

HASZARD'S GAZETTE, FEBRUARY 11.

RECENT INVENTIONS.

A LITTLE SUMMER BRIDGE.—"They are coming towards the bridge; they will most likely cross by the rocks under," observed Rocco. "How?—with it?" I asked. "It is a torrent there." "Oh, no," answered the Frenchman; "men like would rather go into the than water. If they cannot leap the stream, they will bridge it." "Bridge it? and how?" "Stop a moment, captain, you shall see. The halting voice, now assumed noise, said, "we could perceive that the French were approaching the bridge, headed by a tall, thin, aged man, who was carrying a long staff, and a great number of dried herbs and roots. They were, as Rocco had stated, of the camomile, or ring-tailed tansy. One—an aloe-root, or chief plant, perhaps, was cut open, so as to indicate the distance, and after looking across the stream, as if calculating the distance, he unrolled his staff, and appeared to communicate with the leader. This produced a movement in the camp. Commands were issued, and fatigue-parties were detached, and marched up the front. Meanwhile, several of the French were approaching the bridge, and, as they came near, the old man, who was carrying the herbs, examined the rocks on both sides of the stream, and then, as he all collected round a tall cactus, which they gave over the narrowest part of the stream, and twenty or thirty of them composed up its trunk. On reaching a high point, the foremost—strong fellow—ran out upon a limb, and taking several turns of his tail around it, slipped off, and hung head downwards. The next on the line, also a stout one, climbed down the body of the first, and whipping his tail slightly round the neck and fore-arm of the latter, dropped off in his turn, and hung head down. The third repeated this movement, and the fourth, and the fifth, and so on, till all had passed over the cactus, and were resting their fore-paws upon the ground. The living chain now commenced evoking backwards and forwards, like the pendulum of a clock. The motion was slight at first, but gradually increased, the lowest monkey striking his hands violently on the earth as he passed the tangent of the oscillating curve. Several others upon the limbs above aided the movement. This continued until the monkey at the end of the chain was thrown among the branches of a tree on the opposite bank. The animal, two or three vibrations, he clung to his tail, and held fast. The movement was now evidently, just at the culminating point of the oscillation, in order to save the intermediate links from the violence of a too sudden jerk! The chain was now fast at both ends, forming a complete suspension bridge, over which the whole troupe, to the number of four or five hundred, passed with the rapidity of thought. It was one of the most comical sights I ever beheld to witness the quizzical expression of countenances along this living chain! The troupe was now, on the other side, but how were the animals forming the bridge to pass the stream? This was the question that perplexed me. Moreover, by some singular instinct, he ran on. But then the point d'orgue arrived, on the other side was much lower down, and number one, with half-a-dozen of his neighbours, would dash against the opposite bank or across into the water. Here, then, was a problem, and we waited with some anxiety for its solution. It was soon solved. A monkey was now stretching his tail to the lowest on the bridge, another girdled him in a similar manner, and another, and so on, until a dozen more were added to the string. These last were all powerful fellows; and running up to a high limb, they lifted the bridge to a position of horizontal. Then a dozen monkeys had lost memory of the original form, and the tail of the first, which was red, and the next moment, the whole chain was swung over, and landed safely on the opposite bank. The lowest link now dropped of like a falling candle, whilst the higher ones kept to the branches, and came down by the trunk. The whole troupe then disappeared off into the chaparral, and disappeared!—Captain Rocco's Adventures in South America.

LAW DIREX.—A Methodistic Minister at the west, who lived on a very small salary, was greatly troubled at one time to get his quarterly instalment. He at last told the paying trustee that he must have money, as his family were suffering for the necessities of life. "Money?" replied the steward, "you speak for money! I thought you preached for the good of souls!" "Souls," replied the minister, "I can't eat souls; and if I could, it would take a thousand, such as yours, to make a decent meal."

