The reference here made by Sitting Bull points to the contention which he raised soon after his arrival in Canada, to the effect that the Sioux Indians were really British subjects and that they had been handed over to the United States without their consent. This view the Canadian authorities never adopted. Sitting Bull was, however, given to understand that so long as he and his people behaved themselves they would be protected on Canadian territory. This was the case with the Grand Dukes Vladimir and Alexis, A special requiem was also held in the winter palace by Governor-General Trepoff, who is known to be under sentence by the fighting organization of the social revolutionists, and who, so far as can be ascertained, has not left his quarters in the palace since the assassination of Grand Duke Sergius. "The Maid and the Mummy," which is according to the play bills, "a musical melange in two acts," was the attraction at the Grand Saturday afternoon and evening. Richard Carle-he of "The Burgomaster" and "Tenderfoot" fame-is accused of writing the book and lyrics, and Robert Hood Bowers is charged with perpetrating the music. But no matter who are guilty of the offenses, the people, as is the case in most instances, must suffer. Saturday afternoon the people played possum, however, and gave the a wide berth, but at night the audience was a fair-sized one. The production is not worth while going into the details. Some of the lines are rather clever, but the production as a whole is decidedly saggy and flat. And worst of all, the cast is one that must have been playing hookey when ability was served out.
