

Dirty woodwork or any other part of the house that requires cleaning can best be cleaned by using

## SUNLIGHT SOAP

It will remove every particle of dirt and make the whole house bright and cheery. Absolutely pure, and every bar possesses remarkable cleansing power.

ASK FOR THE OCTAGON BAR.

Sunlight Soap washes the clothes white and won't injure the hands.  
LEVER BROTHERS LIMITED, TORONTO.

### COW EATS VEST AND \$55

Owner of Money Has Her Slaughtered and Recovers \$75.

Akron, Ohio, Aug. 6.—While working on the Cleveland and Pittsburgh Railroad at Macedonia recently, Contractor Frank Wise hung his vest on the fence on a lot belonging to Frank Green, a prominent farmer. In the pocket of the vest was a purse containing \$55.

A wandering cow of depraved appetite spied it and ate the vest and contents, but fortunately Wise discovered the cow in the act, purchased the animal of Green for \$50 and sold her to a local butcher for \$25.

The cow was slaughtered immediately and a search resulted in the recovery of the money to the value of \$55, which was yet in such condition that it could be redeemed.

### NOTHING GOES RIGHT.

Nothing goes right while the stomach and bowels are wrong. Anger's Peppermint Emulsion is the ideal remedy for all forms of stomach and bowel disorders. It aids digestion, improves nutrition, creates rich, red blood, firm flesh, and makes life well worth living. Pleasant to take.

The navy which gives England the supremacy of the seas costs \$155,000,000 a year, or a little more than the United States pays in pensions.

**The True Tragedy of Life**  
Is ill-health, disappointed ambitions, usefulness destroyed. Pathetic! nay, tragic! Poor blood, weak nerves, a tired brain, is there hope? Yes! Because there is a cure.

Ferrerozine Tablets make blood not blue blood, but the fluid that strengthens the whole body. Ferrerozine does this quickly by improving digestion, stimulating assimilation, and by inducing health and tone to the whole system. Your druggist will tell you a great deal more about Ferrerozine. Ask him to tell you of the wonderful curative properties of Ferrerozine Tablets.

Flower growers in the South of France and other favored climes find it profitable to send the products of their skill to British markets.

### SU'S BLACK OUTLOOK

Will Be in Autumn List of Chinese Executions.

Peking, Aug. 5.—Six scholars whose essays at recent examinations proposing reforms in the administration of China, were denounced by the censors, have fled from Peking, through fear of arrest and execution. It is supposed that they have gone to Japan.

Marshal Su, who was summoned to the capital to explain his failure to crush the rebellion in Southern China, has had an audience with the Dowager Empress. It is predicted in official circles that Su will be included in the autumn list of those condemned to be executed.

### A BIG BIG COAL VEIN

An Ontario Concern Strikes It Rich Near Port Simpson.

Hamilton, Aug. 6.—Word has been received here by Dr. Atkins that a bed of coal has been struck on the property owned by the Cassiar Prospecting Company, the stockholders of which are Hamilton and Toronto men. The find was made in the Buckley valley, about 70 miles from Port Simpson, B. C. The company owns 40 square miles and coal runs across the whole of it.

### REXALL HOUSEHOLD DYES.

The latest and most improved dye in the world. Will dye wool, cotton, silk, lace or mixed goods in one bath. Ask your druggist, Cairness & Lawrence, 216 Dundas street, E. J. Chisholm, 622 Dundas street, T. H. Jones, Wortley road, for a sample.

Golden eagles are increasing in the Scottish highlands, owing to the efforts made by large landowners for their preservation.

## GREAT RUSH TO NEW GOLD FIELDS

The Pelly River District Is Said To Be Rich in the Precious Metal.

Fort Selkirk, Y. T., Aug. 6.—A strike is reported from the Pelly River which in time will rival the Klondike in richness.

On July 14, Robert Henderson, the original discoverer of the Klondike, found pay dirt on a tributary of Hoote River, a tributary of the Pelly River.

What the strike amounts to has not yet been determined, but Fred Envoideen, who is a partner of Henderson, says that in one day's shoveling he cleaned up \$17.

A correspondent for the Sun has been dispatched to the scene to report on the diggings, and his findings will be awaited with interest.

Dawson and the Klondike country are greatly excited over the new find, which has been expected for several years, as the late Dr. Dawson reported the country to be well mineralized.

Hundreds of people are leaving Dawson as fast as steamboat facilities will permit.

London, July 6.—The latest rumor in connection with Mr. Chamberlain's scheme is that a royal commission of inquiry will be appointed to which the colonies will be asked to send representatives.

All rumors of Mr. Chamberlain's retirement from the fiscal fight is authoritatively contradicted. He is personally more hopeful at the present time than since he declared his programme. Indeed, it is stated on excellent authority that he has persuaded himself that he may even win at the first general election. He has captured the party machine, and reports from local agents seem to assure success.

Large manufacturing centers are probably strong in support of Mr. Chamberlain, though the free trade Unionists count upon Lancashire, where the cotton industry has taken an anti-Chamberlain line.