AN ANGRY MUSE.—Some time ago, a gentleman called upon a certain man, a very wealthy and indolent mean character, and found him at breakfast-table quite alone, and doing his utmost to catch a fly which was buzzing about the room. "What the deuce are you about?" demanded the astonished master, "when I suppose of an old man enough to be making fine speeches very singular, to say nothing else!" "Nothing," exclaimed the other. "I'll tell you presently." After many efforts the old fellow succeeded in entrapping the fly. Taking the insect carefully between his thumb and fore-finger, he put it into the sugar-bowl and quickly dropped the lid over his prisoner. The visitor, more annoyed than ever, knowing as he did the avaricious character of the man before him, repeated the question. "I'll tell you," replied the miser, a triumphant grin overspreading his countenance as he spoke, "I want to ascertain if the servants eat the sugar!"

COTTON.—A good cold, I say good, because a poor cold is not worth training, should be taken when fog or six months old; but it is a warm, white, eight or ten feet square, and the wooden, with a pink dove, and be kept clean through bone or meat of any kind. This healing Ointment for more readily penetrates through any bone or flesh part of the living body, curing the most dangerous inward complaints, that cannot be reached by other means.

ERYSPILAS, RHEUMATISM AND SCORBUTIC HUMOURS.

No remedy has ever done so much for the cure of diseases of the skin, whatever form they may assume, as this Ointment. Scrofula, Tore Heals, Berrofia, or Erysipelas, cannot long stand its influence. The inventor has travelled over many parts of the globe, visiting the best hospitals, dispensing this Ointment, giving evidence to its application, and has thus been the means of restoring countless numbers to health.

SORE LEGS, SORE BREASTS, & ULCERS.

Some of the most scientific surgeons now rely solely on the use of this wonderful Ointment, when having to cope with the most difficult cases, either scrofulous, scirrous, or tubercular, or the like. Professor Holloway has distinguished to the East, large number of this Ointment, to be used in the worst cases of wounds. It will cure any ulcer, glandular swelling, stiffness or contraction of the joints, even of 20 years' standing.

FILES AND PISTOLS.

These and other similar distressing complaints can be effectively cured, by the Ointment, well rubbed into the parts affected, and by exercises of the limbs, and rest.

BOTH THE OINTMENT and PILLS should be used in the following cases:—

Cancers	Spleen-
Breasts	Congested and stiff
Bones	Joint
Ectopistis	Stomach
Piles	Stomach
Gout	Sore-nipples
Fiss	Soft Gums
Coccyx	Tumours
Chilblains	Ulcers
Chlorosis	Vesicles
Chronic bl	Vast.

HOLLOWAY'S OINTMENT.

THE GRAND EXTERNAL REMEDY.
BY THE AID OF A MICROSCOPE
WE see millions of little openings on the surface of our bodies. Through these, this Ointment, when rubbed on the skin, is carried to any organ or inward part. Diseases of the skin, scrofula, berrofia, or erysipelas, cannot long stand its influence. The inventor has travelled over many parts of the globe, visiting the best hospitals, dispensing this Ointment, giving evidence to its application, and has thus been the means of restoring countless numbers to health.

JOHNSON'S CATHARTIC PILLS.
Sugar Coated, in Glass Bottles.

Some of the most scientific surgeons now rely solely on the use of this wonderful Ointment, when having to cope with the most difficult cases, either scrofulous, scirrous, or tubercular, or the like. Professor Holloway has distinguished to the East, large number of this Ointment, to be used in the worst cases of wounds. It will cure any ulcer, glandular swelling, stiffness or contraction of the joints, even of 20 years' standing.

THESE PILLS may be used in all forms of Diseases, with the most decided benefit, and without fear of injury. Being of Vegetable extract, they do not cramp or rack the delicate fibres or weak constitution, but will find particularly useful, by stimulating the appetite, and cleansing the system.

The Inventor has travelled over many parts of the globe, visiting the best hospitals, dispensing this Ointment, giving evidence to its application, and has thus been the means of restoring countless numbers to health.

TO BE SOLD BY PRIVATE SALE.
MARYFIELD.—THE PROPERTY
OF CHARLES DALGELSON, Esq., being the Southern
part of Posture Lot No. 40, in the Royalty of Charlottetown,
containing six acres, wholly under cultivation, on which is
erected a new house, 30 feet by 20, with a good cellar underneath,
and a back room 12 by 8, and a back door. There is
also a Barn on the premises, 40 feet by 16, and a never-failing
well of water near the house.

For further particulars apply at the office of Hon. Wm. Forgan,
or to Mr. Dalgelton on the premises.

2 m.

