## THE CHATHAM FANNING MILL

With New Bagging Attachment.

The above cut represents a new machine which is an attachment for bagging the grain as it comes from the Fanning Mill. It is complete in every respect, and will give the best of satisfaction to those who use it. A few points in its favor are these:— It turns very easy. Takes up only fourteen inches square extra space on the floor. Will bag any kind of grain from the finest seed, such as timothy and clover, up to the coarsest grain, such as beans or corn. Will bag from 60 to 80 bushels of wheat or 100 bushels of oats per hour. Your grain does not go to the floor, thereby saving considerable waste. Two men with the bagger will do the same work as three men without it. It can be attached to any Chatham Mill manufactured during the last four years. This machine is worthy the inspection of all farmers. One bag fills while the other is being tied and put aside.

## 2,300 SOLD IN 1887.

The Improvements for 1888 are as follows: To the large number of screens and riddles furnished last year I have added four zinc screens, making 17 in all, with the following objects in view, which I am sure are important: 1st. Fast and good cleaning of wheat. 2nd. Special attention has been given to rapid cleaning of barley, removing all foul seeds and broken weeds. 3rd. Have added a long mesh zinc screen for taking chaff, oats or rye from wheat, and also an attachment for knocking or agitating the screens and not allowing the meshes to fill up.

Send for Circular. For prices and full particulars apply to  
MANSON CAMPBELL, Chatham, Ont.