The Sydney correspondent of the Morning Post declares that, unlike Canada where a generous rivalry in support of Mr. Chamberlain seems to exist between the ministers and the Opposition, Mr. Chamberlain's proposals have been received in Australia in most quarters in a strictly party sense.

The correspondent doubts, however, if the majority of the free trade rank and file are prepared to follow Sir William McMillan and Mr. Reid in this uncompromising opposition to an imperial protective tariff.

Whitaker Wright, interviewed on his voyage to England as to the fiscal policy, said that the colonies were loyal, so long as it did not conflict with their self-interests. When this happened, loyalty had to take a second place. He knew the colonies well, and without hesitation would say that self-interest was paramount.

## A REVOLUTION IN THE BALKANS

Turkey Decides On More Vigorous Measures and Calls Out More Troops.

Sofia, Bulgaria, Aug. 6.—The Macedonian committee announces that a revolution was proclaimed at the village of Monastir last Sunday in conformance with the decision of the central revolutionary committee.

The committee state that all the revolutionary forces in the districts of Monastir, Itezi, Ochrida, Delbo, Kentchero, Foretska, Kroucher, Porlin, Serlin, Kaylari and Demirhisar simultaneously commenced hostilities. All telegraphic communication has been cut in the districts mentioned.

Constantinople, Aug. 6.—The Porte has abandoned all idea of withdrawing troops from Macedonia, and is now making vigorous preparations to draft troops for the disturbed districts.

A circular note has been sent out warning the powers of the intention of the Turkish Government. The note states that the situation is very serious, and although it does not mention Bulgaria, the document is regarded as a menace to the Bulgarian Government.

Salt Lake City, Utah, Aug. 26.—By defying the laws of atmospheric resistance as laid down by Newton, a Salt Lake man has solved the problem of aerial navigation.

The inventor is Adolf Brodbeck, Ph. D. of this city. His machine is a car operated on elevated tracks at the rate of 600 miles an hour. While it is not a flying machine it answers the purpose as well as safety and speed will permit and the inventor believes that it will serve all the purposes of aerial flight for centuries to come.

The car, which in general outline is turtle shaped, runs upon four rails in such a manner that it cannot jump the track. A flat metal shield or platform covered with wood runs around the car and permits one of the pictures of the rings around Saturn. This plays a part in the speed of the car.

But the secret of the almost unlimited speed of the car is a huge propeller, worked by an air motor in the rear. After the car is once in motion this propeller in front of the car overcomes the resisting force of the air, which has proved such a stumbling block to inventions of this kind, and the car is practically carried forward by its own inertia with a minimum amount of power.

The effect is the same as if a wheel going at dizzy speed had no air resistance or other friction to overcome. It is easily seen that once set in motion it would be carried an enormous distance by its own motion, while a trifling application of energy would keep up the speed.

"The speed of the machine," said Dr. Brodbeck, "depends upon the energy and the tenacity of the material from which it is made. It is operated by electricity, the same as a trolley car, until it is under way, when it is carried forward by the propeller with a trifling amount of electrical energy to replace the waste. It is like using a small fire to keep up the temperature after the room is once warm."

Dr. Brodbeck explains that there is practically no friction on the rails after the car is once in motion. In an ordinary railroad coach the high speed is possible only by increasing the weight of the cars so that they will stay on the track. Otherwise, they would jump from the rails. The rails from the aerial car keep it horizontal, and it has twin wheels, one set on top and the other under the rail, which makes it absolutely impossible to jump the track.

The shield around the car also plays an important part in the speed. This is because of the pressure underneath, assists in lifting the car until the weight against the rails is less and less. While the lifting tendency under high speed is assisted by the shield, the possibility of leaving the tracks is overcome by the twin wheels and the double rails upon which the car runs.

"How fast do you expect to operate the cars?" was asked.

"For through passenger service we expect to attain a speed of 600 miles an hour, but for local traffic we do not intend to exceed 250 miles an hour. There will be no sensation of movement, except that of passing through the air after the car is once under motion. It is superior to independent aerial navigation for the reason that it combines the elements of safety with speed, which will be absent for years to come in ascending and descending in an ordinary flying machine."

### A WEDDING AND A DEATH

Joy and Sorrow Enter House in the Same Day.

Woodstock, Aug. 5.—Mrs. Wedgery, wife of Edwin Wedgery, an employee of the Whitelaw foundry, died under particularly sad circumstances at her home on Bay street Monday evening. For the past year she had suffered from an illness which told upon her health. This malady recently deepened into heart trouble, as a result of which her death occurred. Mrs. Wedgery's daughter was married at noon Monday, and during the reception at the house Mrs. Wedgery was in excellent spirits.

### TARIFF NEGOTIATIONS

Germany Waiting To See What Mr. Chamberlain Will Do.

London, Aug. 6.—Of late shipments of wheat arriving at Hamburg have been sold as American, although Canadian wheat has been mixed in them. The customs authorities now require that all shipments of cereals and peas from the North Atlantic ports, including the lake ports, must have certificates proving that they do not originate from Canada.

