The "Van Galen's Manifest.

Oakland Estate Is to Have a Sidewalk on the Lansdowne Road.

Superintendent Hutcheson Points Out a Defect in the Electric Light System.

The city council were favored at their meeting last night by the presence of a lamp suspension, which left considerable deputation of ladies from the Oakland dis. slack wire for lowering the lamps for trim. of idlers. The great iron doors of many of elevation and should be more distinctive. trict, who came in support of a petition which they had sent in asking for a sidewalk on Lansdowne road. Mrs. Tippins, Mrs. Mewburn, Mrs. West, Mrs. Loye, Mrs. Besford, Mrs. Andernoch, Mrs. Manton, Mrs. Wilkinson, and Miss Wilkinson, represented the petitioners.

All the council were present with the exception of Ald. Williams.

The question of fire hall vs. sidewalk in Oakland district came up when a petition signed by N. Sabin and 35 others was read saying that though a resolution had passed the council in favor of a fire hall, it had not yet been erected. The petition also favored Mr. Clarke's property as the site for the the fire hall had not already been built since The question of fire hall vs. sidewalk in

ALD. McLELLAN would like to know why the fire hall had not already been built since the council has passed a resolution favoring its erection. He proceeded to set forth the importance of North Ward, as six main roads through it give to the people of the surround-tained that it was only the inst right of the tained that it was only the inst right of the ward to have both the fire hall and side. walk. clock.

Another petition from Oakland Estate property holders was read asking that the fire hall be built on the Mewburn property as the most suitable for the purpose.

Still a third petition in favor of the sidewalk on Lansdowne road in the same district was read.

Then came the petition from the ladies of the district asking for the sidewalk on Lansdowne road and stating that this had been asked for last April, before the fire hall had with his family to the Pacific Coast, and downe road and stating that this had been been thought of. It was sighed by Mrs. Tippins and 23 other ladies. ALD MACMILLAN moved that the ladies'

petition be granted.

ALD. HALL strongly advocated the sidewalk. He did not live in the North ward but he had been over the ground and fully recognized the necessity for the improvement. He added that it struck him forcibly that a schoolbouse was needed there too, more than a fire hall. (Applause from the ladies.)

ALD. WILSON, referring to the fire hall, remarked that the resolution in its favor had already passed the council, and he understood that the majority of people in time, and when he left Scotland for Canada,

In answer to the question whether there were funds for the purpose, Ald. Cameron stated that there was no money in the fire wardens' department to build the hall, and if it were built the appropriation would have to come out of other funds. There was money to build the sidewalk, and he thought, as Mr. Mewburn had offered to give a shelter for a fire reel free, that the sidewalk was more important than building a fire hall.

ALD. MCLELLAN would like to see all parties happy, and this could be brought about best by building both sidewalk and fire hall, if there were funds.

The prayer of the petition for the sidewalk was favored by the council, and Ald. Hall then moved that, if the fire wardens had not the funds ta build a fire hall, Mr. Mewburn's offer be excepted. This after some opposition was carried,

the Mayor giving his casting vote in its morning. favor.

give sufficient depth for the basements, if ormorant ever became a business street. The majority of the council favored the

Ald. Bragg's by law to amend the police nagistrate and legal advisers' by-law was ead a first time. The sanitary officer's and building inspec or's report declared unsanitary and con-

lemned the six buildings dealt with in Ald. Macmillan's motions of last week The buildings were therefore condemned y the council and ordered destroyed. Mr. Hutchoson, city electrician, reported

that he had considerable trouble with the lectric lines being broken by the wind. The defect was inherent in the method of ning. f breakage, and that a flexible conductor since Saturday night, has already discharged passengers and 105 tons of freight for Vic-
