

FLOUR

In Carload Lots

Why pay 50 to 75 cents a sack more for your Flour than you need to pay? If you and a few of your neighbors can club together and order a carload of flour and mill stuff (30,000 lbs. or more) from us we will agree to deliver it at your station, not at the "wholesale price," but at practically the bare cost of manufacturing.

In Less Carload Lots

If you cannot get enough orders at one time to make up a carload, write for our prices on small shipments. There are many parts in the West where we can deliver less carload shipments at prices which will save the consumer considerable money.

We can satisfy you on quality and price. We ask you, therefore, all things being equal, to PATRONIZE YOUR OWN COMPANY. Remember, it is only by retaining control of your grain till it is made into flour that you can realize its full value. This is what YOUR COMPANY is trying to do for you. All we ask is your patronage and support.
