should be the candidate. For this reason we do not consider the unseating of Rogers a triumph for the Conservative party. If the election could be run again there would be such a triumph, no doubt, but as it is, Rogers seems to be the choice of ten more than one half of those who Is, Rogers seems to be the choice of ten more than one half of those who voted. But the same thing is true in the case of Kaulback, of Lunenburg, who has been counted out on a technical point. Equity demands that one man should be unseated for the same cause as another, and if Mr. Kaulback and Mr. Rogers are both counted out the position as between the political parties is the game as before. Nevertheless, we should like to see those hold their seats whom the people have chosen, more especially when the irregularity is not the fault of the voters.

Mining Explorations.

Sign—While the Moncton Times and other papers are howling that Sir Albert Smith never invests his money in industries to help the country, they have not done him the justice to note investments he has made in this settlement. It is only creditable to him to say, notwithing the task he undertakes to seeking out and prosecuting the parties who were guilty of bribery and corruption at the late election, he found time on Saturday to with this settlement to search out a gold mine! Sir Albert appears to have had private information as to its existence. It is reported he was disappointed it had not opened on 20th June, as had been arranged. It is understood the lead extends from Mr. W. H. Cook's, past Mr. Harley of the true discoverer, Sir Albert did not seek public attention by travelling here by the direct main post road through sackville, but reached the region of the supposed deposits by way of Momram-cook, Bonum Gould settlement, Beech Hill and Aboushagan Road. One hopes his explorations for treasure will not divert him from the object of his highest motion, viz: to put down bribery and corruption in this country.
