

Diphtheria and Canker Rash.

PAIN-KILLER, so long used with uniform success in curing Coughs, Sudden Colds, Bronchial and Throat Affections, and so much prized by families and kept by them as a household medicine, has overcome this terrible disease Diphtheria and has effected marvelous cures.

FOR DIPHTHERIA.—On the first appearance of the symptoms of this dreaded disease, make a gargle, using two teaspoonfuls of PAIN-KILLER to a half pint of water, and gargle the throat every fifteen minutes, bathing with the medicine about the throat and neck. Accompany this treatment with an occasional dose of the PAIN-KILLER in sugar and water. If promptly applied, will invariably give relief.

FOR CANKER RASH.—Take a teaspoonful of the PAIN-KILLER in hot water, sweetened with molasses, three times a day, every other day, and a dose of Castor Oil on the alternate days.

Read the following extract from a letter from Mrs. Ellen B. Mason, wife of Rev. Francis Mason, Tounghoo, Birmah:—

“My son was taken violently sick with Diphtheria, Cold Chills, Burning Fever and Sore Throat. I counted one morning ten little vesicles in his throat, very white, and his tongue, towards the root, just like a watermelon full of seeds; the remainder coated as thick as a knife-blade. So many children have died around here, I was afraid to call a physician, and thought I would try your PAIN-KILLER for a gargle, with small doses inwardly. I did so, and found the gargle invariably cut off the vesicles, and he raised them up, often covered with blood. He was taken on Sunday: on Wednesday his throat was clear, and his tongue rapidly clearing off. I also used it as a liniment, with castor oil and hartshorn, for his neck. It seemed to me a wonderful cure, and I can but wish it could be known to the many poor mothers in our land who are losing so many children by this dreadful disease.”
