Wholesale trade at Vancouver, Victoria and other districts in British Columbia has been fairly active for the season.

Payments have been well up to expectations and fewer bad debts appear to have been contracted compared with previous years.

Business generally seems to be going on a sound basis. Provincial industries are employing large numbers of men.

The outlook for trade is encouraging. General business in Manitoba continues active. Orders coming to hand, as reported to Bradstreet's by Winnipeg firms, are large and well distributed.

and generally show large increases in the demands of retailers in the country compared with previous seasons.

The seeding is finished and the indications point to a heavy increase in the wheat crop. Recent rains have improved the conditions.

The feeling in trade circles is cheerful and a big fall trade is looked for. TORONTO, May 29.—R. G. Dun & Co.'s report says: Owing to the holiday celebration the business this week at Montreal has been of a somewhat broken character.

but for the season the general demand is reported good by most wholesalers, though deliveries in some lines of heavy goods are still delayed, as it is not yet possible to remove the accumulation of freight from the wharves caused by the various strikes.

For leather there is not much present local demand, but business is expected to become more active in June, when boot and shoe manufacturers begin taking stock for fall orders.

In sole there is steady export. A large number of visiting traders have been noticed amongst the dry goods warehouses during the week.

Collections keep up well, and failures are few, only two small insolventcies being reported in the district since last report.

Business in wholesale circles at Toronto was fairly active during the week. Summer stocks of dry goods are pretty well broken up, and the season's trade is satisfactory.

There is a moderate demand for autumn goods, with the leading staples all showing an upward tendency in values.

Woolens and silks are especially firm. Price lists of cotton fabrics have been withdrawn by some of the mills, owing to the continued strength in price in raw material, which is about 2-1/2 cents per pound above the prices of a year ago.

The late rains have improved the crop outlook in Ontario, and grains are doing much better. The grass crop has benefited materially.

Hardware and building materials are in moderate request, with some improvement in the demand for harvesting implements.

In groceries there is a good trade in the leading staples, and prices rule firm. Leather is firm, with trade fair.

Butter and cheese weaker. Hog products in fair demand at unchanged prices.

Money is firm, with prime commercial paper rates quiet. The assessment of the city yesterday, which is 50 per cent of the gross assessable value.

This year, however, the gross assessable values were placed on the tax notices, and the figures looked somewhat formidable.

When appellants reached the city hall they found that their taxes were only to be levied on one-half of the sum at which their property had been valued in the assessment, and when informed to this effect, together with the ten per cent general reduction already explained, numerous objections were not urged further.

In other instances, ratepayers urged that their assessments should be further reduced, even below the valuation estimates of last year.

Various arguments were raised in support of these contentions. The court maintained, however, that where adjoining property was assessed on a parity there should be no reduction further than the general concession of ten per cent.

The ground taken in this respect was that ratepayers should shoulder the burden while the millers were quiet on the assessment, that when the city experienced the good results of the era of prosperity now dawning the valuations would be generally regarded as reasonable.

Few of the bigger property owners had their appeals considered yesterday, this task remaining for the court to consider in subsequent sittings.

An adjournment was taken at 5:30 yesterday afternoon. At the present rate of progress most of the balance of the week will be required to get through the long list of appeals.

The court consists of Mayor Dean and Aldermen Armstrong, Daniel, Dunlop and Embleton. THE TRADE OUTLOOK

BUSINESS THROUGHOUT THE COUNTRY REPORTED FAIRLY BRISK.

CROP PROSPECTS IMPROVED AND ALL CONDITIONS FAVORABLE.

TORONTO, May 29.—Bradstreet's report says: The conditions of wholesale trade at Montreal this week show a remarkable recovery from the effect of the strikes.

The movement of goods is now very active, and the congestion in many departments has been largely relieved.

The movement in general trade this week has been much better than that of previous years, and the indications are that business will continue very active for some weeks.

The sorting trade is now more active, the demand having been stimulated by the warmer weather, and the fall orders so far have been large.

The Northwest shows a larger increase than that of other parts of the country. The conditions of trade are sound and the prospects indicate further expansion.
