of Cases treated for Rheumatism, Rheumatic Gout and Rheumatic Arthritis of the Ankle Joint are Flat-Foot.

The introduction of the improved Instep Arch Supporter has caused a revolution in the treatment of Flat-foot, obviating as it does the necessity of taking a plaster cast of the deformed foot.

The principal orthopedic surgeons and hospitals of England and the United States are using and endorsing these Supporters as superior to all others, owing to the vast improvement of this scientifically constructed appliance over the heavy, rigid, metalic plates formerly used.

These Supporters are highly recommended by physicians for children who often suffer from blat-foot, and are treated for weak ankles when such is not the case, but in reality they are suffering from Flat-joot.

IN ORDERING SEND SIZE OF SHOE, OR TRACING OF FOOT IS THE BEST GUIDE.
