MRS. J. DEMERS.

Newcastle, May 17, '86.

ESTEY'S

Iron

—AND—

Quinine

Tonic

WILL CURE—Indigestion. Dyspepsia. Heartburn. Headache. Constipation. Loss of Appetite. Low Spirits. General Debility. Nervousness. Pains in Back.

And all impurities of the blood.

TRY IT.

'It Picked me Right Up.'

SHEDIAC, N. B., March 22, '86.

MR. E. M. ESTEY, Moncton, N. B.:

During the fall of '85 my system was completely run down. I had no appetite, and what little I did eat caused me great distress. I was so weak that I could hardly do my daily work. I saw Estey's Iron and Quinine Tonic highly recommended for cases similar to mine, which induced me to try it. After taking 1 bottle of it I felt much better, and now after I have used 3 or 4 bottles I feel as well as ever I did. It picked me right up, and I cannot recommend it too highly.

Yours truly,
HENRY GAY,
Fireman I. C. R.

Price 50c. per bottle. Six bottles $2.50. Sold by Druggists everywhere. Be sure you get the genuine; Estey's Iron and Quinine Tonic. Prepared only by E. M. Estey, Moncton, N. B.

Miscellaneous.

Scott's Emulsion of Pure Cod Liver Oil, with Hypophosphites,

As a Remedy for Pulmonary Affections and Scrofulous Diseases.

DR. IRA M. LANG—a prominent physician in New York says:—I am greatly pleased with your Emulsion. Have found it very serviceable in above diseases, and it is easily administered on account of its palatableness. j 30-4w.

A brilliant young man may make a sensation; but it is the steady-going average chap that wins in the long run, and stays there.—*New Orleans Picayune.*

Cramps and pains in the stomach or bowels, or in any part of the body, no matter how severe or what the cause, can be relieved by *Johnson's Anodyne Liniment* used internally and externally.

The luxury of strawberries and cream was not always known to the world. As an interesting fact of the season, it may be mentioned that in 1509 Cardinal Wolsey first combined strawberries with cream, in an exalted moment of supreme inspiration.

More than twenty years ago we had chills and fevers, and the recollections of it makes us shake even now. But this disease no longer terrifies us. *Parson's Purgative Pills* are a sure preventive.

Mrs. Burchard's parrot was sitting in the open window at Kankakee, Illinois, when a hawk swooped down on it. The two fell to the earth and a sharp fight followed, in which the hawk found he had his match. The parrot as he fought called for help, and Mrs. Burchard came to the rescue of her pet with a potato masher, and mashed the hawk. The parrot was none the worse for wear, and said at once, "Polly wants a cracker."

IT IS SIMPLY MARVELLOUS.

Mrs. Theron Burr, of Adrian, Michigan, writes that West's World's Wonder or Family Liniment cured her daughter of Rheumatism, which she had been afflicted with from childhood. It is infallible. Price 25 cents and 50 cents per bottle. Sold by Geo. C. Allen, Newcastle, Geo. E. Frost, Campbellton.— j 30-1m.

Young genius (who has had all the talk to himself, and, as usual, all about himself)—

"Well, good-by, Dear Mrs. Meltham; it always does me good to come and see you. I had such a headache when I came, and now I've quite lost it." Mrs. Meltham—"Oh, it's not lost! *I've* got it.

INVESTIGATION.—Every man should be willing and we should think be very anxious to investigate everything which is so likely to benefit all mankind as the discovery of Davis' Quinine Iron and Wine, because it is now being used with the most beneficial results for Dyspepsia, Indigestion, General Debility, &c. Price 50 cts. Prepared only by Geo. H. Davis, Fredericton. tf.

"Alonzo, dear, do you believe in ghosts?" she asked dreamily. "No, darling, I do not," he replied. "Well, Alonzo, that ghosts to show you are not superstitious." Then they fell into a sweet sleep.

Mrs. Urian Johnstone, River Herbert, writes:—"Minard's Liniment cured me of a very sore nose, and also inflammation in the eyes; it is the cure-all and I believe it is the best inflammation allayer and pain killer in the world. It sells every day.

