[Vols. I. II. III. and IV. have been published—the Vth will appear forthwith.

[Each volume forms a complete work of itself]

Mr. Martin is earning for himself a solid and unperishing reputation. He is giving his country a standard work; a work that requires only time to become an English classic. This laborious undertaking has now reached the third volume, which embraces a most lucid, well-written, and ample history of our possessions in North America. There is no topic connected with this subject that he has left untouched, and he has handled every subject with that patriotic feeling that we like so much to see in an Englishman, which warms through the volume, and shows that, with all the energy of zeal, he has combined the clear-sightedness of the politician, and the accuracy of the statesman. There is no class of our fellow-subjects to which this work will not be of eminent use. To the commercial relations of these colonies Mr. Martin has devoted much attention; and the tabular statements form no small item of the general merits of the work. The accompanying maps are distinctly engraved, and are fully adequate to the illustration of the letter-press. Notwithstanding the utility, and the scientific nature of this work, we can assure the general reader that he can hardly take up a more amusing book. There is in it ample food for the geologist, mineralogist, and botanist. In fact the interests it embraces are general. It is essentially a book for the library; a book, that after its contents are well digested by the peruser, should always be kept within his reach for the purpose of reference. The style of the narration is easy and flowing. As the *cui bono* principle seems rapidly to be gaining ground among us, this undertaking will assume a high position among the publications of the country at once, as it is called for by the public wants; and as the call has been so efficiently responded to, it cannot do otherwise than secure to the 'History of the British Colonies,' a complete and deserved success.—*Metropolitan Magazine*, Feb. 1835.

Mr. Martin possesses eminent qualifications for the task he has undertaken,—he has not merely a taste but a passion for statistics; a sheet of figures is to him as delightful as a landscape of Claude's to a virtuoso, and he frames tables with as much facility as if Babbage's calculating engine formed part of his mental machinery. Connected for many years with the colonies, he has acquired a thorough knowledge of colonial and commercial policy—an economist of no mean order, he has arranged and digested that knowledge so as to afford information and guidance for the future. Above all, imbued with the purest principles of philanthropy, his aim, in all his publications, has been to point out the best means for increasing the amount of human happiness.—*Athenaeum*, March, 1834.

A work of extraordinary industry and great utility. Mr. Martin exhibits a very rare talent for grasping extensive subjects, for seizing with rapidity upon their distinguishing features, and for collecting evidences and illustrations to strengthen and illuminate his work.—*Atlas*.

As a work of reference Mr. Martin's publication will be necessary to all libraries, whose owners take an interest in Colonial Affairs, for it contains information which cannot be procured elsewhere.—*Spectator*.
