

TABLE OF CONTENTS

CHAPTER 1 — BASIC ISSUES	1
A. Global Warming Is Real And Serious	1
B. We Must Consider All Greenhouse Gases, Not Just Carbon Dioxide	9
C. Canadian Greenhouse Gas Emissions In A World Context	13
D. Global Warming Is Much More Than An Environmental Problem	17
E. Tackling The Growing Problem Of Global Warming Requires A Recognition Of Future Energy And Development Needs, In Canada And In The World As A Whole	18
F. The Report Is Concerned With Limiting Global Warming, Not With Adapting To It .	20
CHAPTER 2 — POLICY CONSIDERATIONS	25
A. The Need For Leadership By The Federal Government	25
B. The Need For Better Information	26
C. Energy Efficiency Should Be More Important In Canada Than In Other Countries, And Must Be Our First Priority	27
D. In Assessing Existing Energy And Energy Alternatives, Knowledge Of The Full Costs Involved Is Essential	33
E. We Can Make Substantial Progress In Reducing Greenhouse Gas Emissions If We Understand How People Behave	37
F. Canada's Envidable International Reputation On Environmental Issues Is Threatened By An Apparent Reluctance To Act On Carbon Dioxide Emissions	39
CHAPTER 3 — TARGETS FOR EMISSIONS REDUCTIONS	45
A. The Need For Effective, Realistic, And Specific Targets	45
B. Targets For All Greenhouse Gases	45
C. Defining The Task: A Choice Among Scenarios	46
D. Prospects For The Next 10-15 Years	48
E. The Need For A Global Commitment	49
F. Start Now	50
CHAPTER 4 — ACHIEVING THE TARGETS: A STRATEGY FOR THE 1990S	53
A. Introduction	53
B. Chlorofluorocarbons And Halons	54
C. Methane	55
D. Carbon Dioxide	56
E. Can These Short-Term Objectives Be Achieved?	69