AFRICAN BOX WOOD.—A new species of box-wood from South Africa, has just been described by Sir Joseph Hooker under the botanical name of *Boxus Macovani.* As it is in considerable quantities and is suitable for engravers' uses, it may prove a valuable addition to the diminishing supplies of European box-wood. When seasoned without cracking the wood is valued at two cents a cubic inch.

I sprained my leg so badly that I had to be driven home in a carriage. I immediately applied Minard's Liniment freely and in 48 hours could use my leg again as well as ever.—JOSHUA WYNAUGHT, Bridgewater, N. S.

A boring made by the Prussian Government at Schladebach in search of coal is said to be the deepest in the world. Its depth is 4560 feet, its breadth at the bottom two inches, and at the top eleven inches. The temperature at the bottom is 118 degrees.

For Coughs, Colds, Croup, Congestion, Irritation of the Throat and all diseases of the Throat and Lungs, *Baird's Balsam of Horehound* will give immediate relief as if my magic. Sold by all dealers. Price 25 cents.

A NEW COAL-BREAKER.—A safety cartridge of a novel kind has been introduced by Dr. Kosmann, of Breslau, for use in coal mines. A glass tube having two divisions, contains finely divided metallic zinc in one part and sulphuric acid in the other. The cartridge is introduced and the hole bored to receive it is firmly closed, when the tube is broken by means of an iron rod. The sulphuric acid is thus brought into contact with the zinc, and the rapid evolution of hydrogen gas which follows exerts a pressure on the sides of the hole estimated at 37,000 atmospheres and rends the rock.

If your child is suffering from worms, we would recommend you to give at once Dr. McLean's Vegetable Worm Syrup, it is not only a safe and effectual remedy, but an exceedingly pleasant one. j 21-2w.

"Are you going to make a flower-bed here?" said the Brooklyn girl to her father's gardener. "Yes, miss, them's the orders." "Why, it'll spoil our tennis grounds!" "Can't help it miss.—Your pa says he's bound to have this plot laid out for horticulture, not husbandry."

THE COMMON SENSE EYE WATER is the best remedy known for eyes made weak by overwork, or for inflamed and sore eyes. Sold at the drug stores—Try it.

MISTRESS: "Mary, I wish you would tell the cook when you go down that I do not approve of her having so much company staying late and making a noise." Mary: "Well, mum, it'll do no good.—Jane is going to leave to-day. She's decided to get marrried." Mistress, (to her husband, an eminent Judge): "Do you hear that? Why don't you prevent her deserting in this shameful manner?" Judge: "My dear, this case is out of my jurisdiction. I have no power to overrule the decision of the Court below this time."

Scientists inform us that we may expect a visit this summer from the terrible scourge, cholera. West's Pain King is the remedy to keep. Always ready for a sudden attack. Price only 25 cents. Sold by Geo. C. Allen, Newcastle, Geo. E. Frost, Campbellton, Druggists.

"Well, how did you like the sermon Sunday?" we heard one lady ask another on the court house pavement recently. "The sermon?" "Yes, you were at church, weren't you?" "Yes certainly." "Well, then, how did you like the sermon?" "I didn't hear any sermon; I belong to the choir," was the self-satisfied rejoinder. [Ex.

OTTAWA, July 5.—In granting the appeal of the fishermen in the Gulf of St. Lawrence, between Pointe des Monts and Blanc Sablon, the Government have decided to send immediately a Government cruiser to protect these fishermen from the depredations to which they have been subjected at the hands of Newfoundland outlaws who cross over in large numbers, and, in the absence of any Government vessel, do as they like, committing outrages that would put a Fiji islander to shame. Terror reigns supreme, and the inhabitants along that part of the coast of Labrador state that they will be forced to leave the country unless they and their families are protected from the outrages they have been subject to from the Newfoundland pirates during the present season.

