VOL. 4

APPEAL TO ARBITRATE

Soft Coal Owners Desire Same Terms Offered Hard Coal Men

New Proposal Creates Some Stir-Mitchell Replies Cautiously-Pittsburg Men Are Nearly All at Work

New York, April 6.—Interest in the labor troubles in the anthracite regions was overshadowed today by the proposal that came out of the west for the arbitration of differences existing between the soft coal operators who have not yet agreed to the 1908 scale, and their miners. The offer of the soft coal operators is identical, except where the term bituminous is substituted for anthracite, with that president Mitchell presented to the hard coal operators here yesterday.

The receipt of the proposal caused a stir, and there was much speculation as to how the miners' leader would receive his own arbitration plan for another field. He was much interested in the news, but maintained his usual silence when asked what he would do. Within an hour of the receipt of the offer from J. H. Winder, the head of the Ohio soft coal operators, Mr. Mitchell sent a reply to the effect that there was no power to act on the proposal, but that he would submit it to the international executive board of the union at its meeting at Indianapolis the week after next.

Mr. Mitchell was asked what he thought of Mr. Winder's literary ability, and he jokingly replied that he "admired it very much." Leaders of the miners who were at headquarters today did not think the international executive board would accept the proposal. A member of the board said that conditions in the soft coal regions were much different from those in the anthracite fields. He pointed out that many operators already had signed the 1908 scale, and that the number is increasing each day.

Nothing developed in the anthracite situation today to indicate clearly what the outcome of next Monday's meeting between the representatives of the operators and the union leaders would be. There was no formal meeting of the operators but most of them were in communication with headquarters.

It was reported during the day that the arbitration offer of the miners would be flatly refused, but it was denied by those in authority that a final decision had been arrived at. It was also reported that the operators may accept arbitration, but with a different sort of tribunal.

President Mitchell today concerned himself almost exclusively with business connected with the soft coal situation, and had no information to impart regarding the hard coal miners. He said his side has nothing to do now but wait for the operators' answer. It practically has been settled that if the operators refuse the arbitration offer, a call will go out at once for a convention.

Pittsburg, April 6.—Absolute peace and quiet prevails in the bituminous coal fields today. The general feeling of satisfaction is attributed to the fact that delegates from district conventions yesterday returned to their homes and explained the situation to those miners who had hesitated to return to work. All danger of further trouble is thought to be over, and by Monday, it is asserted, every mine will be in full operation.

The Pittsburg Coal company today reported that of the 11 mines operated by themselves, the Monongahela Consolidated Coal & Oil company and the Cleveland Coal and Coal company, but four were idle, one of which was undergoing repairs. The chairman, Francis L. Robbins, of the Pittsburg Coal company, said: "About 30,000 men are at work and not more than 2,000 employed in our collieries are idle. They will probably resume in a few days. Yesterday we had 20 mines idle."

RAILWAYS CONNECT.

Great Northern and C. P. R. Come to Agreement in Boundary.

(Special to The Daily News)

Phoenix, April 6.—An important matter was recently settled between the C. P. R. and Great Northern railway companies, which means a good deal to this camp in the way of assisting ore shipments, when the two companies agreed to connect their lines at Den-

ver, a point about eight miles from here and where the lines cross. This was done primarily at the request of manager T. R. Drummond, of the Dominion Copper Co., who wished to begin ore shipments from the company's Idaho mine, property that has never yet sent out a ton of ore, but which, from the slight development done, is known to be capable of a large output.

The Great Northern runs across the Idaho claim, near the railway station, but that line does not run to the smelter at Boundary Falls as yet. On the other hand, the C. P. R. reaches the smelter, but not the Idaho mine. The connection of the two lines at Denver, where an

interchange of traffic can be made, will settle the matter.

An immediate result is that work has been resumed on the Idaho tunnel, the face of which is in ore, with double shifts, while what is known as the Jersey raise from the long drift at the 250 level of the Brooklyn mine, which comes up on Idaho ground, is now being widened to a three compartment shaft, and will have machinery installed as soon as it is needed, the company's hoist from the Sunset mine, in Deadwood camp, being intended for the new shaft in due course.

The settlement of this matter between the railway companies will result in another important property being added to the Boundary shipping list at no distant date, and will eventually mean the employment of an increased number of men. The ground where the work is going on is almost within the corporate limits, the long drift from the Brooklyn mine running directly under Dominion avenue, one of the main thoroughfares.

GOSSIP OF THE CAPITAL

REVISING HOUSE OF COMMONS PROCEEDURE.

