PROVINCIAL FARMERS' ASSOCIATION.

By our own Reporter.

EVENING SESSION.
Riverside, Feb. 8.

The Association resumed at 7.30 o'clock, the President, Howard Trueman, in the Chair.

There was a fair attendance of delegates and visitors in spite of the late hour.

The full list of accredited delegates present were—

King—G. C. White, Col. Deer, R. McLeod, Thos. Roach, Major Aronson, A. B. Hayes.

Queen's—J. Peters, John Slipp, John McAlpine.

Albert—Alonso Stiles, G. M. Peck, Elsie Peck, Valentine Smith, Joseph McAlmon, Samuel J. Calhoun, James McLachy, C. O. O'Connell, John Bishop, W. A. West, E. H. Robinson, F. W. Watson, W. H. A. Casey.

Westmorland—Harrison Humphrey, Howard Freeman, O. R. Flowering, W. Fawcett.

After routine, the President delivered the following address:—

The tendency towards organization, which is one of the marked features of the present age, has fairly taken hold of farmers. And we have Dairy Conventions, Short Horn Breeders' Association, Grange, Farmer Clubs, and Associations. All these things, which at first sight seem to be a mere collection of farmers, are really a very real and a very powerful force.

Whether this increased desire for information is the springing up of a love of knowledge for its own sake, or whether the stern logic of events has led us to do so, we know not, but it is certain that the sharp competition in the world's great markets of to-day makes it a matter of the greatest importance that farmers should thoroughly understand the practical details of their business, and the means more than is generally conceded. But, some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

Some one may say, "You know better than I do, and you are not a farmer."

At the risk of being tedious, I am tempted to give you one illustration of what the agricultural department did for the rural population of Virginia. These people had been accustomed to the old way of doing things, and the leaves of the wild manna, which are boiled up and sent to the cities to be sold. The American manna is an inferior article, its sale value being found in the fact that it is a cheap food for the poor.

These people had been accustomed to the old way of doing things, and the leaves of the wild manna, which are boiled up and sent to the cities to be sold. The American manna is an inferior article, its sale value being found in the fact that it is a cheap food for the poor.

In view of what is being done in other countries to advance agricultural education, has not the time arrived for the Government of New Brunswick to turn its attention more decidedly in the same direction? I am not disposed to complain or to bring any charge against the present Government or any Government in this matter. I believe each successive administration of this Province, of whatever shade of policy, ever since Professor Johnston, the British Gamaliel, referred to Blackwood, was invited to report on the agricultural capabilities of our Province, has shown a strong desire to do what they could to advance the farming interest.

We have a board here in New Brunswick which the press seems to draw a good deal of comfort, one that I think we all duly appreciate. I refer to the fact that we have more miles of railroad, per capita, than any other County or State. And I see from the statistics that the number of gentlemen high in authority, the railroad extension is still to be the watchword, or the power behind the throne of the Government. While farmers as a class are speaking, ought to be the last persons to oppose opening up the country by railroads, if such roads have nothing to carry they are not the most desirable property, as perhaps some experienced farmers in this country might testify.

Anything that will add to the production of the country must increase the traffic on the roads already constructed. But to meet the point at once, if the Government have money to subsidize railroads, they can spare a few hundreds to make a start on an agricultural station in this way. We have now, and will have for the next ten years I suppose, what is called a Government Stock Farm. What I would ask the Government to do is to place on that farm a number of agricultural colleges, and in charge of it, a thoroughly scientific and practical farmer, such a man as Professor Sheldon, who as I remember, made a hurried tour through under the auspices of the Government, the fall of 1880. If this could be done, the right kind of a man secured, the farm would then become a means of education to the people, and perhaps even to the Government.
