

LAME HORSES PUT BACK TO WORK QUICK

TRY Kendall's Spavin Cure. It has cured a great many horses—has put them back to work even after they had been given up. Over 35 years of success has proved the merit of

KENDALL'S
Spavin Cure

HUNTSVILLE, ONT., March 9th, 1916.
I have used a good many bottles of Kendall's Spavin Cure for sprains and lameness and I do not think it has an equal, especially in stubborn cases. Kindly send me a copy of your *Treatise on the Horse*. G. T. YOUNG.

Sold by druggists everywhere. \$1.00 a bottle, 6 bottles for \$5.00. Get a copy of "A Treatise on the Horse" from your druggist or write

Dr. B. J. Kendall Company,
Enosburg Falls, Vt.

Giant Yoke Ropes
vs.
Leather Pole Straps

A year ago when we introduced the Giant Yoke Ropes, many were skeptical of its working qualities. But a year's trial under the wear and tear of actual working conditions has proved the Yoke Ropes a better buy than the Leather Pole Strap.

A pair of Giant Yoke Ropes (one with snap and other will cost you less than half the price of similar equipment in leather). They are just as strong and will last as long. The 1/2 inch, hard, manilla rope used in this specially gives the same pulling strength as leather.

Giant Yoke Ropes, per pair, cost \$1.00 (\$1.25 per pair, west of Fort William.)

Order from your dealer, or direct. If he won't supply you, our Free booklet describes the different uses in an interesting way. Send for a copy of it.

MAKES HER OWN BROODERS

I have been breeding pure bred poultry for over twenty years. I have handled the following breeds: Barred Rocks, Rhode Island Reds, S.C. White Leghorns, S.C. Brown Leghorns, Black Minorcas, Buff Orpingtons, Partridge Cochins and Houdans. At present I am keeping Barred Rocks, S.C. White Leghorns, Rhode Island Reds and Dark Cornish. For an egg fowl and broilers I like the White Leghorn. For exhibition birds, I like the Leghorn and Barred Rocks and for an all-round bird I believe I prefer the Barred Rock first, next the Rhode Island, but in dressed poultry I think the Cornish Indian looks best as they are so filled up and plump. The Houdan makes a fine plump bird and they mature quickly but their top-knots are a drawback in this climate. The Buff Orpington, I found to be too broody and rather coarse looking when dressed.

For housing I like part cotton and part glass in the south side, and dropping boards arranged in sections so they can be taken out to wash off and scald. I use scalding water wherever I can in the chicken house, as it keeps down mites. Try a little lime in it. I don't think it is necessary to put up an expensive hen house, something to keep the frost from coming thru the roof in winter and no draught holes. Straw arranged in the roof is good. For my Leghorns I have a house with the back and two ends in a bank and the south with cotton and glass and a shed over the top that I find quite satisfactory. I use feed boxes arranged so the hens can just feed thru between the lath sides. My watering pans I have in one corner, up off the floor and a platform in front so it leaves the whole floor to scratch in. I have boxes for shell and grit fastened to the wall.

I use both incubators and hens for hatching. I like the hot water incubators best and get them with double wooden walls with an air space between. They are much better than the ones lined with painted tin or asbestos on the inside. The temperature carries nice and even and you will have much stronger chickens. An incubator running too high will cause your chickens to be dumpy and liable to scours. I hatch turkey, ducks, geese and chicken eggs in my incubators and have good luck. For early layers I like to get March hatched chickens, but April and May chickens are easier to handle. I have a room for my hatching hens. I feed and water and leave them in there until they hatch off.

Home Made Brooders

My brooders are home made, of dry goods boxes. For chickens just-hatched a box two feet square is about the best size and larger as they get older. I put a double floor, the end of the box answering for one, and shiplap set inside tight for the second, a two-light window in one end and a small entrance hole about four inches square near the window. I line the boxes with any mail order house paste board boxes, and lath cut to hold it in place. I hinge a top on the box, leaving the boards a little open for air, or put two sugar holes under the lid, one on each side. About eight inches below the lid, inside, I arrange cross pieces of wood to hold an old blanket and let it fall down inside of the window for night. With a gallon stone jug of hot water, wrapped in flannel, placed in the centre, the chicks get all round it and are quite comfortable. I have shingled the boxes on the outside and made a separate shingled top so they can stand outside any rainy day. For early cold weather they can be kept in a small heated room. I have several arranged and I like them better than brooders. I once had the misfortune of losing about two hundred chicks, first the lamp went out and they got chilled. Then on top of that the ventilation slides, thru some accident, got closed and that finished them.

I find eggs from two-year old birds hatch much stronger chickens than younger birds. I boil the eggs tested out of the incubator until hard and mash up with breadcrumbs and a little charcoal, use shell and all for early chicks, also screen wheat from the first and feed very little at a feed, but I feed often and give them milk to drink when I have it to spare, either sour or sweet.

All birds that are not fit for breeding I put in a pen and feed on soft feed to

PEERLESS PERFECTION

For the Big Ranch, or the small farm, put up a fence that will last a lifetime, that does not serve only as a mere boundary line, but one that gives real fence service—one that is built strong enough to withstand the onslaughts of stock as well as the ravages of all kinds of weather.

PEERLESS Perfection is one of the easiest fences to erect, because it stays "put." It can be erected over the most hilly and uneven ground, without buckling, snapping or kinking, or run through streams without rusting.

Every intersection is securely clamped with the famous Peerless lock.

Animals can't break through it no matter how hard their attacks. It simply can't be broken. Just springs back in shape like a bed spring. It's made of heavy Open Hearth steel galvanized wire with all the impurities taken out and all the strength and toughness left in. Will not corrode or rust. Top and bottom wires are extra heavy. Will not sag. Requires less posts than ordinary soft wire fences. Absolutely guaranteed.

Send for Literature describing and illustrating many styles. We also make a complete line of Peerless poultry and ornamental fencing and farm gates.

VANSTONE & ROGERS

North Battleford, Saskatchewan

Importers of Clydesdales, Percherons, Belgians and Hackneys

We have over eighty pure bred stallions of above breeds on hand at our barns from yearlings up. We have at least twenty over-ton stallions here, and most of the colts will mature at a ton or better. We have a few aged horses taken in exchange that are acclimated and the safest horse a man could buy. We have proven to our satisfaction that they are sure sires of good colts. We can show you the history of each one, and most of them will more than pay for themselves in a season.

Anyone wanting an exchange should write, telling us what they have and what they want. We have a fair and equitable system of exchanging. Every horse guaranteed. Ample time to responsible parties.

LIBERAL DISCOUNT FOR CASH**VANSTONE & ROGERS**JAS. BROOKS, Salesman
North Battleford, Sask.**65 CLYDESDALES 65**

We expect our new shipment of Clydesdales, consisting of about

25 Stallions
and
40 Mares and Fillies

To be ready for sale about April 1st. The shipment will comprise animals of all ages, and many of them are show yard winners or show yard propositions. All will combine size and substance with good quality.

Choice Selection of Shorthorn Bulls and Females always on hand
