past season some fine roots, weighing as much as 100 lbs., were secured. We are now recommending this fine variety as the best for stock-feeding on the market at the present day. The roots are of all sizes, and the tops are small. The roots are of great richness and easy-harvesting quality makes them the best of the mangels for the farm. We now offer it in two colors, ROSE and WHITE.

1-4 lb., 10c.	1-2 lb., 17c.
1 lb., 30c.	4 lbs., \$1.00

Write for our beautifully-illustrated, up-to-date catalogue (88 pages), of "Everything valuable in Seeds." Free to all applicants.

JOHN A. BRUCE & CO.

ESTABLISHED 1890

HAMILTON, CAN.

to erect a superior building with our Corrugated Sheets.

They are made from galvanized sheets and do not require painting. They can also be applied without using sheeting boards, making a strong, rigid construction fire and lightning proof at small cost.

They will outlast two or three wooden shingle roofs.

Tell us about new buildings or old ones requiring roofing, sending rafter and ridge lengths for estimates and catalogue.
