(New Fork Times)

Nearly forty years ago a young man, of unusual endowments, began to mould public opinion upon a subject of vital importance. Like all pioneers, his early efforts were unsuccessful, but his ability and the value of his work soon won public confidence, and to day, there is not a village or hamlet in the country that has not been influenced by Dr. Dio Lewis. When therefore it was learned yes: terday that he contemplated the establishment of a large magazine in this city, the fact was deemed so important that a representative of this paper was commissioned to see him and ascertain the truth of the rumor.

Dr. Dio Lewis is a gentleman of sixty years and two hundred pounds, with snow white hair and beard, but probably the most perfect picture of health and vigor in the metropolis. He is a living exponent of his teachings, and notwithstanding the amount of work he has already done, promise, etill greater activity for years to come. He received the inter-; viewer most courteously, and in reply to a question said:

"It is true I have come to New York to es tablish a monthly magazine. I have come here for the same reason that I went to Boston 25 years ago. Then Boston was the best Europe for manuscripts and early editions, and platform in the country from which to speak an immense amount of material was thus acof education. New York has now become most hospitable to progressive thoughts, and especially so to movements on behalf of physical training.

"I have reason to know the great and abiding interest of the American people in this cently that the first volume, to be followed by subject. They have come to realize that the three others, of Bonaventura's Commentary future of our country pivots upon our phy- on the Sentences has appeared. The publisical vitality, and especially upon the vigor cation of the remaining works will be carried of our women. My new magazine will bear on regularly. In appearance, as well as in the title Dio Lawis's Monthly,' and be de- scholarly editing, the Franciscan Bonaventura voted to Sanitary and Social Science. I hope through its pages to inaugurate a new departure in hygiene"

"Have you not written several books on the subject?"

"Yes, nine volumes, and some of them like 'Our Girls,' published by the Harpers, have had an enormous circulation, but the best work of my life I shall give the world in the new magazine. Forty years in skirmishing | pointed to be held in the sixteenth district of ought to conclude with ten years of crganized warfare."

" Doctor, what is the occasion of this new interest in health questions?"

"It has come through suffering, which scems the only road to self knowledge. The trouble, happiness is gone, and then people give attention to their health."

"Which of these organs is most frequently the victim of our errors?" asked the Re-

"Within the last few years discases of the kidneys have greatly multiplied. When I was engaged in practice, thirty-five and forty half the number of votes cast, the election is years ago, serious disease of the kidneys was rare; but now distressingly frequent and

rather than in a ton of cure." " But have you noticed the remarkable tes-

timontals of Warners's remedy?" "I have, and confess that they have puz aled and setonished me. The commendations

of proprietary medicines usually come from unknown persons residing in back counties. But I see in our most reputable newspapers the warmest praise of Warner's Safe Cure, from college professors, respectable physicians and other persons of high intelligence and character. To thrust such testimony acide may be professional, but it is unmanly. No physician can forget that valuable additions to our Materia Medica have sprung from just such sources. I was of impressed with this cloud of witnesses that I purchased some bottles of Warner's Safe Oure at a neighboring drug store, and analyzed one of them to see if it contained anything polsonous. Then I took three ci the prescribed doses at once, and found there was nothing injurious in it. I do not hesitate to say that if I found my kidneys in serious trouble, I should use this remedy, because of the hopelessness of all ordinary treatment, and because when a hundred intelligent and reputable persons unito in the statement that a certain remady has oured them of a grave malady, I choose to believe that they speak the truth.

"But as you may know, my great interest in life lies in prevention. For forty years I have labored in this field. One of the phases of my work in New England was the establishment of the Ladies' Seminary at Lexington. Mass. My aim was to illustrate the possibilities in the physical training of si-lo Auring their school life. This institution bename bafors I left it, the largest and most and managed by one person, in our country. I sat down to dinner every day with a family of two hundred reasons. The remarkable resuits of this muscle training among girls, were given in my paper published in the North American Review of December, 1882.

"Besides, I established the Normal Institute for Physical Training in Boston, and for ten years was its President and Manager. Dr. Walter Charning, Dr. Thomas Hoskins, Professor Lennard, and others were among its Society. teachers, and more than four hundred persons -took its ciploma and went out into all parts of the hand to tenan the new school of gymnastics. And now the years left to me I propose to devote to the magazine which I have come here to establish. It will be the largest periodical ever devoted to this field of 61 bours per day. of literature, and will present the hundred and one questions of hygiene with the simplicity of a child's talk. To this and all sccalled learning will be subordinated. The magazine will be more or less illustrated, and will atrive to reach a high place in the confidence and hearts of the people. In a few wacks our first number will appear and we shall fondly hope for it a hearty welcome."