The Berlin correspondent of the Standard, who speaks with authority, declares that all Anglo-German negotiations for a new commercial treaty are in abeyance. After the publication of the last German book, Germany sent a very conciliatory fresh note to London, but when Lord Lansdowne invited the German Government to make a proposal regarding the new treaty, Herr Reichsoffen replied that Germany was unable to accept England's future fiscal policy, as it is so uncertain in consequence of Mr. Chamberlain's proposals.

The Standard's correspondent declares that the best German desire to bind the colonies closer to England by a new fiscal policy deserves the highest praise, as it has long been Germany's aim to do the same in regard to her colonies.

### A MODERN ENOCH ARDEN

Returns After a Twenty-Two Years' Disappearance.

New York, Aug. 6.—About 22 years ago, Miss Margaret McKenna and Charles Coyne, eldest son of a wealthy contractor, were married in Yonkers. They lived happily together for six years and several children were born to them. Three days before the birth of the last two children, who were twins, Coyne left home. He returned in a short time, then disappeared again. On Wednesday he returned to this city after an absence of almost sixteen years.

For years Mrs. Coyne searched for her husband. At length she received information that he was dead. A newspaper recording a terrible accident in the west had his name among the killed.

Soon after that Mrs. Coyne was married to James Burke.

Coyne, when he returned last Wednesday and learned that his wife was alive, went to the place where she lived to catch a glimpse of her. Having seen her he disappeared again without saying a word or letting her know he had returned.

Mrs. Burke, when asked what she would do if her first husband should claim her, appeared greatly troubled. She replied that her husband was enough for her, and that she supposed she would be obliged to go to the one that had the right claim to her.

### WRIGHT ARRAIGNED

He Is Liberated on a \$250,000 Bail.

London, Aug. 5.—Whitaker Wright, the promoter and director of the London and Globe Corporation (Limited), was arraigned at the Guildhall police court this afternoon and remanded after formal evidence of his arrest had been taken. He was released on bail of \$250,000, himself providing \$125,000, and three sureties guaranteeing the remaining \$125,000.

Few of those present recognized Whitaker Wright as he entered the hall and took his seat in front of the magistrate. Directly behind Wright sat Guy Stephenson, counsel for the prosecution; R. D. Muir, the attorney for the defense, and John Flower and Arnold White, representing the committee of investigation.

Wright sat nervously twitching his beard, but otherwise was not affected by the scrutiny to which he was subjected. The charge against him of issuing a false balance sheet of the London and Globe Corporation (Limited) was read, and Inspector Willis testified to receiving Wright in custody from the New York authorities.

The defendant listened attentively while his attorney applied for bail. Muir appealed for a fair trial, and protested against a "trial by the gutter newspapers." There was no opposition to the application for Wright's release on bail, which was granted, and the case adjourned to Aug. 24.

The Englishman's idea of breakfast is a healthy one. Toast, jam and tea—a chop mebbe—just enough food for the stomach to assimilate properly—the warmth of the tea to draw the blood to the stomach and assist digestion. Blue Ribbon Tea is the daintiest and crispiest leaves of the tea plant.

It is pure tea—free of tannin—appetizing and nutritious. Try the Red Label Brand for your breakfast.

### The Sacred Tree.

Boston, Mass., Aug. 6.—One of the mysteries connected with the Forbidden City of Peking has come to light here with the strange appearance in the Boston Art Museum of what is said to be the famous sacred jeweled tree belonging to the imperial family of China. For more than two centuries this treasure, made of native Chinese precious stones, standing two and a half feet high, and radiating a

brilliant mass of colors, had been closely guarded day and night, few persons knowing of its existence.

WORMS CAUSE feverishness, moaning and restlessness during sleep. Mother Graves' Worm Expeller is pleasant, sure and effectual. If your druggist has none in stock, get him to procure it for you.

A flock of ostriches at Phoenix, Ariz., now numbers more than 1,500 birds.

# POISON

Enters the human body with everything we eat or drink. Sometimes the poison is not very powerful, but if any foreign matter be allowed to accumulate in the system, the health will suffer. There are special organs to take care of all the little poisons which would give trouble if not attended to. These are

## The Kidneys.

The function of the kidneys is to throw off uric acid and unwholesome matter which escapes the intestines. To do this properly, they must be kept healthy and strong. The great regulator and invigorator is

# Bu-Ju

Trade-Mark.

## The Kidney Pill.

It is because it combines all the experience of the medical profession regarding the causes and cure of kidney ailments, and because it is compounded with all the latest skill obtainable. Those who use Bu-Ju at once when the kidneys begin to act sluggish have a remedy which is made especially for the kidneys. Delays are dangerous. Do not let the poisons accumulate. Do not waste time and money on worthless substitutes. Get the up-to-date preventative and remedy. It is sold by all druggists in boxes of 50 pills at 50 cents. Manufactured by
