ORNITHOLOGICAL NOTES. By W. T. MACOUN.

The local bird notes for this month are held over in order that the above table of records may be published. This table gives the dates of arrival of fifty-six species of birds, most of which were observed at London, Toronto and Ottawa, and as the majority of them were probably noticed soon after their arrival the comparison of records is interesting. A similar table giving the dates of arrival of fifty-one other species was published in the June number, with the names of the observers. These month the London notes were, at the request of Mr. W. E. Saunders, furnished by Mr. J. E. Keays.
