New York, April 26 .- Noon .- The

market during the morning ruled firm,

free to confess the superficial complex-

with leading speculative issues in demand, the London share of some 12,000 shares on bealance being readily absorbed. Attention is called to the fact that Great Northern is selling about 210 points gross and 140 points net under the selling price of a year ago, while the stock is worth more today than ever before. . Among favorable points are the low capitalization, less than \$240,000 per mile, this being the only transcontinental line capitalized at anything like such a low figure, and the fact that Great Northern is a growing proposition, having increased gross by \$22,000,000 in six years, and surplus earnings nearly half as much. The ten-mile business has considerably more than doubled in six years. The operating efficiency is notably good. Since 1900 some \$56,500,000 has been turned back into the property, an equivalent of \$40 per share on present outstanding stock. The Burlington equity is worth \$77,000,000 per annum the earning power of the Great Northern is about 20 per cent. Mr. B. A Yokum, chairman of the Rock Island board, says there is enough traffic in the southwest to keep the lines busy until the next crop is ready to be moved, and that R. I. will not curtail improvement work, or plans to any material extent. Crop conditions will improve. It is such statements as Mr. Yokum's which have deducted short covering recently by large operators. Politicians think the 5-cent fare measure, affecting B. R. T., will not become law. There is quiet buying of stocks, and on any recessions, we think, the market will prove an excellent pur-

chase. Sales of stocks to noon were 222,400 shares. LIVE STOCK MARKETS.
