This was from Alice, with much eagerness. "And there'll be lots of ices and reams," cried Tom, "and we are sure to have some of them sent into the school room, and Maud, lucky girl, will go into dessert, and get grapes and peaches; but mamma does not think us old enough yet."

Stella and Lily exchanged a laugh. "I hope I am going to be asked to this wonderful party," said Stella. "Oh! yes, I know you are," cried Alice, "for I heard mamma say you were to be, and your sister too." "I am sorry my sister is not here yet; she will miss it." "Oh! no, she won't, because it nearly three weeks off, and mamma said she felt sure she would be at "I think we had better perhaps drive

In that short drive across the sunn park up to the door of Wrexham Hall these two girls, who were both straightforward in their natures, alhough their characters and dispositions were widely different from each other, began to experience a sympathy and an instinctive attraction one to ward the other, which in time ripened into a firm and fast friendship. Stella was astonished to find that Lily was so unlike her mother, or whose account she had naturally fel

At the very beginning of his attempts to solve the mystery of fertilization, Dr. Loeb was convinced that he must discover means of imitating the essential details of the process by physico-chemical methods. Since membrane formation appeared to be one of these essential details it became first of all necessary to produce that membrane by physico-chemical means so perfectly that it could not be distinguished from the membrane normally produced. This was finally accomplished with great success on the sea urchin eggs in a very simple fashion. For instance, unfertilized eggs were treated with solutions of acetic, butyric or other similar acids, which were usually followed by solutions of common DR. J. D.