And it is capsolally significant. and proof positive of a rare merit that a propristary medicine, even with such high standing as Warner's Base Cure is known to have, should be endorsed and recommended national renown as D. ### OATHOLIC NEWS.

P. Causreque, a French Catholic mission-

ary, has puplished a French Grammar in Malagasy.

It is reported that the Pope's protest to President Grevy regarding church matters in France took the form of a personal letter, and is regarded as a warning of the highest importance.

The Holy Father has selected the Very Bay. Dr. Carr, the learned Vice-President of Maynooth College; for the Bishopric of the united dioceses of Galway, Kilmacduagh and Kilfenora. The Vory Bev. Father, upon whom His Holiness recently conferred the degree of Doctor of Divinity, has been voted Dignissimus by the clergy. His Lordship is a native of the archdicesse of Tuam, where he had been for some years on the mission previous to his return as. Dean and Professor to the great college where his career as a student had been so distinguished, and which, under the presidency of his class-fellow, the Very Bay. Dr. Walsh, he has governed as Vice-President for the past few years. The great critical edition of St. Bonaven-

tura, upon which the Franciscan Fathers have been so long engaged, is at length ready for the press. Preparations were begun under the direct superintendence of the General of the Order, more than twelve years ago. A systematic search was instituted throughout Europe for manuscripts and early editions, and cumulated. The reope and the plan of the projected edition were elaborately described as far back as 1874 by the chief editor, Father de Fauna; but the progress of the undertaking was delayed by his death, and it is only re-

will be a worthy rival to the sumptuous Thomas Aquinas now being brought out at Rome under the special patronage of the Holy Father, the first volume of which has lately been issued from the Propaganda press .- Catholic World.

A great triumph was achieved by the Catholic cause in Parls last Sunday. A fortnight previously an election had been ap the French capital for a member to represent that district in the Lower House of the French Parliament. M. de Bouteiller, the Radical and infidel candidate, a man who is stated to have been kicked out of the navy some years since for "indelicate actions," stomach, heart, kidneys or liver fall into headed the poll on that occasion with 2,587 votes, M. Calls, the Catholic candidate, designated as a "Legitimist," came next with 2,309 votes, and M. Thulie, the milk-andsugar Radical, was No. 1 from the bottom with 2299 votes. The French law enacts that if a candidate does not secure an absolute majority-that is to say, one vote over one void, and must be renewed a fortnight after, when he who heads the poll becomes the member elect by right. Therefore, a repetition of the proceeding was held on Sunday. Passy is a fashionable suburb, and the respectable classes were dead against the candidate of rascality. Many of the moderate Republicans kept away from the polling booth, and others voted for M. Calla, who was thus returned at the head of the poll by a mejority of 3036, against 2999 polled for M de Bouteiller. Tais is a crumb of comfort fo, those who look upon the present state of things in France as distressing.

Mgr. Ootton, Bishop of Valence, in France, does not mean the priests of his diocese to be deprived of their stipends with impunity. He has ordered that in those parts of his diocese in which the pay of the priests has been stopped because they objected to the use of infitiel text books in the schools, the whole of he aphlic warshin is to be sto ned likawisa This is purely and simply self-defence. The French people have contracted with the Catholic Church to pay its priests certain stipends in return for spiritual services rendered, and what these stipends amount to can te seen from the official schedule, of which we give the subjoined translation :-"There are 31,103 deservants or assistant priests in France. Up to the age of sixty years they receive from the State a salary of from £36 to £40 per annum. From 60 to 70 they get £44, from 70 to 75 they receive L48, and not until they are past 75 years do they receive as much as £52 a year, or £1 a week." There are some priests who administer two parishes, and who in consideration of such services, receive an extra allow. ance, called binage, of £8 a year. But those who thus manage to get as much as £60, provided they are over 75 years old, are few and far between. Mgr. Cotton's plan of resenting the injustice done to the parochial clergy is likely to be adopted by other French Elshops us well.

Theregiter the Hospital boys and. the children attending the outdoor schools, numbering about 5,000, sssembled on the green to the north of the institution, where they were briefly addressed by the Lord Provoit. The governors then adjourned to the council room, where they drank from the loving cup to the memory of George Herlot.

