

Exhibiting the Effects of the DECALCIFYING TREATMENT in the case of TYPHOID CONVALESCENTS possessing UNDUPLY COAGULABLE Blood.					Content of Blood in Calcium Salts: concentration of ammonium oxalate solution which when added in equal volume to the blood respectively averted and failed to avert coagulation.						
Initials of Patients.	Date of observation.	Notes with regard to dietary and treatment.	Notes with regard to clinical symptoms at date of observation.	Blood coagulation time in tubes at 18.5 °C.	1	1	1	1	1	1	1
