

## HYDRO-ELECTRIC POWER SCHEME

Proposal to Spend \$223,000  
Will Be Submitted to Kam-  
loops Ratepayers

Kamloops, Sept. 18.—The council met in special session to discuss in detail the report for hydro-electric power from the Barrier river. The plan which will likely be adopted is the initial development of 2000 horse-power from the Barrier river at a cost not to exceed \$190,000, the purchase of 100,000 gallon per day centrifugal pump designed for the new power house but temporarily installed at the present power house, to cost complete with motor \$5,500, and the construction of a reservoir with a capacity of one million gallons at a cost of \$23,000, including mainline total expenditures of \$223,000. The present plant would be maintained as a reserve until the construction of a new steam plant at a later date.

The opinion was unanimous that Mr. Dutcher had given the city a most comprehensive report. Ald. Bauman, while he believed it to be a most conscientious report was strenuously opposed to several of the main features. The low head of 180 feet provided by Mr. Dutcher he thought was a big mistake and he doubted if 5,000 horse power could be developed on such a head. By going three or four miles farther up he thought ten thousand horsepower could be developed easily and in building for the future that was an important point. Another matter Ald. Bauman objected to was the flume proposed.

Ald. Cornwall thought a pipe-line would cost considerably more than the flume but would be cheaper in the end. Ald. Bauman contended for an initial unit of 1,000 horse-power. It had been intimated to Mr. Dutcher that the council desired an estimate for the 1,000 horse-power unit for the plant. Mr. Dutcher accordingly forwarded a supplementary report, which was read, showing that it would not be advisable and the cost would be only about \$18,000 less than the 2,000 horse-power unit. It is proposed to sell power for irrigation purposes along the line, from which considerable revenue is expected to be derived. The question was asked: Has the city the right to sell power? The council was not sure on the point and steps will be taken to inquire into that.

In summing up matters the mayor thought it would be false economy to adopt the 1,000 horse power unit and as the present plant was inadequate and the city needed a new reservoir he favored the adoption of the plan providing for utilizing the power of the plant with the installation of two pumps at a cost of \$17,500, building a new reservoir at a cost of \$28,000 and initial development of 2,000 horse power at the Barrier. The mayor discussed could be submitted to the engineers, and before the plans are adopted they should be checked by competent engineer, after which the proposition can be left to the people to decide upon. In his opinion the city was well able financially to handle the work which would involve an outlay of approximately \$250,000.

### NEW CONGREGATIONS.

Vancouver, Sept. 18.—At a meeting of the Westminster Presbyterian it was decided to organize a new congregation at East Vancouver. It was agreed to apply for a loan of \$1,000 from the Church and Manse Building Fund. At the urgent request of a portion of the people of Riverview, South Vancouver, it was agreed to establish a new congregation at Fraser avenue and River road.

The Moderator reported that plans for a new church at South Hill, South Vancouver, were ready, and the approximate cost would be \$3,000, and that provision was already made for raising this amount. The Presbyterian gave its consent to South Hill congregation to build at once.

On account of the increased population of the valley, it has been decided to arrange a redistribution of Fort Moody and the Langley district. Especially has the growth of Central Park been so great that the Presbyterian considers it will take three new churches to cope with the work there. There has been only one heretofore.

This home mission committee through Dr. Pidgeon, recommended that new churches should be established at 18th avenue and Heather street and at Coquitlam Dam.

An important resolution was adopted with regard to the appointment of an immigration agent and a city chaplain for the Presbyterian denomination.

The Presbyterian authorized Rev. J. H. White to initiate a campaign to raise \$35,000 for church extension in this city.

### LATE HOURS NOT APPROVED.

New Westminster, Sept. 18.—A suggestion to allow the bars in the city to remain open later than 11 o'clock during exhibition week was not approved by the License Commissioners at the regular meeting. Commissioner D. G. Christ brought the matter before the board supported by Commissioner Alderman Campbell. Commissioner Johnston pointed out that the law in connection of the city by-law, and it could only be made possible by an amendment to the by-law. He suggested that they bring the question before the city council at the next meeting, and see what they stood. This may be done, but it is not probable that any action will be taken by the council as the time is too short.

Alderman Johnston declared that no licenses should be renewed to hotels who did not obey the law to the letter. Only those who obeyed the chief of police and living up to the by-law should be given a license. He asked the support of the board, and pointed out that it was not the place of the license commissioners to make laws, but to see that they were carried out.

Observations to determine the duration of sunshine in Europe showed that the most sunshine and Scotland the least.

### MOROCCAN NEGOTIATIONS.

French Semi-Official Note Says Settlement May Be Reached Shortly.