GRIFFIN AND SAW MILL FOR SALE.
THE SUBSCRIBER OFFERS
for Sale or Lease, a Grist and Saw Mill for sale, situated in Queen Street, between the CITY DRUG STORE
and the Post Office, No. 43, in King's County. They
are mounted on the most approved granite, and
are driven by a 14 foot overshot water-wheel, and a good
water course. The Mill is in full working order, and
is well built, and will be sold for a sum to be agreed
upon by the parties. The Mill is in full working order,
and will be sold for a sum to be agreed upon by the parties.

JOHN DIXON.

Charlottetown, Dec. 1, 1856.

UNCLE BEN'S RAM.

Uncle Ben was a queer old man.
A queer old man was he;
He owned a ram, a hunting ram;
In fact his hunting propensities prompted him to
kill everything horrible he could see.

Uncle Ben had a fat old spouse;
A fat old wife was she;
Who used to feed and pull his cow,
That came up to regale into the lawn every
night and stood under a large pine tree.

This fat old wife never used a stool—
To milk would not sit down—
And though old Ben called her a fool,
Yet she would never hear him to his advice, but
to reprimand the fiver she said he was a fool.

But one day as Uncle Ben stood
Beneath the stately pine,
Old Ben's wife, in merry mood,
Was milking her—occupying her usual position,
With her back 'o' behind a little elevated in the air.

Now Uncle Ben was very wrath,
Ah, very wrath was he;
He took the grindstone from its trough,
And tying a rope to it, hung it up on a limb of
the old pine tree.

Then like a heavy pendulum,
He swung that mighty rock,
Which seemed to say "I'm up to you,
Mr. Ram, so come in, will you, and take an
affectionate knock?"

Right soon then the fight began;
The stone would not give in;
And Ben's old Ram would yield none,
He hopped all day, and when Uncle Ben went
to bed he was still hitting like an ox.

But when Uncle Ben arose next day,
And went into the barn,
The Ram had butted himself away,
And everything under the sun but about two
inches of his tail was used up—completely gone!

SEED BARLEY FOR SALE.
AT THE ROYAL AGRICULTURAL SOCIETY'S STORE, in Charlottetown—being the produce of Chevalier, 2 Rowed Barley, imported from England last spring, and grown upon the Society's Farm.
By Order, W. W. IRVING,
Secretary, R. A. Society.
Committee Room, Dec. 27th, 1856.

DR. A. JOHNSON'S AMERICAN ANODYNE LINIMENT,
FOR THE CURE OF COUGHS, COLDS, INFLUENZA, &c.

COUGHES, COLDS, INFLUENZA, &c.

Bronchitis, Asthma, Pain in the Sides or Breast, Rheumatism, Cramps in the Stomach, Spitting of blood, and all Lung Complaints. Manufactured by J. J. JOHNSON, Bangor, Maine. Dr. A. JOHNSON'S AMERICAN ANODYNE LINIMENT, an entirely vegetable preparation, prepared and intended for external application.

The Inventor of this Liniment was in the constant practice of medicine for 20 years, and by a long course of experiments upon the various diseases for which this Liniment is recommended, he became perfectly satisfied of its efficacy, and offers it with full confidence to the afflicted, as the result of his long experience and best efforts.

This Liniment is a standard medicine, and enjoys the entire privilege of being copied and patented by a large portion of the medical Faculty, wherever it has been introduced.

With the firm conviction that it is the best remedy of the present age for all diseases for which it is recommended, the Inventor offers his Liniment to the Public, not doubtless that it will sustain the high reputation it has already acquired, and that it will be received with interest and pleasure by all who have a desire to know its merits. It is to be hoped that those who are afflicted with the following diseases, try it, and we can assure them, they will find relief.

Inflammation of the Bronchies or Bronchitis, Rose-Cold, Catarrh, Hard dry Cough, Whooping Cough, Hoarseness and common Cold, Catarrh and Soreness of the Lungs, Stomach and Sides, Rheumatism, Cramps in the Stomach, Spitting of blood, and all Lung Complaints. Manufactured by J. J. JOHNSON, Bangor, Maine. Dr. A. JOHNSON'S AMERICAN ANODYNE LINIMENT, an entirely vegetable preparation, prepared and intended for external application.
