That Advantage Be Taken of Canadian Treaty Chances.

Canadiau Treaty Chances.

Washington, Jan. 31.—A called meeting of the American Newspaper Publishers' Association was held here yesterday, with a ylew to directing the attention of the American members of the joint high commission to the urgent need that a policy be adopted which shall protect American forests by securing in the treaty now in course of preparation between the United States and Canada arevocation of the present duty on print paper and pulp from Canada. Mr. C. W. Knapp was elected chairman, and William O. Bryani of The Brocklyn Times secretary of the meeting. After a brief and informal discussion, a statement of the views of the American Publishers' Association was adopted, ordered to be printed and presented to the members of the commission, and to Representatives and Senators in Congress.

80. 1899, respectfully submit to the President and to the American commissioners that the honest intentions which originally induced the establishment of the spirit duty on paper and pulp have been perverted to further the purposes of a recently formed corporation, the International Paper Company, and that every newspaper publication in the country sets of the Rocky Mountains has been as the water of that corporation. newspaper publication in the country seast of the Rocky Mountains has been placed at the mercy of that corporation. Within the last week we are advised that the International Paper Company has acquired 14 additional mills, representing the plants of three large concerns, and that it is negotiating for three other properties, which represent all of she outdoor the properties, which represent all of she outdoor to be seen to be seen that the transfer of the tr Ladies' Plain Cashmere Hose, sizes 81 to 10 inches, high spliced heels and double sol-s and toes; regular price 50c per pair; our special, three pairs for \$1.00.

"The International Paper Company is a combination of 24 mills (since expanded to 80), which has been capitalized at 855,000,000; it converse 80 per cent. of the news output. Its Frenchers frankly admits that the common stock of 830,000,000 represents only good will; the entire product of this large combination could be duplicated with modern and better be duplicated with modern and better machinery at less cost user sound upon a capitalization of \$15,000,000, so that print paper users in the United States are forced to bear the burden of an excessive capitalization of \$40,000,000, and to pay an added charge of \$3,000,000 and to pay an added charge of \$3,000,000 per annum. Every mill-owner who entered that combination invited a withdrawal of tariff duty. Excessive and improper prices were paid for many mills that were located on exhausted water courses, and that were tributary to denuded timber tracts; for mills that at periods of the year have an insufficient supply of

ber tracts; for mills that at perious of the year have an insufficient supply of water or are under water; for mills that are inferior and worthless in machinery, equipment and construction; for mills that do not own or control woodlands; for mills that have neither putp grinding

Additional Reasons.

Additional Reasons.

Additional Reasons.

Additional Reasons.

Additional Reasons.

The season of the mills in all the combination possessed all of the six essentials of the cheapest and most successful manufacturer, namely, cheap wood, cheap and ample water power, cheap rates to markets, modern machinery, wholesale production and concentration at one place under one supervision. In some cases the organizers of the International Paper Company gave securities to mill-owners representing five times the actual investment in the mills, and in gathering together this assortment of mills the paper company also acquired every available spruce tract where cheap timber could be had, and every large water-power, with one exception, where substantial competition might otherwise be established. This object was easily attained, because our spruce supply is being exhausted at the rate of 1,700 square miles per annum.

"That machinery of the Government which imposes a prohibitory duty on print paper, is also placing a premium upon the exhaustion of our spruce forests, and is adding to the destruction wrought by forest fires. No successful competition at the International Paper Company is possible in the United States under existing conditions. Capital that seeks to develop new enterprises for the manufacture of news paper is barred by the trust's acquirement of all the possible facilities of paper production. A tax on newspapers operates indirectly, as did the stamp tax of Europe, to suppress newspapers. It is a tax of \$3,000,000 per annum on intelligence, a tax on popular education and on political knowledge. "We, therefore, urge, that advantage be taken of the opportunity offered by the Canudian treaty agitation to place pulp and paper on the free list, and thereby give the only strong and permanent assurance of protection from the combination."

At 2.15 yesterday afternoon the publishers called on the President at the "Not one of the mills in all the con inch; spec value at 75c; on sale Friday and Saturday Your attention is called to our Black Dress Goods, and we ask you to come and look. Looking leads to buying.

Dim When Coin Is Wanted.

London, Jan. 31.—The popularity of the penny-in-the-slot meere for gas has resulted in an invention for the supply of electricity automatically on the slot principle. The new metre is the joins production of Mr. F. M. Long, the engineer of the Norwich Electricity Company, and Mr. E. B. Schattver, who until recently was also one of the company's servants. Pence will not operate this machine, however, which requires payment in silver, and the supply is in proportion to the value of the pre-payment. The metre does not extinguish the light suddenly, but causes it to dim gradually, intimating to the consumer the need of replenishing the metre with coin.

in Russia.

St. Petersburg, Jan. 81.—The distance between the Czar and the Holy Synod regarding Count Lee Tolstoi seems likely to grow into an open rupture. M. Pebedonoszoff, the Precurer General of the Synod, insists on summon ing Count Telstoi before the Synod for trial, which will involve his being deprived of his civil rights. The Synod is enraged on account of Count Tolstoi's open support. Doukhobors, whose religious tenses, it is claimed, will undermine the very foundations of the Greek Church.

On the other hand, the Crar, who is really a great admirer of Tolstoi, has been trying to convince the aged philosopher of the error of his ways. He is disposed to harken to the counsel of the numerous friends of Tolstoi, yes fears the power of the Synod.

Intimate friends of Count Telstoi assert that the peace-loving Count will leave Russia of his own accord, and that the sending of his son to Canada in charge of the first deputation of Doukhobors is but a way-payer for his own emigration to Canada. Count Tolstoi loves the Canadians and he believes that in Canada be will be allowed to practise unhindered the dictates of his faith.