BILLS INTRODUCED BY ROSS AND MACPHERSON

(Special to The Daily News)

Ottawa, April 6.—The special committee appointed to revise the rules of the house met today. Sir Wilfrid Laurier was elected chairman. The clerk of the house, Mr. J. H. Winder, presented a synopsis of Canadian and British rule which were said to be all right except the closure provision. There was a difference of opinion as to the use of a motion to adjourn, the government members thought it should be restricted, while the opposition held otherwise.

In the supreme court today the following judgments were rendered: The ship *Norah* vs. the *King*, an appeal from the exchequer court, dismissed with costs. *Lacour v. Hannan*, an appeal from the supreme court of British Columbia, dismissed with costs. *Mill v. Yorkfield Guarantee company*, an appeal from the supreme court of British Columbia, dismissed with costs.

In the house today R. G. Macpherson (Vancouver) introduced a bill to incorporate the Vancouver, Fraser River Valley & Southern Railway.

Duncan Ross (Yale-Cariboo) introduced a bill to incorporate the Ashcroft-Barkerville and Fort George Railway. Both bills were read a first time.

Hon. Mr. Filpatrick in moving the second reading of the Lord's Day bill, said it would be referred to a special committee to consider amendments to the bill, which is not intended to facilitate or encroach on Sunday amusements. It was intended to provide for a proper regard for Sunday observance. The bill was chiefly intended to prevent exhibitions got up by organizers of carnivals and also amusements for which a fee was charged.

The report that Mr. Tarte might contest Nicolet pre-supposed that there would be a vacancy in the constituency, which, however, it is not to occur. At the general election 18 months ago, solicitor general LeMieux was elected for two constituencies, Nicolet and Gaspe. He could not make choice of his seat until the protest in Nicolet was disposed of. It is now understood that he will elect to sit for Nicolet, thus creating a vacancy in Gaspe. It is understood that his brother, Dr. LeMieux will be the liberal candidate. Had there been a vacancy in Nicolet Mr. Tarte says he would certainly not have run.

MONEY FOR GRAND FORKS.

Large Expenditure for Railway Construction.—Personal Notes.

(Special to The Daily News)

Grand Forks, April 6.—In the neighborhood of \$100,000 will be expended in building the Kettle Valley railway from the present railway depot on the south side of Kettle river to the depot located on the north side of the river. The railway track may enter the city an exceptionally long bridge will have to be built over the river. This bridge will be over one thousand feet long and will cost, including the approaches, estimated at \$100,000. In addition to this there is the building of the passenger and freight depots and the purchasing of the right of way from individual property owners, all of which money will be expended in Grand Forks during the next few months.

George A. McLeod, the well known mining man, has surprised his many friends here by arriving home with his bride, the former Miss Mary Ann McLeod. The happy couple were married in Spokane last week. They are at present guests at the Yale and will make the Gateway City their future home.

A. D. Morrison, the popular jeweller, returned home yesterday from a three months' visit to his old home near Toronto.

H. A. Sheeds, formerly chief of police here, has opened a real estate office on Bridge street.

VARSITY BOAT RACE

Odds on Eve of Event Are in Favor of Cambridge

London, April 6.—On the eve of the annual boat race, the Oxford and Cambridge races, ideal weather prevails and an interesting contest is promised.

The race will be held on the Thames at Oxford, but since they have been practicing on the Thames the Cambridge crew has been improved rapidly, and the odds are now slightly in their favor. The Oxford men have the advantage of physique

and weight, while the Cambridge crew has the better style and team work. If they are able to stay the course, are almost sure to win. Oxford's strength, however, may tell. The Cambridge brought a new boat to London a week ago, but decided to revert to last year's boat, and do not seem to have been happy in their practice.

HILL'S RAILWAY LOBBY

GIGANTIC PLAN TO OBTAIN TRADE OF CANADA MAY LEAVE CANADIAN ROADS IN THE COLD

(Associated Press Despatch)

Ottawa, April 6.—The Hill family are gathering in strength to secure further legislation by which the American railway invasion of Western Canada may be made complete. It would be idle to say that the presence of Mr. Hill's lobbyists is not causing considerable concern amongst some of the leading members in both the government and opposition benches. With apprehension, the possible consequences of this invasion, Mr. Hill's plans seem to be on a very comprehensive scale, judging from the inspired despatches from St. Paul. Once they materialize, they will sweep thousands of miles of the roads, draining the richest part of the Canadian west into foreign channels, and will eventually mean the employment of an increased number of men. The ground where the work is going on is almost within the corporate limits, the long drift from the Brooklyn mine running directly under Dominion avenue, one of the main thoroughfares.

