"BREADNOTS" MORE TO BE FEARED THAN DREADNOUGHTS

New York, July 26.—A special cable from London printed here this afternoon says: "German dreadnoughts are less to be feared than the British bread-nots," shouted leader Ben Tillett, to a throng of striking dock workers on Tower Hill today. In his speech he execrated the government for spending money on battleships while English workmen and their families were starving. From the crowd someone reminded the

speaker that there had been as yet no answer to his prayer for the death of Chairman Lord Devonport of the port of London authority, whom the strikers believed responsible for the stubbornness with which the employers had held out against them. "True," agreed Tillett, "I am satisfied now that God does not want Lord Devonport. May the devil take him."

The M. R. A. Sewing Machine \$28.50

As Silent as a Watch—Easy in Operation
---We Guarantee It For Ten Years

The housewife without a good sewing machine is handicapped to just about the same extent as a farmer without a reaper. To be obliged to put through by hand the amount of stitching, hemming and gathering entailed by an adequate supply of dusters, curtains, sheets, etc., to say nothing of the repairing and renovating of the family wardrobe, is a wasting of time and strength. For any such housewife, the bestowal of an easy-running, up-to-date machine would be one of the happiest ideas possible.

When it is considered that the M. R. A. Sewing Machine, with its formal guarantee of ten years' satisfaction is procurable at \$28.50, the large returns for a small investment are apparent.

The woodwork of the machine—which is of the convenient drop head order with automatic lift and self-adjusting belt—is of quarter cut oak, highly polished. Some of the special features worthy of mention are:—Head is full arm high and ball bearing; Shuttle is large and self threading; Belt is adjusted so that it need never come off; Bobbin winds the thread with particularly proficiency; and the attachments are of the best quality and cannot be put on wrongly.
