DISCOVERY OF SILVER ORE SAID TO BE MADE FAR MILES FROM CITY

Harold A. Murphy Finds Deposit on Family Lands Near
Coldbrook—Geological Survey Sends Favorable Re-
port on Specimens Submitted to Ottawa

AN IMPORTANT discovery of high grade silver ore has been made near Coldbrook and steps are being taken to investigate the extent of the deposit. The discovery was made about a month ago by Harold A. Murphy. Mr. Murphy declined to state the exact location of his find but said that it was on land belonging to the family. He made no announcement of the discovery until yesterday when word arrived from Ottawa that samples of the ore had been assayed and been found to be of excellent quality.

MAKES DISCOVERY.

Mr. Murphy was out for a snowshoe tramp about the first of March and was passing through a rocky, unwooded section, when he saw the sun's rays reflected from a rocky shelf. He investigated and found a yellowish white gleaming substance which he thought at first was iron pyrites or "fool's gold." He knocked off a large chunk with a small axe, which he carried in his belt, and found the inner side of the rock fragment to be a mass of glittering particles. Mr. Murphy secured some dynamite and blew out the small opening he had formed and found that the metal-bearing ore was a wide seam of considerable extent. Of just what proportions the deposit is has not yet been determined.

REFERRED TO DR. MACINTOSH.

The finder took some specimens of the ore to a local jeweller, who said that they looked like silver and referred Mr. Murphy to Dr. William Macintosh, curator of the Natural History Society, for further investigation. Dr. Macintosh made a microscopic examination of the specimens and said that they appeared to be the real thing and that the ore was very rich.

At his suggestion a piece of the rock, about six inches in diameter, was sent to the Geological Survey of the Department of Lands and Mines at Ottawa, where it was analyzed and assayed. The report of the department has been received from W. H. Collins, director of the geological survey, and states that the ore is rich in native silver, with which are associated smaller portions of sulphate of copper and iron and a little calcite.

WHAT REPORT SAYS.

The report states that if the ore is of considerable quantity, the find is one of commercial importance and that even if the deposit is small it is important as indicative that there may be larger deposits in the vicinity. The department requested to be notified of developments. A larger and richer specimen has since been sent to Ottawa.

Dr. Macintosh, speaking of the locality in which the discovery was made, said that its characteristics were identical with regions where large silver deposits existed.

TO INVESTIGATE FULLY.

Mr. Murphy is taking steps to secure a mining license and will investigate the extent of the seam fully. If its proportions warrant, steps will be taken for its commercial development.

Genuine Bayer Aspirin

SAY "BAYER" when you buy—INSIST!

Unless you see the "Bayer Cross" on tablets, you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians over 25 years for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetone-Aspirin, Bayer & Co., Ltd., Germany. The Bayer Cross is the registered trade mark of Bayer Company which will be stamped with their general trade mark, the "Bayer Cross".

A Sure Relief for Women's Disorders
10 DAYS' TREATMENT FREE

Orange-Lily is a certain relief for all disorders of women. It is applied locally and is absorbed into the suffering tissue. The dead waste matter is absorbed and the new blood is expelled, giving immediate relief and strengthening the blood vessels and nerves and the circulation is restored to normal. As this treatment is based on scientific principles and acts on the actual location of the disease, it cannot help but be good in all forms of female troubles, including delayed and painful menstruation, leucorrhoea, falling of the womb, etc. Price \$2 per box, which is sufficient for one month's treatment. A Free Trial Treatment enough for ten days, worth the cost, will be sent free to any suffering woman who will send me her address. Include 3 stamps and address Mrs. Lydia W. Ladd, Dept. 50, Windsor, Ont.

SOLD BY LEADING DRUGGISTS EVERYWHERE

FREIGHT INDEX IS REPORTED LOWER

Shipping Freights For February Shows Decrease of 8.12 Per Cent.

The index number of shipping freights for February, prepared by the Chamber of Shipping, shows, at 22.98, a decrease of 8.12 per cent, compared with January, and of 20.13 per cent as compared with the corresponding figure 12 months ago. The present decline follows a decrease of 7.20 per cent recorded last month. With the exception of July last, when the minimum value for 1925 was recorded, the rate for February is lower by 18.92 per cent than the figure for January and is 37.50 per cent lower than that for February of last year. Four rates are available in the United States group and give a group index of 19.80 per cent, which is 10.16 below that for January and 38.78 per cent below the figure of a year ago. No rate was available in January for the grain trade between Canada and the United Kingdom. The rate for February at 10.83 was 44.84 per cent below that for December last. The time charter rate also shows a decrease. At 21.17 it was 23.1 per cent below that for January and 12.81 per cent lower than in February of last year. If the average for 1913 be taken as 100 the index number for February last was 98.2, as compared with 106.9 in January and 115.2 in December. Yet, in spite of the fact that the time charter rate last month was below the pre-war level, the last estimate of working costs, given in the Chamber of Shipping report issued last month, was that expenses are from 90 to 100 per cent above the pre-war standard.

