McCormick Binders

AFTER your labor and your time, careful tending, and anxiety have gone into preparing your seed bed and tending your crop all season long, you can't afford to go after the harvest with any but the best machines. Buy a **McCormick** binder.

For Western Canadian fields the **McCormick** binder is built with a floating elevator which handles varying quantities of grain with equal facility. A third packer assists in the handling of grain that is very short or full of undergrowth. The improved knottor has only two moving parts. The tops of the guards are almost level with the platform canvas, leaving no ledge where short grain might accumulate.

For these and other reasons the **McCormick** binder is efficient in Western Canadian fields. Look for the same high-grade workmanship, the same famous **IHC** quality, in **McCormick** twine and in **McCormick** mowers. Make the most of your crops. See the **McCormick** local agent for full information, or, write the nearest branch house.
