This cut shows an up-to-date Barn Construction, 40 feet x 70 feet, and the method of covering with Corrugated Sheets. The framework is light, as the corrugated sheets, when nailed in place, make the building very rigid. This drawing is made from actual plans and the barn has been built many times with splendid results.

The saving of wood sheathing, as compared with the ordinary barn construction, will cover the difference in cost between wooden shingles and our "Acorn Quality" Corrugated Galvanized Sheets.

This galvanized covering protects your building from lightning, prevents fires from the outside, is easily and cheaply applied, and OUTLASTS A GENERATION.

Do not make a mistake and put up an old style barn, when you can secure a better and more durable construction for less money.

See the page of barn illustration, in our new catalogue, and write for our book of testimonials with list of users.

### A Boot That Gives Service

WHEN purchasing boots for daily work a man must consider first how long they will wear. Second how comfortable they will be. The comfortable Amherst boot wears like iron.

To insure long wear we put in nothing but solid leather of the best grade. This secures the utmost durability.

To insure comfort we use a soft grain leather, Blucher made, on a comfortable wide last. The highest grade of workmanship removes all rough seams and wrinkles so that the feet cannot become lame or sore.

Economy, too, is a point the average workman must consider. The Amherst boot is most economical at \$3.00, delivered. It is by far the most serviceable boot in the market for steady wear. Send \$3.00 for a pair now—40-day.
