Make Your Stock and Poultry Pay Better with

ROYAL PURPLE

STOCK AND POULTRY SPECIFICS

At a cost of less than a cent a day per head of stock, it will increase their value 25 per cent. Permanently cures Colic, Indigestion, Worms, Bots and Skin Diseases. Tones up run-down animals so that they quickly gain weight and vigor. Increases the yield of milk cows three to five pounds a day, besides enriching the quality of the milk.

ROYAL PURPLE is not a food. It is a conditioner—the best ever sold. If there was any better we would be making it. It enables your stock to eat the natural food they should eat and get the most benefit from it. Here is the advice of all thorough veterinary doctors—"Feed your stock on food of your own growing—last summer they with soft predigested muck so that after a time they cannot digest good, wholesome feed. Feed the good food grown on your own farm—hay, oats, bran, chow, etc. You know what these things cost you and what they will do.

ROYAL PURPLE is an aid to these natural foods and if you use it as directed, we can guarantee better results than if you feed any of the concoctions offered on the market as "prepared foods."

Try It On a Poor-Conditioned Animal

If there is a run-down, poorly nourished beast on your farm, see what ROYAL PURPLE SPECIFIC will do for it. A 50-cent package lasts a cow or horse 10 days. The cost is so trifling that no farmer in Canada has any excuse for leaving out-of-

health stock around his place. Try it on the poorest-conditioned animal you have and we know you'll be surprised at the result after a short treatment. Cattle and horses fed a month earlier than without it, which means you save a month's feed and a month's labor. You can bring six pigs to the pink of condition at the cost of \$1.50. Hens treated in the same way cost no more than \$1.00 each to put in prime state for market. ROYAL PURPLE SPECIFIC fattens and keeps well horses, mares, cows, calves, steers, hogs. Sold in packages, 50c, and air-tight tins, \$1.50.

Try ROYAL PURPLE POULTRY SPECIFIC on Your Hens

Do you know that ROYAL PURPLE POULTRY SPECIFIC makes hens lay in winter as well as in summer, and keeps them free from disease? It does, and helps them over the month, fattens and keeps them in vigorous health. A 50-cent package lasts 25 hens over 10 days. Shouldn't you try it? We have hundreds of recommendations from all parts of the country. If ROYAL PURPLE does not give you better results than anything you ever used, or give you satisfaction, we will refund your money. No matter what your opinion of other preparations, we want you to give ROYAL PURPLE POULTRY SPECIFIC a chance to show what it can do for your poultry—and a 50-cent package will show you some fine results. Sold in 50c and \$1.50 packages and \$1.50 air-tight tins.

WE ALSO SELL

Royal Purple Cough Specific for cough and distemper. (Will cure any ordinary cough in 5 days). 50c, by mail 60c.
Royal Purple Sweet Liniment for lameness, rheumatism, sprained tendons, etc. 50c, by mail 60c.
Royal Purple Worm Specific for animals; removes the worms, also their larvae. 25c, by mail 30c.
Royal Purple Disinfectant, in 25c, 50c and \$1.00 tins.

Royal Purple Lice Killer for poultry and animals. 25c and 50c, by mail 30c and 60c.

A Real Farm Drama

The modern slogan, Back to the Farm, is the title of a rural drama which is being presented in a number of Minnesota towns, under the auspices of the Agricultural Extension Division of the University of Minnesota, not only as a means of entertainment but to mold public opinion in favor of better agricultural methods. The play was written by a student of the School of Agriculture and the cast is made up of students of the School and College of Agriculture.

The play opens with a scene representing an old, run-down farm, the owner of which does not believe in education or modern farming methods. His son, Merton Merrill, having

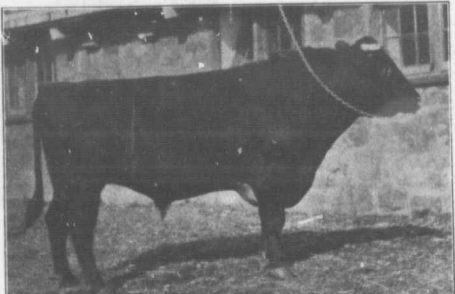

but who also adopts scientific methods and endeavors to teach them to Hulda, the hired girl.

Rations for Milk Cows

I have corn ensilage, millet, red clover hay, barley chop and bran. What proportions should I feed to cows giving 20 lbs. of milk a day? Also, should I have oil cake or cotton seed meal to make a balanced ration? I have been advised that there is great danger in feeding cotton seed meal, and was told to get oil cake. D. A. Peterson.

Judging by the fact that the cows are giving only 20 lbs. of milk a day, they are not fresh calvers or it is not desired to produce milk at a high cost. Hence, the selection of the materials making up the ration fed should depend very largely upon the supply of feeds on hand in order to keep the cost as low as possible. Supposing, however, that all feeds mentioned are on hand in unlimited quantities, I would suggest the following as about the most economical method of feeding the cows, being the ration for a day:

Corn Ensilage	45 lbs.
Millet	3 lbs.

An Ingenious Method for Exercising the Herd Bull

Extending between the stable and a stout post is a strong wire cable stretched tightly. The chain that may be seen attached to the ring in the animal's nose is attached in turn to a ring that lies loosely on the cable. A bull confined in this manner is perfectly safe and gets plenty of health-giving exercise.

had a high school education, is dissatisfied with the grind of farm work with no time for recreation, and when the pretty little school teacher refuses to marry him because the life of a farmer's wife is one of "dull drudgery" he decides to try some other line. A young lawyer advises him to go to an agricultural school and learn better methods of farming. His father objects to the plan and as a result of a quarrel between the two the elder Merrill orders his son to leave and "never set foot on this place again."

AFTER THE BAIL

The second act shows a ball room scene at a fraternity house. Merton has completed his course in agriculture and has resumed a position with the Agricultural Extension Division. One of the guests is the young lawyer who advised Merton to go to school. He brings Merton news from home, telling him of his father's bad luck and poor health and Merton decides to use the money he has saved to pay the interest on the mortgage and save the old home. His mother appears and begs Merton to come home.

The last act shows the young farmer in his office. He has proved to his father and the neighbors that modern methods of agriculture pay and also convinces the school teacher that a farm home can be made the "happiest place in the world."

A fine vein of humor is introduced through the acting of the hired man, Gus, who is always ready to "quit"

Red Clover	5 lbs.
Oat Chaff in Ensilage	5 lbs.
Meal Mixture—	
Barley	100 lbs.
Bran	200 lbs.
Cotton Seed 50 lbs.	1 lb. meal for each 3 or 4 lbs. milk.
Or Oil Cake	
Meal	75 lbs.

The corn ensilage and chaff should be mixed together and fed in two equal portions, night and morning. The more palatable of the two kinds of hay should be fed in the morning; and the less palatable, with possibly a small amount of loose straw, fed the last thing at night after the ensilage and meal have been eaten up. The meal mixture, which, as indicated above, might include either oil cake or cotton seed meal, should be divided into two equal parts and scattered on the ensilage and straw at the time of feeding the latter. If school. He brings Merton news from home, telling him of his father's bad luck and poor health and Merton decides to use the money he has saved to pay the interest on the mortgage and save the old home. His mother appears and begs Merton to come home.

The last act shows the young farmer in his office. He has proved to his father and the neighbors that modern methods of agriculture pay and also convinces the school teacher that a farm home can be made the "happiest place in the world."
