Bob Ingersoll Identified With Spokane Smelter Scheme-About the Athabasca.

River Mining-Mining Exchange.

The Rossland Miner is out with a long and strong editorial upon the policy of the Canadian Pacific Railway in British Columbia. nadian Pacine Railway in British Columbia.

It accuses the big road of doing all it can ren, strong; sick children, to prevent the erection of smelters in the stern province, its object being to obtain the long haul of silver-lead and other pres to the American smelters in preference to the short hauls it would enjoy we British Columbia itself. openly says that Sir William Van and that these promises are simply made in order to prevent other capital from con mencing such enterprises. The C. P. R. in other words (so says The Miner) has spent a few thousand dollars on the Trail smetter and promised to spend more in the Boundary country in order to frighten away opposition capital; the C. P.R., by such means, is able, with its great prestige, to intimidate all opponents and retain its long haul privileges—thus filling its coffers at the people's expense.

Bob Ingersoll and Spokane. Bob Ingersoll and Spokane.

ome time ago The World noted that he instigation of Jim Hill of the Great thern Railway, an effort was to be made make Spokane, Wash... a smelting cenwith a view to securing the ores of thern British Columbia for treatment hat point. It is now stated that Col. ert G. Ingersoll, the famous infidel, is tified with the move. As long ago as a man by the name of Henry B. Cliferected a smelter within five miles of kane, with the idea of treating the ores he Coeur d'Alene country, but owing his inability to secure proper railway ice, the promoter never succeeded in ing his plant blown in. Ever since the leter ha sstood idle, and now it turns that Col. Ingersoll has a \$25,000 mortice upon the property, and it is because this claim that he is interested in the to rehabilitate the smelter, and, with a sasistance, make Spokane a centre the reduction of the Kootenay ores.

About Athabasca.

The following letter speaks for itself:
Messrs. Hall & Murray,—In reply to your
enquiries as to my recent trip to—England,
I am glad to say that the English shareholders are much pleased with the results
thus far attained in the handling of the
Athabasca, and have the utmost confidence
in the future operations. I am also glad to
be able to say that the company's business
in England is being managed very satisfactorily. The expenses of the head office
there are slight, but the management (although economical) is thoroughly capable
and can be depended upon to do everything
possible to advance the interests of the
shareholders, Canadian as well as English.
A settlement has been obtained from the
London Stock Exchange on the stock, which
has been already issued to the English holders, and this is an important point, for
without a settlement it is practically inpossible to sell shares in England. Owing
to the Canadian shares not having been
issued it was impossible to include them
in the settlement obtained, but as soon as
the exchange of shares of the existing
Canadian company for those of the
new English company is completed, a
settlement for them will be applied for,
which will undoubtedly be granted. Arrangements were completed while I was in
London for this exchange, and the necessary certificates and books were being prepared when I left there for transmission
to the Canadian office at Nelson, B.C.
Holders of the Canadian shares should
therefore forward their certificates to E. Golden Star, to the Canadian office at Nelson, B.C. Holders of the Canadian shares should therefore forward their certificates to E. Nelson Fell at Nelson for exchange as quickly as possible, so that the settlement rice at 17 shillings and 6 pence, but transactions have been put through at 41, and when I left London the brokers' quotation of the property and their continuous and that they have pen put through at 41, and when I left London the brokers' quotation of February being such a cold month and and that they have got the drift in time of February being such a cold month and and that they have got the drift in the cold in the steam will not reach it to work the drills properly, and they will have to wait until the compressor plant is Installed (which will be done just as soon as the worther permits) the directors thought it will be done just as soon as the worther permits the directors thought it will most certainly come in a very short time. When dividends are commenced in vestors may depend upon them being maintained with regularity. have been wonderfully good, and it is estimated that ore to the value of nearly (fit not fully \$1,000,000 has been proven on No. 2 ledge alone. The manager, under date of March 2, says that in the last 75 feet of the tunnel it work will good, and it is estimated that ore to the value of nearly (fit not fully \$1,000,000 has been proven on No. 2 ledge alone. The manager, under date of March 2, says that in the last 75 feet of the tunnel it work will good, and it is estimated that ore to the value of nearly (fit not fully \$1,000,000 has been proven on No. 2 ledge alone. The manager, under date of March 2, says that in the last clean-up showed upwards of \$20 per ton saved in the mill and concentrates. An extra vanner is now working, and a compressor plant will be put in their development will prove the province of the ledge at that time gave \$11 per ton, and the last clean-up showed upwards of \$20 per ton saved in the mill and concentrates. An extra vanner is now working, and a

Belleville Men for Atlin. A Belleville, Ont., advice says: "Mr. David Moran of Crofton, Prince Edward County, and party, consisting of Messrs, Godwin, Parliament, Huff, Burr, Jiles, Cole, Young and Higgins, left here on the 6 a.in. train en route for Atlin City, B.C., their object being to invest in the gold mines. They go by way of Chicago, and the trip will be only a week's duration."

