Heavy Cash Sales.

At the ensuing decline, some investment demand developed, and the reaction which followed assumed the nature of a bulge when just before the close announcement was made that cash sales here amounted to 500,000 bushels and that vessel room had been chartered to load and hold 300,000 bushels more. Between the opening and the close, May fluctuated from 39% to 51, closing at the last named level, a gain of 1-16 as the final outcome of the session.

Corn and Oats Irregular. Shorts evening up for the week off-et corn depression due to belief that

owing to less severe weather there would be a lively movement of the crop in the next few days from the farms. May ranged from 64½c to 64%c, with the close steady at 64%c to 64%c, the same as 24 hours previous. Eastern demand for cash corn was slim.

Oats showed considerable activity. Despite the fact that the close was irregular, the market in a general way followed the course of corn, declining at first and then being rallied on purchasing by shorts. Outside limits for May were 48%c to 49%c, with last sales 49%c, a net loss of a shade.
