department has issued the following cir-Some very hard stories have been circulated against the 65th battalion, lately in the United States are required to be cular: Invoices of goods purchased in bond quartered in this district, notably by the Toronto News. The first detachment of the battalion arrived here on May 1 and the last left on June 30°, so that for two solid months themselves and their actions, both officers and men, were more or less before the people of Edmonton. Putting aside the prejudice which their own officers did not a little to excite, the following facts in regard to the 65th are presented for consideration: The battalion was one of the first ordered to the Northwest. At the time the order was received it was not in full strength and had to be made up to that strength in a hurry. It started from Montreal on time, experienced most severe weather north of Lake Superior, equalled the best time made, arrived in Calgary in good shape wade a semarkably result of the case. and had to be made up to that strength in a hurry. It started from Montreal on time, experienced most severe weather north of Lake Superior, equalled the best time made, arrived in Calgary in good shape, made a remarkably rapid as well as dangerous march to Edmonton, and arrived here in excellent health and spirits. Here the battalion was broken up, part going to Viotoria by team, part remaining to garrison Forts Edmonton and Saskatchewan, and part taking the back track to garrison posts on the trail. The men sent south worked like beavers and erected fortifications which were of use to themselves and of value to the country; the men remaining at Edmonton and Fort Saskatchewan behaved with propriety and credit to themselves and all connected with them. The men sent to Victoria were there transferred to the scows and went in them to Pitt, willingly helping the boatmen at the oars, always cheerful and contented, shirking no duty. When ordered into action all reports agree that they went in without flinching, with as good a heart as the best of our volunteers. That the battalion was not given the best show possible, and that it did so well in the various circumstances

While the Bulletin was quick to resent encroachments by officers of the battalion, who failed to sink the politician in the soldier, simple justice demands that we speak of men as we find them. It is most unpleasant to any one who wishes well to Canada to see men who, by their action in helping with the burdens and sharing the dangers of the rest, were contributing towards its welfare, grossly maligned as have been the men of London, Aug. 2.-A conference of the

club has also given the combatants the cold shoulder since their unseemly battle. The project of a duel between the two noble lovers is again revived as the only means by which they can relieve themselves of the odium incurred by both in resorting to prize-ring methods to settle their jealousy.

A Fraitful Season.

The fruitful season of the year is prolific with many forms of bowel complaints, such as diarrhees, dysentery, colic, cholers morbus, cholera infantum, etc., as a safe-guard and positive cure for those distressing and often sudden and dangerous attacks nothing can surpass that old and reliable medicine, Dr. Fowler's Extract of Wild Strawberry.

THE SOANDAL SETTLED.

Catarrh is a muco-purulent discharge caused by the presence and development of the vecy etable parasite in such as uncoba in the internal lining membrane of the nose. This parasite is the simplest living form known that lives upon organs and is only developed under favorable circumstances, and these are: Morbid state of tubercle, the germ poison of syphilis, mercury, toxomea, from the retention of the effete matter of the skin, suppression, perspiration, bedly vanilated sleeping apartments, and other poisons keep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fances, or back of the throat causing ulceration of the throat; up the eutstachian tubes, causing deafness; burrowing in the vocal cords, esusing hoarseness; usurping the proper structure of the bronchial tubes, ending in pulmonary consumption and death.

Many attempts have been made to discover

Sir Charles Dilke's Check Accepted for a cure for this distressing disease by the use of inhalents and other ingenious devices, but none of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucus tissue.

Some time since a well known physician of forty years' standing, after much experimenting, succeeded in discovering the necessary combination of ingredients which never fail in absolutely and permanently eradicating this horrible disease, whether standing for one or forty years'. color to the hair, and the scale, are innumerable.

Old people like it for its wonderful power to restore to their whitening looks their original color and beauty. Middle-aged people like it because it prevents them from getting bald, keeps dandruff away, and makes the hair grow thick and strong. Young ladies like it as a dressing because it gives the hair a beau-tiful glossy lustre, and enables them to dress it in whatever form they wish. Thus it is the favorite of all, and it has become so simply
