A GROUP OF MEN WHO ARE DOING MUCH FOR THE DAIRY INDUSTRY

The men here illustrated are taking a foremost part in the development of the dairy industry in Canada. They are a few of the members of the Canadian Holstein-Friesian Breeders' Association who gathered in Toronto recently for their annual convention. These breeders, and the numerous other breeders of pure bred dairy cattle scattered over Canada, are doing a great and good work in the improving of the dairy cattle of the country, and to them Canadian dairymen owe much. For the names of some of these breeders see page eleven, this issue.
