SOCIÉTÉ ROYALE D'AGRICULTURE D'ANGLETERRE.

Conseil Hebdomadaire.—Le Colonel balonier, Président.

Des Tares Précoces.—Le R^{ev}. A. Huxtable transmit de ses tares précoces, qui avaient poussé sur sa ferme dans le Dorsetshire, à une élévation de 600 pieds au-dessus du niveau de la mer. La semence qui lui avait été fournie par M. W. H. Davis, de Marnhall, près de Blandford, fut semée à la fin de la première semaine d'octobre, poussèrent au moins un mois plus vite que d'autres tares communes qui avaient été semées plusieurs jours auparavant. La maturité de ces tares à croître et à faire des coques, fut sans rivale dans l'expérience de M. Huxtable; car, malgré les grandes gelées du mois d'avril dernier, elles étaient en pleine floraison dans la première semaine de mai; et il pensait qu'il n'était pas nécessaire de démontrer l'importance d'une moisson qui serait très utile pour nourrir les moutons dans les premiers jours du printemps. Le professeur Way remarqua qu'il tomba une grande quantité de pluie sur les terres élevées dans le district de M. Huxtable, et que l'atmosphère y était douce mais humide. M. Baskerville Glegg constata que dans le