BUST OF CAPT. FRIED

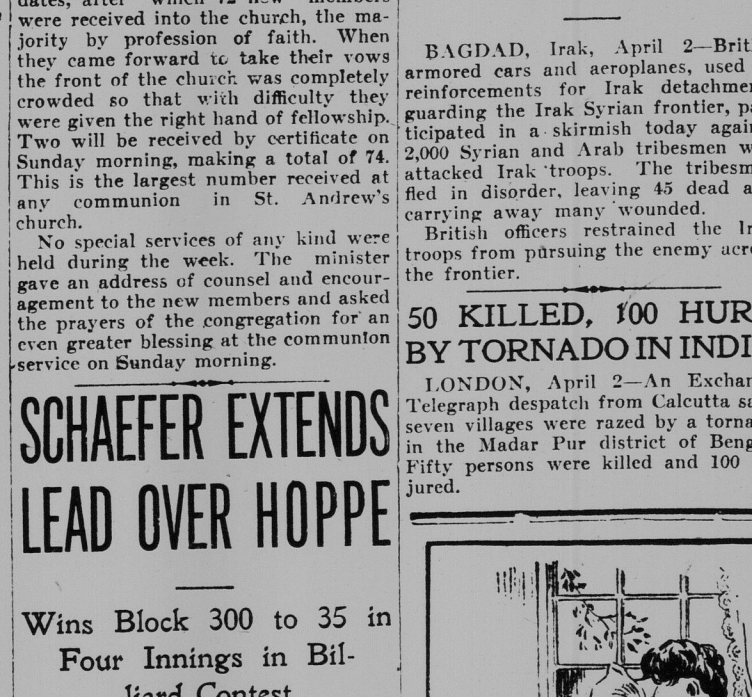

Work Was Done by Boston Sculptors on the Ocean

LONDON, March 31.—Mrs. Edna Spencer, a Boston sculptress, has completed what is believed to be the first piece of sculpture ever made on the ocean liner—a bust of Captain Fried. The bust, which is made of bronze, is being exhibited at the spring salon in Paris, will be presented to Captain Fried.

A water color by Charles Dixon commemorating the Roosevelt's exploit is on exhibition here at the Royal Institution, which is attracting much attention, and is attracting much attention.

PREACHES ON "THE CROSS"

In the Church of the Good Shepherd in Peabody, yesterday Rev. C. W. Pollett gave the addresses in the three hours service from noon until 3 o'clock, which was assisted by Rev. F. J. LeRoy, the rector. Last night the service in the church was conducted by Mr. LeRoy and Mr. Pollett was the preacher, his subject being "The Cross." The choir led the singing and Miss Dora Washer was the organist.

**SCHAEFER EXTENDS
LEAD OVER HOPPE**

Wins Block 300 to 35 in Four Innings in Billiard Contest

NEW YORK, April 2.—Jake Schaefer increased his lead over the champion, Willie Hoppe, in their 3,000 points 19 ball line billiard life match by winning tonight's block 300 to 35, running out in four innings.

With only two blocks to be played tomorrow, it appears that Hoppe has lost his last crown, and once upon a time he held them all. Schaefer ran 145 at the start of tonight's block, while Hoppe could make only one in the same inning. The champion's high run was 24.

1 SLAIN AND OTHER WOUNDED IN DEL

Pair Clash in Mountain Recess of California With Gun and Rifle

SANTA MONICA, Cal., April 2.—A strange duel was staged here today in a lonely recess of the Santa Monica Mountains, when two men, both past middle age, faced each other with shot gun and rifle, one dying and the other receiving probably a mortal wound.

Arthur Winzell, real estate man of some means, who came here from New York some time ago, was killed, and R. E. Roselle, owner of a small farm in Topanga Canyon, a natural passageway from the beach of the San Fernando Valley, was seriously wounded. The shooting followed a visit to the canyon early today of Winzell and his son, Howard, in search of Mrs. Winzell.

MR. JOLICOEUR TELLS HIS EXPERIENCE

Strongly Recommends "Fruit-a-Lives" For Kidney Trouble

For years, Mr. Jolicoeur suffered with kidney trouble, headaches, backache, and the heavy, miserable feeling which usually accompanies any weakness or irritation in the kidneys. He tried "Fruit-a-Lives" and, in telling the results, he says, "After having followed the 'Fruit-a-Lives' treatment, I have gained thirty-three pounds and I have been ever since. I am pleased to recommend 'Fruit-a-Lives' to all those who suffer from kidney disease." J. M. Jolicoeur, 318 2nd Ave., Quebec.

RUSSIA'S WOMAN BANDIT CAPTURED

Is Murderess and Robber of Many; Escapes Firing Squad

SVERDLOVSK, Ekaterinburg, April 2.—Catherine Planovsky, Russia's only woman bandit, who has a record of having murdered and robbed dozens of victims, again is in the toils. The public prosecutor alleges that her exploits have covered a long period of years. In 1921 "Catherine the Terrible," as she is known, was sentenced to death at Chita for murder and was taken from prison to be shot. When the firing squad discharged their rifles the woman fell to the ground and feigned death. Not a bullet had struck her. The soldiers, believing her dead, returned to the prison barracks while Planovsky made a quick escape.