Hill Top, Grand Prize, Mayflower. Hill Top. Grand Prize, Mayflower. Editor World: Will you, in mining column, please let me know as to the following: In mining stock reports, Hill Top, Grand Prize and Mayflower do not appear. What I would like to know is why they are not in the list, and what is to be assumed when a stock is missing from list; also if above stocks have any value at present. By answering you will confer a favor on many who do not quite understand it. John Schrieber.

Niagara Falls.

The absence of a stock from the Mining

Niagara Falls.

The absence of a stock from the Mining Exchange list does not necessarily condemn it. The only stocks quoted are those actively dealt in on the local market. As for the three mines above mentioned they lie in the south belt of Rossland camp, which has so far not turned out any great mines. Hill Top and Mayflower have not been worked for a couple of years, while Grand Prize is an undeveloped prospect adjoining Deer Park, which latter property has so far proven a great disappointment to its owners—Editor.

Mines in the Lower Seine. Mines in the Lower Seine.

Editor World: Looking over the letter written and signed by J. Hobson, in your issue of yesterday, reminds me of events of two years ago, when I explored all through that country for a certain mining and development company organized in this city, and who did not seize the best chances they ever had in the mining world. I cannot let this opportunity pass without stating plainly that if Toronto capitalists and mining syndicates would turn their attention to that one district, which has not had anything like the attention it deserves from Canadian investors, they would be repaid. I feel perfectly confident that under proper and careful management nothing in mining in the whole Dominion will

G. P. R. AND B. G. SMELTING When the children are hungry, what do you give When the children are them? Food.

> When thirsty? Water. Now use the same good common sense, and what would you give them when they are too thin? The best fat-forming food, of course. Somehow you think of Scott's Emulsion at once.

For a quarter of a century it has been making thin children, plump; weak child-

Reports of MR. T. L. PARKER, Placer Mining Engineer, of the Telford party. Mr. Parker writes from Brewer Creek, 2nd

October, 1898, as follows: "Since writing you last, Brewer Creek has taken a boom Dawson City, and no doubt ere you receive this the name ill be familiar to the outside world as the Bonanza of the Stewart River. 'Tis safe to say that we have the best pros-

stewart Myer. Its saie to say that we have the best prospects of any creek discovered so far this year in the Yukon, and to prove this we have other practical mining men located on this Creek who came to us to winter, saying they see nothing so good as we (the Telford party) have in this country, they having been on Henderson, Black Hills and the McOuntry.

On claims adjoining the above they have gone down 14 feet, 3 feet pay dirt and gold washed out very coarse, so far E.,

feet, 3 feet pay dirt and gold washed out very coarse, so far ranging from the size of rice to pieces going 35 cents.

In his letter of the 5th December, 1898, Mr. Parker writes that the Brewer Creek and Thistle Creek localities were practically of the same formation and good for a square of twenty-five miles. He is confident that these locations would turn out the richest and most satisfactory in the Yukon. Coarse gold in size from rice to beans was being taken out.

In his letter of the 26th December, 1898, Mr. Talkara

"I went over the work already done on the claims on Brewer Creek, and am very well pleased with the prospects so far. The discoverer, Mr. Brewer, showed me his work and the gold taken out, and from appearances of everything the Creek should prove a very good thing. A party of Australian miners are working claims between our locations. I told you in my last letter about sending Dr. Robertson and Myers to Dawson. About the time of their departure from the mouth of the Stewart, one of the richest strikes so far in the Yukon was made, Thistle Creek, 20 miles above Stewart on the Yukon, so they went up and staked No. 29 and 30 on Blueberry, one of the creeks running into Thistle and reported the best prospect in the Yukon. This Thistle is reported one of the richest strikes ever made on the Yukon. It was discov. ered by four Scotchmen. The gold is in pieces as big as beans, and some pieces go \$5.00 and more. Telford Creek is coming to the front; the whole Creek is now staked. Only

three claims are being worked." Coarse gold in size from rice to beans was being taken out.