GET AFTER BARBASTA

Punitive Expedition Sent Out to Chastise the Rebel Zulus

Natives Are Strongly Entrenched in Dense Bush and Some Trouble Will be Experienced in Rounding Them Up

(Special to The Daily News)

Durban, April 6.—A punitive expedition started from Greytown today in pursuit of Bambasta, the insurgent chief and deposed regent of the Greytown district. The country in which the troops are operating is difficult to traverse, consisting of vast tracts of dense bush necessitating continual scouting in order to avoid ambush. Bambasta is reported to have completed a number of loyal natives to join him but the report that he has 2000 followers is not believed here.

Greytown, April 6.—Bambasta, the leader of the Zulu rebels, is believed to be within seven miles of Greytown. He has only 200 followers. It is impossible for the infantry to penetrate the bush in pursuit of the rebels, but overlooking their hiding place is an immense hill, on which artillery is being placed. Natives also are prepared to tackle Bambasta in native fashion in the bush.

NEW OPPOSITION TACTICS

Hastain Practically Moves Amendment to Address

Regina, April 6.—The opposition threw a bomb shell into the government camp this afternoon when they took the unusual course of moving with a bill to amend the constitution and to amend the constitution and to amend the constitution.

NELSON, B. C., SATURDAY, APRIL 7, 1906

NO. 46

LETHBRIDGE SITUATION

NOT AS SERIOUS AS AT FIRST REPORTED.

SIX STRIKERS ARE COMMITTED FOR TRIAL

(Special to The Daily News)

Lethbridge, April 6.—The strikers have conducted themselves peaceably since Wednesday night. While the riot that night was serious, it was not nearly as bad as the reports sent to some outside papers described.

A couple of houses were badly damaged by dynamite and several strikers and mounted policemen received slight wounds in the encounter. One working miner was badly battered, but not as severely as the press despatches sent out yesterday would lead the public to believe.

Today six strikers were committed for trial on the charge of participating in an unlawful assembly and disturbing the peace. Another striker will appear tomorrow on the charge of assaulting a working miner.

TESTIMONY IS AWKWARD

DAMAGING EVIDENCE IN YORK LOAN INVESTIGATION.

COUNSEL FOR DEFENCE OBJECTS TO COLONEL DENISON.

Toronto, April 6.—Joseph Barrett, the man who got the ear of Joseph Phillips, and likewise a \$12,000 loan to develop the Southern Light Power company, was put on the stand this morning to tell what he knew about the flotation of that enterprise, which assigned before it was a year old. It had started out with a salary list of \$95 a week divided among W. H. Hill, the various capitalists as well as the president and managing director. In all some \$13,000 was advanced the power company by the York Loan.

Mr. Jones, counsel for Phillips, again objected that Colonel Denison's testimony was asking witnesses irrelevant questions.

"Do you want my opinion," asked magistrate Denison.

"No," was the reply. "I object as to your comments as I do to Curry's."

Crown attorney Curry yesterday afternoon took E. J. Burr again in hand, questioning him as to what he had done with the cheque, but he elicited very little information. Burr did not know where the money he loaned to Phillips came from, but in admitting he had netted \$17,000 from the Toronto Life, he said the money was his own and he intended to keep it.

"I think you ought to hand it over to the York County Loan," said Mr. Curry. "You will never have the opportunity of earning the same during the rest of your natural life."

"The Toronto Life built up quite a nice little business," was the witness' reply.

"You never before heard of a company that had a York Loan to fall back upon," retorted Mr. Curry. "You will never have the opportunity of earning the same during the rest of your natural life."

"That's right," said Mr. Curry. "I think the people of this country have had a sufficient lesson until a new generation has grown up that knew not of the old money."

"The crowd in the court laughed, but were called to order."

Phillips has now to go to jail in company with ordinary prisoners, the authorities refusing to allow him to go in a private car. He had a jet black when the investigation began, has now some streaks of gray, and he is pale.

BRUPTION OF VESUVIUS

Pompeii Once Again is Threatened With Destruction.

Naples, April 6.—The eruption of Mount Vesuvius is now most violent. On the Pompeii side the main stream of lava has widened into two, one threatening Ottaviano, a commune of 20,000 inhabitants, and the other threatening Torredel Greca, with a population of 20,000. The danger is becoming serious and calls for the immediate evacuation of Ottaviano. The nearest town to the crater which has a population of 8000.

Streams of lava, which are diff