Paris, Sept. 19.—A semi-official note issued this afternoon says the French negotiations with Germany entered a new stage during the conversation between the German Foreign Minister Herr Kiderlin-Waechter and the French ambassador to Germany, M. Cambon, yesterday, promising an early agreement.

The note says that Herr Kiderlin-Waechter did not give M. Cambon a written reply, but talked over with him certain modifications in a spirit of conciliation. No decision was handed over because the time would have been lost in transmitting it to Paris and in re-transmitting the reply to Berlin.

Another interview will take place Thursday and it is hoped that by the end of the week the negotiations will have reached a decisive turn.

Frankfurt-On-The-Main, Germany, Sept. 19.—The Berlin correspondent of the Frankfurter Zeitung reports to-day that an agreement has been reached by Germany and France on all points except one, and that the programme assures Germany's economic rights in Morocco. The brief time required for the preparation of the German answer to the French note shows, the correspondent says, how far the Franco-German understanding has progressed.

### CANADIAN MINERAL OUTPUT GROWS

Report for 1910 Shows Increase  
of \$13,209,517 Over  
Previous Year

Ottawa, Sept. 19.—The total value of mineral production of Canada during the past year exceeded \$105,000,000, an increase of \$13,209,517 over that of 1909. This is indicated by a preliminary report just issued by the department of mines. The increase is 14 per cent., a very substantial one, and according to reports should be particularly gratifying not only to those who are directly interested in the development of the mineral resources of the country, but to the public at large who indirectly profit thereby.

There has been an increased production in nearly every province, the only falling off being shown by New Brunswick, while Ontario is well in the lead with over 40 per cent. of the total for Canada. In silver products alone there was an increase of 16 per cent., this being chiefly in Cobalt, Porcupine and adjacent mining districts in the province. The net production of silver in Ontario totalled \$18,715,513.

## UNEARTH CLUE IN BANK ROBBERY

Police and Detectives Now Believe Woman Was Implicated in Case

New Westminster, Sept. 18.—In the opinion of the police and detectives engaged in the Bank of Montreal robbery investigation, there is a woman in the case, and the officials believe that they have at last unearthed a clue which may eventually lead to the capture of the robbers. It is believed that the gang rented a house or office in this city where they were located for several weeks quietly laying their plans for the coup.

The woman is supposed to have been in the work of securing accurate information regarding affairs at the Bank of Montreal. She is believed to have opened an account at the bank, in the meantime she informed herself by observation of the location of the vault and the character and volume of the business carried on and the precautions taken to safeguard the funds. How well she succeeded is evidenced by the fact that she was able to enter the bank and surprise the clerk in his room.

The officials in charge are of the opinion that the burglars with their loot are still in this vicinity, and that their capture may be effected in the very near future.

### FALLS FROM TRAIN.

Kanora, Ont., Sept. 18.—As train No. 9 was leaving Port Hope, a passenger, Miss Edith Williams, aged 18, who was looking out of the window of one of the passenger coaches, suddenly lost her balance and fell from the moving train. The train passed over one leg, and when the leg was picked up it was found to be badly bruised otherwise about the head and body. The little passenger, who was traveling with her sister to Vancouver, was placed in the Royal Jubilee hospital here. Amputation of her leg will be necessary.

### THE EVENING CHIT-CHAT

By Ruth Cameron

Suppose an engineer had a certain great weight to lift.

Suppose it took three hundred horses power of pressure to lift that weight.

And suppose that the engineer should apply fifty horse-power to fifty or seventy-five or a hundred horse-power.

Wouldn't we think he was an extraordinary foolish man?

He had wasted his power, we would say, and has accomplished nothing. He would have done better to use all his power at once or to try to do the thing at all.

And yet how many people act just like this engineer?

I am thinking of a woman who lives with a very trying elder sister.

The older woman is one of those people who make life miserable for all about them by harboring a thousand whims and caprices and cautions and irritating little prejudices and fustian.

All these things fret the younger sister to the verge of insanity, and she lives in a continual state of protest—troublesome, impatient, protesting.

She argues, she pleads, she scolds, she nags.

But never and here you catch my simile—never hard enough to do any good.

Her sister's obstinacy and self will is a weight that cannot be moved except by some great pressure.

And that the younger sister never achieves.

As a result both their lives are embittered and saddened by perpetual petty warfare without one bit of good being accomplished.

Now this is the way it seems to me. That the only thing to be done is to ease the weight.

Let the sister who is the weight refer to make up her mind that she, when she wants anything badly enough will stand firm and get it, and that when she doesn't want anything enough to fight for it she will give up and give up pleasantly.

In other words, when the weight must be lifted, she will exert the necessary amount of power and lift it, and when it doesn't she won't waste her power.

