

TABLE OF CONTENTS

	Page
1. INTRODUCTION	1
1.1 The General Assembly Resolution	1
1.2 Usable Data in the UN Returns	1
1.3 Scope and Purposes of Present Study	3
2. SEISMOGRAPH STATIONS	5
2.1 Conventional Stations	5
2.2 Array Stations	5
3. SENSITIVITIES OF STATIONS ASSUMED IN THIS STUDY	15
3.1 SPZ Conventional Stations	15
3.2 SPZ Array Stations	16
3.3 LPZ Conventional Stations	17
3.4 LPZ Array Stations	18
3.5 Rayleigh Wave Detection in Terms of m_{50}	18
4. GLOBAL P WAVE DETECTION	20
4.1 Individual Station Detection Probability Functions	20
4.2 90 Per Cent Detection Probabilities for an Event	21
4.3 The 46-Station SPZ Network	21
4.4 P Wave Detection at Specific Sites	24
4.5 Global P Wave Detection Thresholds	27
4.6 P Wave Detection and Azimuthal Coverage at $m_{4.5}$	30
4.7 P Wave Detection and Epicentral Location	30
5. GLOBAL RAYLEIGH WAVE DETECTION	35
5.1 Computational Procedure	35
5.2 The 51-Station LPZ Network	35
5.3 Rayleigh Wave Detection at Specific Sites	35
5.4 Global Rayleigh Wave Detection Thresholds	38
5.5 Rayleigh Wave Detection and Azimuthal Coverage at $m_{5.0}$	38
6. ENHANCEMENT AND DEGRADATION OF DETECTION ON THE REAL EARTH; SPECIAL SIGNAL PROCESSING, GLOBAL SEISMICITY, AND INTERFERENCE PHENOMENA	43
6.1 General	43
6.2 P Wave Phenomena and Special Instrumental Effects	43
6.3 Rayleigh Wave Phenomena	45
6.4 Special Signal Processing	46
6.5 Global Seismicity and Interference Phenomena	47
7. DETECTION OF UNDERGROUND EXPLOSIONS	50
7.1 Assumed Characteristics of the Explosions	50
7.2 Explosion P Waves	51
7.3 Explosion Rayleigh Waves	51