ATTACKED BY A SWORDFISH.—*Gloucester, Mass.,* July 2nd.—The schooner *Volunteer,* of this port, had a remarkable experience a few days ago, according to the report of the schr. *Wideawake,* which arrived to-day. The wind was light and the vessel was near neither shoals nor rocks, when there was a shock and a terrible commotion alongside. Investigation showed the sword of a swordfish sticking through the planking, and on the outside a part of the head of the fish was found which had been twisted off in its endeavors to free itself. Shortly after the body of the fish was found. The *Volunteer* then put into port and sold the fish for $28—enough to repair the damage done.

We read in the Montreal papers that Messrs. Ogilvie & Co., a firm of flour dealers, are building a new mill on the Lachine Canal, Montreal, and that in excavating the site lately ground was opened up where the cholera victims of 1832 were buried. Many coffins were exposed and barrels of bones were picked up and buried everywhere. The majority of people are not very sensitive perhaps; yet we should think that they might prefer to have their flour come from some mill other than that erected on a cholera burying ground in which the coffins are yet perfect and the bones of the dead distinguishable.—*St. John Globe.*

THE STORM.—The late storm proved most disastrous to the lobster fishing alongtheNorth Shore of the Island.—Thousands of dollars worth of traps and other gear were destroyed, which will make it difficult to continue the business at many of the canneries any further this season. The tide was the highest known for a number of years, and considerable damage was done to fishing establishments all along the coast. We are sorry to hear this. The lobster industry is of immense value to the people of this Province, and the loss sustained by those engaged in it is to be regretted.

Farm and Household.

COUNTRY GIRLS—THE GIRLS FOR US.

Up in the morning early,
Just at the peep of day,
Straining the milk in the dairy,
Turning the cows away,
Sweeping the floor of the kitchen,
Making the beds up stairs,
Washing the breakfast dishes,
Dusting the parlor chairs.

Brushing the crumbs from the pantry,
Hunting for eggs at the barn,
Cleaning the turnips for dinner.
Spinning stocking yarn,
Spreading the whitened linen,
Down on the bushes below,
Ransacking every meadow
Where the red strawberries grow.

Starching the fixtures for Sunday,
Churning the snowy cream,
Rinsing the pail and strainer,
Down in the limpid stream,
Feeding the geese and turkeys,
Making the pumpkin pies,
Jogging the young one's cradle,
Driving away the flies.

Grace in every motion,
Music in every tune,
Beauty in form and feature,
Thousands may covet to own,
Cheeks that rival spring roses,
Teeth the whitest of pearl—
One of these country maids is worth
A score of your city-bred girls.

CURING HAY.

A frequent mistake in hay-making is to over-dry the hay. Not only is the hay better when housed or stacked as soon as possible after cutting as it will keep, but the risk of getting the crop damaged by rains is avoided. The views of farmers have changed very materially in later years in regard to the amount of drying necessary to insure the keeping of hay. Experience has shown that much less drying is necessary than was formerly supposed to be required, especially if the hay is put in a light barn. If it sweats and heats some, that need not cause alarm, for, to a limited extent, this is no harm.

Stock needs salt, and it is a matter that should be looked after. Many cases of colic in horses and hoven in cattle are caused by a deficiency of a supply of salt.

The small mess of milk furnished by one cow may be far richer than the larger quantity obtained from another cow. And it is the butter yield that is the best test of a cow's value.

Horses will go eight and probably ten hours without food if properly fed at evening and morning. They should have water more frequently, but never when hot.

The root crops for swine should consist of a variety; the farmer should grow not only beets and turnips for them, but parsnips and carrots also. The cheapest pork is that made by securing rapid growth on roots and grass.

A mixture of skimmed milk buckwheat bran, and cobmeal with good corn fodder should be very good feed for ordinary occasions, but in fattening an animal, an evenly balanced food is not wanted, but one rich in carbohydrates, and cornmeal bran and corn fodder would be the best.

HOUSEHOLD HINTS.

In washing bedsteads use strong brine or hot alum water.

Wash grained woods with cold tea, wipe dry and rub with linseed oil.

