

Memorandum

With reference to memorandum of the 27th September 1910, I find on File No. 65911, the report of the late John G. Nelson, in charge of I.R. Surveys, dated the 30th of Nov. 1889 on the surveys made during that year. He states with regard to Reserve 106:-

"Mr. Ponton also visited Lac la Ronge and Montreal Lake and surveyed a reserve at the latter point for some of the Indians who last winter signed adhesion to Treaty 6. At the former Lake a reserve will probably be surveyed during the coming winter, or perhaps several small reserves, for the Indians in that vicinity who have been promised a reserve with a lake frontage of forty miles and a depth of two miles."

The field notes of Mr. Ponton's survey of Reserve 106 state:-

"Indian Reserve No. 106"

"at"

"Montreal Lake"

"Chief William Charles"

Nothing can be found on the files to show that this

Reserve

Indian Affairs. (RG 10, Volume 7766, File 27107-4 Pt.1)