In regard to the law of obedience, Elbert Hubbard says:

"Revolt is sometimes necessary, but the man who mixes revolt with obedience is doomed to disappointment. Himself, and everybody with whom he has dealings. To flavor work with protest is to fail utterly."

There are conditions in family life which revolt is absolutely necessary.

When you are sure these conditions exist, why revolt and do it thoroughly.

"But when you know that acquiescence is wise, why acquiesce and do it cheerfully."

But don't mix the two.

At least, not if you care anything for peace in your home.

SEEK TO CONTROL  
RUSSIAN MINISTRY

Court Influences Are at Work  
—Number of Changes  
Probable

St. Petersburg, Sept. 19.—The court influences are mobilizing to control the government that shall succeed that of the late Premier Stolypin. The impression prevails that the tenure of office of M. Kokovsov, the acting premier, will be temporary. The Nationalists fear they would be set aside if Kokovsov remained at the head of the ministry. Several ministers are also out of harmony with the acting premier, and accordingly, there are numerous candidates for cabinet posts which are likely to be vacated.

M. Kokovsov is generally respected as enlightened on foreign and financial matters and a straight forward conservative in home politics. The phrase "It is to wind up the Nationalistic agitation and inaugurate a new era," is attributed to him. There is much speculation as to whether a more liberal or a more reactionary policy will be adopted.

The Novoye Vremya to-day says: "The new chapter in the history of Russia commences with the death of Stolypin. Socialism and Judaism must be taken in an iron grasp."

The Rech considers that Stolypin was big in individuality, but a political legacy.

At first sight proves that good thoughts are often best.

Rio Janeiro, Sept. 19.—The National Printing Works was destroyed by fire yesterday. Other valuable property was burned and the damage is estimated at \$5,000,000.

Spokane, Wash., Sept. 19.—"Harry Allen," a harvest hand arrested at Kootenai for selling liquor to an Indian, has confessed that "he" is Nell Pickrell, a young woman of Seattle, who for several years has persisted in disguising herself as a man. As a harvest hand she proved her ability to smoke, drink and frequent saloons, but was not able to do the heavy work required on the farm.

FIVE MILLION DOLLAR BLAZE.

Kissimmee, Fla., Sept. 19.—"We helped our friend out of this life at her own request. She was in the last stages of cancer, and was suffering and in pain, and only a few days to live."

This was the final statement given out here by Elizabeth Sears and E. B. Giespie, members of the Shaker colony, who administered chloroform to dying Sadie Marshall recently.

It was impossible to breathe at a greater height than seven miles from the earth.

It was impossible to breathe at a greater height than seven miles from the earth.

## ANOTHER NORTHERN LINE PROPOSED

Company Seeks Charter for  
Railway From Hudson Bay  
to the Pacific

Ottawa, Sept. 19.—Notice is given that an application will be made to parliament at the next session for an act incorporating a railway company under the name of the Pacific Trans-Canada & Hudson Bay Railway Company, with power to construct and operate a line of railway from Edmonton, thence northward by the most feasible route to the Arctic coast, and thence northward, northeast of Lesser Slave Lake to Wabigoon (Lake River) thence northward to a point at or near the junction of Lake River with Peace River, or at a point near the junction of the Peace River with the Mackenzie River, below Fort Vermilion on the Peace River, thence northward to Fort Smith on Slave River. Also from a point on the said railroad, near the crossing of Wabigoon River or Lake River, thence northward to the Athabasca River, thence easterly along Clearwater River and Chertville River, through the province of Saskatchewan, to Fort Churchill or Port Nelson on Hudson Bay. Also from a point on the said railroad near its crossing of Wabigoon or Lake River, westerly to Peace River crossing on the Peace River, thence westerly on the north side of the river through Laurie's Pass to Prince Rupert or the Portland Canal on the Pacific Coast in British Columbia.

CHOLERA IN ITALY.

Chiaso, Switzerland, Sept. 19.—Official statements issued by the Italian government, on the cholera epidemic in Italy, show a total of 1,290 cases and 113 deaths for the week ending September 17.

BLOODSHED IN  
STREET OF VIENNA

CLASHES BETWEEN  
RIOTERS AND TROOPS

Fighting Follows Demonstration  
Against High Cost  
of Living

Vienna, Sept. 19.—The city was quiet today following a Sunday rioting in the most determined and savage character. The mob on Sunday was especially inflamed by the appearance of troops on the scene, and although an official account states that only one person was killed by a bayonet thrust, several were wounded by a volley and about sixty injured. The real number of casualties cannot be stated definitely, but unofficial reports are that six persons were killed and more than 200 severely injured.
