

From Mr. J. C. W. Wilkie, an old German Bible, brought to Nova Scotia in 1755 by Mr. Christian Fihlr, of Prussia.

From Dr. Almon, a collection of East India Fish.

From Judge Stewart, C. B., a very valuable Microscope, as a prize for the best Essay on "Results of recent observation on minute structure of animal and vegetable tissues, and of coals and rocks of fine grain."

From Lieut. General Sir W. Fenwick Williams, Baronet of Kars, K. C. B., Commander-in-Chief of Her Majesty's Forces in British North America, the identical Sword worn by him during the memorable siege of Kars, and also a Bust of himself.

From Major-General Sir John Inglis, K. C. B., the Sword worn by him during his no less memorable defence of Lucknow, in the recent Indian rebellion; also a lithographic engraving of his despatch, written (partly in Greek characters) to General Havelock, during the siege of Lucknow, and safely borne through the rebel hosts, to its destination, enveloped in a quill, and concealed in the hair of the messenger.

These memorials of two gallant sons of Nova Scotia, both of them now hailing this University as their Alma Mater—both, men of whom any country might be proud,—are now deposited in the same glass case in the College Library, and, no doubt, will be regarded with deep interest by every inhabitant of this Province, as well as by visitors from afar. The Governors have much satisfaction in recording these various donations to the Library and the Museum of the College, as evincing an increasing interest in the Institution, on the part of those who have left, but have not forgotten it. If each one who has been connected with the University, would thus bear it in mind in after years, and, as opportunity offers, would send some token of his remembrance, the cabinet and shelves would soon be greatly enriched, at comparatively small cost. In this connexion, the Governors gratefully acknowledge the receipt of another handsome contribution of books from the Incorporated Alumni, of the value of Twenty-five pounds, being the second within two years, from that useful auxiliary. They learn with much satisfaction, that a like sum is to be expended this year in a similar way. It is hoped that such application of their funds may be continued from year to year, to the great advantage and improvement of the Institution.

During the past year, the repairs and alterations in the College Building have been completed at a very considerable expense, but with unquestionable advantage, both to the appearance and preservation of the