Beat carpets on the wrong side first, then on the right side. Spots may then be removed with ammonia and water or ox-gall.

When hard-finished walls have been calcimined the soiled coats should be washed or scraped off before a new one is put on.

When drain-pipes or other places get sour or impure they may be cleansed with lime water, carbolic acid or chloride of lime.

CROP PROSPECTS IN THE U. S.

ROCHESTER, N. Y., July 10.—From over 500 reports from special correspondents, the *American Rural Home* makes a summary of the crops of the country as follows:

Unprecedented heat accompanied by dry weather ever since the first of July is telling very severely upon meadows and pastures. Spring wheat, oats and grass crops, are all now more or less injured by the extremes of weather during the growing season. The winter wheat harvest is over with the exception of Michigan, where it is being rapidly finished. North of Ohio river the crop is secured generally in good condition. Stacking and threshing are progressing, and an early movement is looked for. The weather is very fine for securing crops. The yield is about the same as that of 1875, which was generally below the average. Oats are very irregular. In land early sown they are headed out and are turning good, but the late sown are indifferent in length and the stand is poor. In spring wheat the yield is variously estimated all the way from 25 to 40 per cent., according to locality. Corn is holding its own well, but it must have rain within the next 10 days to ensure a crop.

LITTLE WASTES.

Manure, the farmer's bank stock, in liquid form flows away to the stream and is lost. Old machinery, in which are many good bolts and screws, are allowed to rust out in the field. In an emergency, he drives an overworked horse to the nearest town or shop to duplicate an article that should have been preserved from the old one. He fails to keep his tools in perfect order, and in haying time, when the weather is threatening, a tire rolls off, a bolt is missing. And down comes the rain and up goes the temper. The missing shingle is never replaced, and a constant leak finds its way to the grain bin and then he growls because his wheat is docked for dampness. Odds and ends of lumber remain where the last job is finished, curling up and becoming worthless in the hot sun. Good tools often keep company with the perishing boards. The weaklings of his herds and flocks are allowed to remain with the strong until they droop away and die. This man tells a continued story of bad seasons, weather too hot or too cold, too wet or too dry, taxes too high. No intellectual shadow falls across his pessimistic path, and he never reaches the goal of the successful farmer.—*Farm and Stock.*

DAIRY AND STOCK TOPICS.

The best butter is made on the old pasture.

Rye bread is a common feed for horses in Belgium and Germany.

Sprinkle salt upon the back of a lamb to induce a sheep to own it.

The butter supply can be increased by frequent stirring of the cream.

The cows should be milked as "regular as clock-work," as to the hour, and in precisely the same order, each day.

Keep young pigs dry and warm. Clean pens and dry beds are necessary; dampness causes mange, which stunts the pig.

A flagstone floor is the best for the dairy; wood, cement or brick absorb drippings, and the floor soon becomes foul and odorous.

A Maine man says the way to start an obstinate horse is to take him out of the shafts and lead him around until he is giddy.

The last month of an animal's life has great influence upon his flesh, because the feeding during that period largely determines the flavor and quality.

JOHNSON'S ANODYNE LINIMENT

The Most Wonderful Family Remedy Ever Known. Excels all other Remedies for External Use.

—THE—

Geiss Electric Lamp.

The Latest Improvement and the Best

KEROSINE ILLUMINATOR

IN EXISTENCE.

Warranted to produce from any test of Kerosine Oil, a pure white, steady light,

Equal to three Gas Jets.

This very Superior Lamp is positively non-explosive, and will neither break nor smoke the ordinary chimney.

The wick movement is very durable, and cannot get out of order, yet so simple that anybody can wick a lamp in 20 seconds. Wicks last from six to eight months

The lamps are made of brass, cannot break, and will last a life time. What you save in chimneys in one year alone is a large item.

These lamps are cheaper at their price than ordinary lamps are as a gift, and a great many have been substituted for the gas, to the entire satisfaction of the parties concerned.

For prices, etc., apply to

H. P. MARQUIS,
Agent for the North.
