Wheat—The feature of the day was the weakness in December on reaching stop orders, the net loss being about 2½. The market was dull and the features were considered to nerrous fluctuations in December and flashes of strength in May. On the whole the market held to about closing range of yesterday. Cash news was about a stand-off. Minueapolis flour output last week decreased 15,000 barrels, a small amount, considering the decline in export and talk of dulness. Outside markets were dull. Broomhall estimates Argentine shipments at: 1,200,000 bushels. Southwest receipts are evidently on the wane.

Corn—December shorts bid this delivery up a cent early. According to eastern advices an enormous export demand is developing. Receipts here were 605 cars, but contract grades show no improvement. Shipments good, and if export news proves true an active cash market here is probable.

Oats—Fair trade in oats. Range small.
