WEDNESDAY MORNING A Battery-Not A Belt No Charging-No Acids or Vinegar R. LORENZ'S Body Battery is as far superior to the "Vinegar Belts" as sunlight is to tallow candles. It is an entirely new invention—different from any other device ever perfected for the cure of disease by Dr. Lorenz's Body Battery is a dry cell battery of high power, arranged so conveniently that it may be worn all night if desired. It produces electricity for hours at a time without the use of acids or vinegar for charging. The current is smooth, even, regular, soothing, restful—without shock, sting or unpleasantness. The strongest of "electric belts" cannot generate ectricity enough to move the needle of a volt meter or flicker an electric light. Dr. Lorenz's Electric Body Battery is shown above connected to a Volt Meter (an instrument for measuring the strength of electric currents) and to an Incandescent Lamp. As will be noted, Dr. Lorenz's Body Battery shows very high in voltage and lights the lamp brilliantly. This display is arranged in our offices so that all callers may see the power of these perfect The special feature of Dr. Lorenz's Body Battery, which will be appreciated by those now being treated by electricity, is that no charging is required. Each cell is a battery in itself and generates electricity. The curzent can be reversed without removing the battery from the body and changed in power by means of a regulator. of a regulator. Sold on easy monthly payments if desired. Electricity is the road to health. Electricity cures where drugs fall. It takes the best apparatus to get the best results. Write for booklets which fully describe and illustrate Dr. Lorenz's Body Battery—a marvellous discovery and an entirely new way to fight disease.

the people on the bylaw to spend \$700,000 on a Lake Shore drive and waterfront boulevard, reaching from Bathurst-street to the Humber.

At the luncheon of the Guild of Civic Art yesterday Controller Ward explained the features of the plan, and described the seawall which is to be built along the front. It was part of the bargain in 1889 with Parkdale before the town entered the city that this project should be carried out. Of the 3 1-2 miles from Bathurst street to the Humber the city owns about 3 1-4 miles. This property of 20,000 feet frontage and 200 feet depth is very valuable, and worth far more than the \$500,000 it has cost the city, inclusive of garrison commons.

The wall will be constructed 200 feet out from Bathurst to Dufferin-street, and probably from the Humber to Indian-road. From Dunn-avenue to Dowling-avenue there is private residential property, and it is intended to swing the wall out from Spenceravenue to the end of the water lots at Indian-road at least 400 feet. This distance may be carried west to the Humber.

Already \$40,000 has been spent on the necessary repairs between the paw