THE GLEEDALE CROFTERS -Our Portree correspondent states that several of the Glendale tenants paid their rents to the Rev. Mr. M'Pherson on Saturday last. It is also stated that a considerable part of the disputed hill of Wate stein has been given to the crofters. The Rev. Hugh Macpherson, who is about to succeed to the Glendale estate, has been liv-ing in the district for a month back, and inquiring for himself into the condition of the people. The result is that at the end of last week Mr. Maopherson agreed to give the people a large portion of Waterstein, the grazing which they have been anxious to get during the past year, and a wire isnee is to be put up by the proprietor without delay. The crofters on their part have paid their rents, and thus the Glendale difficulty may, it is hoped, be now regarded as at an end, so far as the Macpherson estate is concerned.

WASHINGTON, June 23. - A committee waited upon the President today, by appointment, to present to him the resolutions Alexander Sullivan, Bernard Callaghan, Thomas Lynch, Ray. Father Dorney, and Michael Kelley, of Chicago; P. H. Kelly, of St. Panl; Mr. Dawson, or Minne. sota; Eugene Kelley, and others, of New York, and prominent Irish Americans from all over the United States. The delegation was secured in response to the following letter, which was sent to the noted Irish citizens of this country:

"At the Convention of the Irish race rethe United States the enclosed resolution for months. time and place for the reception of the resolution. I have the honor to invite you to accompany the executive of the Irish National Lergus for this purpose. The occasion, I used not add, is one which can be made of manity demands that we render it potential and effective.

"ALEXANDER SULLIVAN, President." After hearing the statements of the deligation, the President replied as follows: -The subject you present will receive my careful cousideration. It has already been under consideration by the secretary of State. Correspondence in regard to it has been had with our diplomatic and consular representa tives and an investigation into the facts is now being made by them. It is, of course, proper that this Government should accertain whether any nation with which it holds amicable relations is violeting any obligation of international friendship before calling attention to any such matter. In the meantime the law provides that officers of the Treasury shall examine into the condition of passengers arriving as immigrants at any part of the United States, and if there should be found any convict, lunatic, idiot or any person un ble to take care of himself without becoming a public charge, they shall report the same in writing to the Collector of Euca port, and such person shall not be permitted to land. The investigation will be thorough and erbaustive on this side of the Atlantic and on the other, and in the meantime the law will be strictly enforced.

GROCERIES .- The grocery trade has been quiet, between city jobbers, although a fair business has transpired on country account. In engars we hear of sales of yellows at 65c to 75 as to quantity, and granulated is fi:mly held ac 8%c to 90 for small lots, and 8%o for 100 bbl. lots and upward. The market rules dull. There is very little doing in raw sugar, the only sales we hear of being in some very fine grocery Barbadoes at 610 to 7c. In teas the only feature of any importance is the sale of new crop Japan tea at 431c. Coffses are in reference to the treatment of frishmen by steady as last quoted, and spices rule firm. England. ## MONTREAL HOBSE MARKET. .

There is a good demand for all classes of desirable horses, but not a sufficient quantity to supply the want of the trade. Mr. Kimbal sold one bay herse for \$150, one gray horse for \$135, one bay horse for \$130, one chestnut horse for \$120, and received from Upper Canada two very fine pairs of dapple greys. Mr. Maguire of the College street. market soid on the 18th inst., one brown mere, weight 1,200 lbs, for \$265, one bay pony veighing 1.030 one grev mare, 5 years, weight 1,025 lbs, for \$250, one bay mare, 7 years, weight 1,200 lbs, for \$200, one bay mare, 4 years, weight 1,010 lbs, for \$150, one bay mere, 4 years, for \$150.

## MONTREAL CATTLE MARKET.

MONTREAL CATTLE MARKET.

The receipts of shipping cattle were not large. Choice cattle are strongly held with sales up to fic per lb live weight. Mr. James Mothane, M.P.P. was the chief byyer, purchasing over 150 head at from 5/c to 6/c, as to quality. Other sales were made at within that range. Cable advices from Liverpool report the market a shade off at 8d to 8/d. Viger market was rather thinly supplied with butchers' stock, only about 100 head being offered. The quality averaged poor. No really choice cattle were offered, and for such 6/c would be readily paid. The demand was quiet and slow at from 4c to 6c. Calves were firm at from \$3 to 800 each. Lambs were in good demand at \$250 to 400 each. Live hogs sell at 7c to 7/c per lb.
