SAVAGES HAD LANGUAGE ALL COULD KNOW

Indians in America Years Ago Knew a Universal Code.

"The problem of a universal language, the need of which has been realized in this war," says a Cambridge professor, "was really solved centuries ago by the savage inhabitants of the Western world."

Should an Indian from northern Alaska go to Patagonia, he could by means of this universal language converse with his southern brethren almost as easily as he could with his neighbors at home. That would also be the case if he visited Central America or met the tribesmen of Western prairies and mountains.

When this language was invented no one knows, but every Indian learns it in addition to his own. Recently two chiefs of different tribes met in the Geographical Society rooms in Washington and held a conversation that lasted nearly three hours, and yet neither one knew a word of the other's language.

Another sign for death is to hold the tips of the fingers of one hand against the palm of the other, and let them gradually slip downward, and at last drop beneath the palm. Most people think that the Indian word of greeting, "How," is merely the abbreviation of the question, "How are you?" But that is not so. The word is really "you," which means "brother" or "friend."

So when he comes up and greets you with his seemingly inquisitive "How," he is not asking after your health, but telling you that he is a friend.