During the ensuing five years, according to the prosecutor's statement, no home in the Urals was safe from the depredations of the land of robbers Catherine headed, and no person was secure from murderous attacks.

20 KILLED, 150 HURT IN CALCUTTA FIGHT

Estimated Losses When Hindu Sect and Moslems Meet Near Mosque

LONDON, April 2.—A furious fight took place in Calcutta, India, today between a Hindu sect and Moslems, and according to one estimate, 20 persons were killed and 150 injured.

The Calcutta correspondent of the Exchange Telegraph Company says that the riot began with the approach of a mosque in the northern part of the city of a procession with music, led by the Arya Samaj sect of Hindus, enemies of the Moslems.

Fighting developed when the Moslems tried to bar the way, the trouble soon spreading to other streets.

Density Police Commissioner Barley and a European, Sergeant Davis, who went to the commissioner's station, were slightly hurt.

The correspondent says that the scene of the fighting tonight had the appearance of a deserted city. Police patrolled the streets and all the shops remained closed.

Tribesmen had planned a surprise attack but reports of their coming reached the British some hours beforehand. Armed cars were brought up to reinforce the British guards.

The tribesmen swept over the frontier, expecting quickly to scatter the tribesmen. They were taken completely by surprise when the guns in the armored cars began to rattle. Before the fight was finished tribesmen arrived and bombing operations were carried out. The tribesmen then took to their heels.

British officers say they issued instructions to the tribesmen not to be gun hostilities when the tribesmen appeared.

2,000 TRIBESMEN DEFEATED IN IRAK

British Armored Cars and Planes Aid in Skirmish on Frontier

BAGDAD, Iraq, April 2.—British armored cars and aeroplanes, used as reinforcements for the tribesmen, participated in a skirmish today against 2,000 Syrian and Arab tribesmen who attacked Iraq troops. The tribesmen fled in disorder, leaving 45 dead and carrying away many wounded. British officers restrained the Iraq troops from pursuing the enemy across the frontier.

50 KILLED, 100 HURT BY TORNADO IN INDIA

LONDON, April 2.—An Exchange Telegraph dispatch from Calcutta says a severe cyclone hit the district of the Madar Pur district of Bengal. Fifty persons were killed and 100 injured.

Ontario Lady, 100, Is Active At Housework

OTTAWA, April 2.—Mrs. James Cowan, pioneer of Carleton county, today celebrated her hundredth birthday.

Mrs. Cowan is one of Canada's pioneer English stock and still retains a wonderfully keen mind. Asked if she believed in the old adage "early to bed and early to rise, make a girl healthy, well and wise," Mrs. Cowan stated that she could not say that she did, as she had never practiced it. Mrs. Cowan is fond of hymns and the Bible, a book she says that never grows old. Rising every morning at 6 o'clock, she is still active at housework.

QUEEN OF NORWAY ARRIVES IN LONDON

Met at Station by King George Who Waited 40 Minutes For Train

LONDON, April 2.—Queen Maud of Norway came to London last night to visit her sister, Princess Victoria. She was accompanied by her son, Crown Prince Olaf. King George waited forty minutes in the big crowd at the King's Cross Station for the train Queen Maud was traveling on, which was delayed on the trip from Newcastle.

No preparations had been made at the station for the coming of King George and Queen Maud. The police started to clear a space on the crowded platform for the King. The monarch, however, would not allow the crowds to be interfered with. The people recognized King George, and when they learned the purpose of his presence at the station kept a sympathetic silence. A majority of the men stood with their hats in hand until King George motioned for them to replace them.

SHEDIAK POTATO MART FIRM AT \$5.10

SHEDIAK, April 2.—The potato here continues firm, as high as \$5.10 a barrel being offered yesterday. Today was a general holiday.

MAKES DISCOVERY.

Mr. Murphy was out for a snowshoe tramp about the first of March and was passing through a rocky, unwooded section, when he saw the sun's rays reflected from a rocky shelf. He investigated and found a yellowish white gleaming substance which he thought at first was iron pyrites or "fool's gold." He knocked off a large chunk with a small axe, which he carried in his belt, and found the inner side of the rock fragment to be a mass of glittering particles. Mr. Murphy secured some dynamite and blew out the small opening he had formed and found that the metal-bearing ore was a wide seam of considerable extent. Of just what proportions the deposit is has not yet been determined.

REFERRED TO DR. MACINTOSH.

The finder took some specimens of the ore to a local jeweller, who said that they looked like silver and referred Mr. Murphy to Dr. William Macintosh, curator of the Natural History Society, for further investigation. Dr. Macintosh made a microscopic examination of the specimens and said that they appeared to be the real thing and that the ore was very rich.

WHAT REPORT SAYS.

The report states that if the ore is of considerable quantity, the find is one of commercial importance and that even if the deposit is small it is important as indicative that there may be larger deposits in the vicinity. The department requested to be notified of developments. A larger and richer specimen has since been sent to Ottawa.

TO INVESTIGATE FULLY.

Mr. Murphy is taking steps to secure a mining license and will investigate the extent of the seam fully. If its proportions warrant, steps will be taken for its commercial development.
