BAKED CUDDEES CURED IN 24 HOURS BY DOUGLAS' EGYPTIAN LINIMENT

There is the opinion of Mr. Robert Harkness, a leading resident of Tanworth, Ont.:

"Having had wonderful success with Douglas' Egyptian Liniment on my stock, it is my duty to write you."

"Our cattle were troubled with caked udders, so bad in fact that we thought they would lose the use of them. We applied the liniment but twice, and in twenty-four hours we could milk without any trouble."

"When anything goes wrong in our pens or stables, this excellent liniment is always called for, and never fails to give instant relief."

"I hope this letter will catch the eye of those whose cattle are suffering from caked udders."

Besides quickly curing this trouble, Douglas' Egyptian Liniment has proved its worth in both human and animal diseases, such as rheumatism, sciatica, neuralgia, sprains, burns and inflammation. It has healed without blood poisoning or other complication, serious wounds, sores and bruises.

TENDERS.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for purchase of site and buildings, Peterborough, Ont." will be received at this office 4:00 p.m. on Thursday, May 15, 1913, for the purchase of site and buildings thereon situated on south east corner of George Street and have frontage on an approximate 6 feet on George St. and 114 feet on Peter St., Peterborough, Ont.

A party whose tender is accepted must pay the sum as follows—\$5,000 cash when offered is accepted and balance in equal instalments at intervals of 3 weeks each with interest of 5 p.c. annum.

Each tender must be accompanied by an accepted cheque for \$100 on a chartered bank, payable to the order of the Hon. John H. Wilson, Public Works, which will be forfeited if the person tendering fails to enter into an agreement as herein mentioned.

Tender purchasers will receive all necessary information on application to the undersigned.

The Department does not bind itself to the highest or any tender.

By order,
R. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa, May 6, 1913.

A Well-Equipped Farm Home

Elgin Co., Ont., has more to recommend it than its many herds of splendid pure-bred dairy cattle. In that county are some splendid farm homes which might well serve as models to farmers who are thinking of building a new home or of remodeling the old one. One of these model homes is that of L. H. Lippitt, a well-known Holstein breeder. One of the editors

A Much Appreciated Convenience

Herewith we have a hidden view in the home of L. H. Lippitt. Natural gas is used for cooking, lighting and heating.

of Farm and Dairy who visited Mr. Lippitt to inspect his fine herd of Holsteins was so attracted by the farm home that he stopped to take several photographs and got a few notes on the household conveniences that he noted there.

The Lippitts are peculiarly favored in that they are near the natural gas region. The home is lighted with natural gas, and Mrs. Lippitt cooks and heats water with gas that costs them only 25 cents a thousand feet.

This gas, by doing away with the use of coal, except in the furnace, does much to lighten the work of keeping the house clean, as well as of cooking.

A special arrangement in connection with the gas range takes the place of the ordinary coal stove for heating water in the large boiler seen in the illustration given herewith.

The running water supply flows in from the roof of the house into a 30 barrel tank located close to the eaves.

There is thus no expense for pumping the wash water and, being soft, the water is that much more desirable for cleansing purposes. At the time of our visit Mr. Lippitt had not yet installed a bathroom, but a small room had been set aside in the new house, and as the running water, hot and cold, is already on hand, the bath will not be long in coming.

Farmers who have to go missing over the whole downy portion of their house every time they have to look up papers or account books, and their wives who have to tidy up after them, would especially appreciate Mr. Lippitt's farm office located off the dining-room. There Mr. Lippitt has a proper case for his herd books and files for pedigrees, and so forth.

The cellar arrangement appealed to us particularly. The land directly behind the house falls away and consequently an outside door to the cellar is easily reached. Immediately inside the door is a small washroom, where the men on their way from the barn

or fields can stop to clean up, instead of carrying all of the dirt on their feet and clothes into the house itself. Adjoining is a laundry room equipped with set tubs, running water and other conveniences to make the weekly washing lighter. Special rooms too are set aside for fruit and vegetables.

Mr. and Mrs. Lippitt have not spared money or care to make their home attractive, comfortable and convenient. "These things don't return much money," remarked Mr. Lippitt, "but we call them a good investment just the same."

Vegetables as Medicine

Fruit and vegetables are not only wholesome, but absolutely essential to man, says a writer in the New Zealand Dairyman. A half-century ago, no one, broadly speaking, knew of just what elements our bodies and foods were composed, nor could explain how the different nutritive ingredients of foods served their purposes in nutrition. Yet intuition, gleaned from experience, taught those wise women—our grandmothers—how to glean from the garden, the woodland, the meadows and orchards the seasonable foods and medicaments that enabled them to "slam the door on the doctor's nose" for years at a time.

The onion they regarded as one of the most beneficial of all vegetables fitted to cope with nearly all the ills that flesh is heir to. They deemed it as a great beautifier, clearing the skin, stimulating the liver, brightening the eyes, and ultimately clearing the breath. For colds, croup, and influenza, for diphtheria and pneumonia, for scarlet fever, and for other diseases, the onion stood and stands unexcelled with this further point in its favor that the onion treatment leaves

no mark on the face. The onion is also a great beautifier, clearing the skin, stimulating the liver, brightening the eyes, and ultimately clearing the breath. For colds, croup, and influenza, for diphtheria and pneumonia, for scarlet fever, and for other diseases, the onion stood and stands unexcelled with this further point in its favor that the onion treatment leaves

Another Kitchen Scene

This corner wash bowl, supplied with both hot and cold water, is one of several conveniences in the home of L. H. Lippitt, Elgin Co., Ont. Running water in the home is no longer a "city" advantage.

none of the injurious after-effects of drugs.

In cases of anemia, cabbage, cauliflower, and spinach have proved distinctly beneficial, and the more modern tomato stimulates the healthy action of the liver. Asparagus is beneficial in kidney troubles. Celery is useful in cases of rheumatism and neuralgia, and the carrot forms blood, and adds to the velvety smoothness of the skin.

Bar Roofing

"Eastlake" Metallic Shingles

Don't Forget when you want a good roofing to use "EASTLAKE" Metallic Shingles.

They protect you from Fire, Lightning and Leaks. Made of only the best zinc-coated steel sheets.

Your patent interlocking side joints make an absolutely watertight, rust-proof roofing.

"EASTLAKE" Metallic Shingles never need repairs.

Write us for booklet. 701
