

All persons interested in the study of Astronomy, Astro-Meteorology, (sometimes called Planetary Meteorology), Meteorology, and their kindred sciences, should become members, and such are cordially invited to correspond with the President or either of the Vice-Presidents.

Prospectuses and By-laws of the Association, together with instructions to those desirous of forming Branches, are sent free on application.

The Central Committee meets at Montreal monthly, except during June, July and August. As soon as the membership warrants, however, it is the intention to hold General Annual Meetings in one or other of the large cities, when essays on Astro-Meteorology and Planetary Influence will be the leading features. During the first year no less than twenty-nine papers were read by members. Many of these essays were of great interest, and appeared in the recognized organ of the Association, the *Advocate*, of Huntingdon, Que. The annual subscription fee of Associates is One Dollar, due on the first day of January each year, in advance. Ladies and Gentlemen are equally eligible for membership.

## BY-LAWS.

---

1. The name of this Association shall be the Astro-Meteorological Association.

2. The general aim of the Astro-Meteorological Association shall be to examine into the various pre-supposed influences of the heavenly bodies upon each other, and especially upon the various elements and constituents of this earth, in order to establish rules for future guidance in forecasting the weather, seasons, times of plenty, seasons of dearth, times proper for planting and ingathering of crops, periods of sickness, health, etc., etc., as well as to promote the study of the sciences of Astro-Meteorology, Astronomy and Meteorology.

3. No theory shall be accepted as proved, until thoroughly ventilated, discussed and voted upon favorably by the Association.

4. The Astro-Meteorological Association shall be composed of a central corresponding committee, sitting permanently at Montreal, and any number of committees, sitting at other places, it being the duty of outlying committees to report as often to the central committee as may be necessary, and not less often in any case than once each calendar year.

5. The Central Committee shall meet at least once each calendar month, on the first Friday of each month, from October to May inclusive, in the City of Montreal, and should the Astro-Meteorological Association meet as a unit, at any time or place, during the year, extra special meetings of the Central Committee may be called by the President, as often as such may be found necessary.

6. The general officers of the Astro-Meteorological Association, shall consist of a President, all local Vice-Presidents, a Secretary and a Treasurer. All officers to be elected for one year.