In his letter of the 26th December, 1898, Mr. Telford reports on the Thistie Creek region that \$20 to the pan was the showing there, and that this region could be called the New Klondike, of which Stewart would be the mining centre, pushing Dawson City hard for importance.

In his letter of February 15th, 1899, he says: I left Telford yesterday, and arrived here last night at Stewart City. We have not reached bed rock on Telford Creek yet, but expects to have two shafts down by first week in March. I washed a pan of gravel, taken out three feet from surface, last Monday, and found small pleces of platinum, some very fine gold and magnetic iron, the balance of pulverized quartz. Brewer Creek we left alone, as the claims below us were sluicing out coarse gold last summer, and we know they are all right.

Barker Creek is being prospected by some friends of mine, and directly they locate I will be informed, and will secure as many claims as possible. At present we hold two there.

As I told you in my last letter, I intend taking as many of the boys up to Blueberry Creek soon, and getting out a pay dump.

A friend of mine sold his dump for \$500 on Brewer Creek, and the purchaser washed \$30,000 out of it.

Re the Dawson property: I have had no late news from Dr. Robertson. He states in his last letter that he refused \$10,000 for the Hunker Bench claim, and, from information received from Mr. Morley Oglivie, the Hunker Bench claims are very valuable.

\$10,000 for the Hunker Bench claim, and, from information received from Mr. Morley Ogilvie, the Hunker Bench claims are very valuable.

The latest news from Blueberry is \$6.30 to the pan on Claim No. 27 (our claims are 29 and 30). Above us, on No. 43, very coarse gold has been found.

The capital stock of the Company is \$250,000, divided into 250,000 shares of one dollar each; 150,000 of these are treasury shares, to be devoted to development and other business operations of the Company. The other 100,000 shares have been allotted to the promoting syndicate and members of the expedition as below. Of this last number 50,000 are Founders' shares, which are to rank with ordinary shares until in any year a dividend of 20 per cent. shall have been paid on all the shares, leaving a surplus of profit over the dividend. This surplus of profit will be divided into two equal portions between the holders of the Founders' shares and the holders of ordinary shares.

The only contract affecting the Company is with the promoting syndicate and members of the expedition, whereby they agree to transfer and turn over to the Company is claims located, and the whole benefit of the expedition in consideration of 65,000 shares of the capital stock divided amongst the members of the expedition and 35,000 shares divided amongst the promoting syndicate. The public will observe that the promoters are taking the same chances with them in the success of the enterprise. Notwithstanding the considerable expense which the promoters have incurred they are not selling out to the Company for a cash consideration, but are satisfied to take shares.

MINING INFORMATION. From letters received from the Manager and Engineer of the Telford Syndicate. the panning averages \$1.50 per pan in coarse gold, by means of "under-currents," the fine gold, which is always in higher percentage than the coarse gold, will be saved. Taking \$1.50x26-\$39 per ton. A party of 10 men can get away into 10 tons a day easily with the primitive methods in use, viz., short sluice boxes, "long-toms" and "rockers," \$39x10-\$390 per day; wages per day, 10x\$10-\$100. \$290 daily profit x30-\$8700 per month, at a conservative estimate. To anyone familiar with placer mining,

this will appear a small saving on ground that runs from \$1.50 to \$4.25 per pan. One cubic yard—1 1-3 tons gravel, I miner's inch of water will wash 3 tons per day. (The working day during July, August, September in the Yukon is practically 24 hours.) 1 miner's pan of gravel weighs from 75 to 110 lbs. Taking the lowest pan weight gives 26 pans to the ton. Placer mining in California, Idaho, Montana, etc., pays at 6 cents to the ton; in some cases as low as 4 cents.

Applications for shares should be made to Messrs. Parker & Co., 61 Victoria St., Toronto, or in accordance with the forms in the prospectus, and send with the required deposit to the Bankers of the Company, Toronto, April 4, '99.

## Telford-Yukon Mining Company, Limited. FORM OF APPLICATION.

To the Directors of the Telford-Yukon Mining Company, Limited, 61 Victoria Street, Toronto:
