

SPECIAL CARS FOR POULTRY

C. N. R. Have Specially Fitted Stock Cars for Shipment of Live Birds from Maritime Province Ports.

In order properly to take care of live poultry being shipped from maritime province ports to Boston, or to Montreal, Toronto and the Canadian west, the Canadian National Railways has fitted up some up-to-date live stock cars for this particular purpose.

For several years there has been considerable movement of live poultry to the United States market, these shipments being more regular about the time of year. Co-operating with the Dominion Agricultural authorities, the railway is now endeavoring to find additional markets for live poultry in Canada.

To ship live poultry and have the birds arrive at their destination in good condition is highly necessary that they must be carefully handled while in transit. It is for this purpose that these specially equipped live stock cars have been constructed. It is the best class of stock cars that have been thus converted into comfortable compartment cars for the birds.

Three feet x three feet six inches, and fourteen feet high, each car has 112 coops. The coops are spalled permanently to the car in sections on each side, between the side doors and the end of the car, with a passageway in the center. Each coop will hold about thirty birds, and the carrying capacity of a car is 3,360. It will therefore be seen that a carload of live chickens has considerable value and that their welfare en route has real meaning. The alternate rows of coops have removable floors so that two coops may be thrown into one if required. This will give greater head room in case tall birds are being shipped. In addition to the slat sides of the car there is a strong wire netting. Each coop has hinged drop door with separate locking device. Removable metal feed troughs are at each end of the coop. These can be removed for cleaning. There is an overhead watering system from a tank of 200 gallons capacity. Hatches in the car floor permit of cleaning and ventilation proper facilities for ventilation. Ample space is provided in the center of the car for the carrying of feed, etc. The cars are painted white inside and out, all except roof and undergear. They are thus easily spotted and given every attention.

The installation of these cars is expected to be of great benefit to poultry shippers.

WORSE IN ITALY. Rome, Oct. 17.—Disorders, the outgrowth of the animosity between the Fascisti and the socialists and communists, are taking place in the principal centres of the country. At Parma, an entire quarter of the city is said to be in the hands of an alleged Bolsheviki gang. The city is virtually in a state of siege.

STERLING UP. New York, Oct. 18.—A sharp two-cent rise in sterling exchange, carrying the demand rate of \$4.67 1/2, the highest in several months, took place in the local market today. The increase was a reflection of that in London, where, it is reported, there has been heavy buying of sterling for French account. The decrease in the offering of cotton and grain bills in the local market also has contributed to the upward trend.

MARITIME RELIGIOUS EDUCATIONAL COUNCIL. Halifax, N. S., Oct. 18.—Deliberations of the delegates of the Maritime Religious Educational Council were resumed today in First Baptist church, where Dr. A. H. Kent gave the first of four addresses on "The Making of the New Testament." The principal address of the session was delivered by Rev. Frank Langford—"The Challenge of the Canadian Programmes for Boys and Girls."

GOOD THINGS COMING TO THE THEATRES OF ST. JOHN

THE ANSWER TO "THE SHEIK" TOMORROW

Imperial Theatre will, on Thursday, begin a three days engagement of the desert romance "Burning Sands," featuring the favorite players Milton Sills, Wanda Hawley and others. This story is the spirited reply of Arthur Weigell, well known English Egyptologist, to Mrs. E. M. Hull's feverish fiction "The Sheik," which the Imperial has already shown in its pictured form. Coupled with "The Three Musketeers" for this week's entertainment at the Keith house "Burning Sands" should prove equally as interesting as the other desert story, since the same producer made it and players of note enact it.

LAST DAY FOR "THE THREE MUSKETEERS"

Capacity crowds saw the great picture "The Three Musketeers" at the Imperial yesterday afternoon and evening in spite of the inclement weather. This is the final day for the Fairbanks production, and enough people of taste and refinement have seen and enjoyed the picture to admiral all lovers of good fiction this afternoon or evening. One matinee, starting at 2.30. Two shows at night, 7 and 9.

NOVELTY SHOWER. A very pleasant evening was spent at the home of Miss Florence Henry, 131 Elliot Row, last night when several friends of Miss Edith Barnes gathered and tendered her a surprise novelty shower in honor of her approaching marriage.

PRESENTATION. About 150 young people gathered last night at the home of Miss Annie Johnson, Germain street, at a farewell party to J. F. Mullin, who is leaving for his home in Boston on Saturday. A pleasing feature of the evening was the presentation of a pair of gold cuff links to Mr. Mullin by Miss Johnson and a committee. The evening was enjoyably spent in games and dancing, and refreshments were served by the hostess.

JOB PAGE AWAY AGAIN. Joe Page will leave for Montreal this afternoon after doing his share, as special agent of the C. P. R., for the comfort and pleasure of the baseball writers who were here yesterday on their way to the Nova Scotia woods. He will stop high water mark, who is evidenced at last evening's banquet, when Frederick G. Lieb, president of the Baseball Writers' Association, paid him a visit in his speech at the dinner. The U. S. writers, he said, looked on Joe as the father of baseball in Canada. Cape Breton, and that he enlisted in the Howitzer Division at the age of twenty.

CONDENSED NEWS. The fourth international labor conference opened in Geneva today. Henri La Fontaine of Belgium presided. There are delegates from fifty-four nations.

Good rains have fallen in the south of Queensland, Australia and have greatly benefited the dairying and wheat districts.

Hon. W. R. Motherwell, minister of agriculture, announces that the hog grading regulations will be made effective on October 30.

Ottawa had a little snow today, and mercury below zero.

The Rochester, N. Y., Red Cross today sent 4,000 pairs of women's and children's shoes to the Synnara fire sufferers.

At a convention of the Army and Navy Veterans of Canada in Montreal yesterday General Sir Arthur Currie made a strong plea for unity among veterans' organizations.

SCHOONER FROM ST. PIERRE IS SEIZED. Gabarus, C. B., Oct. 18.—The schooner Allan C., an alleged run runner, was seized yesterday by Officer E. MacGillivray. She left St. Pierre on Monday morning bound for Nassau, and hailed from South Guilbort, Maine. A watch of local men was placed aboard until authorities decide her fate.

LUMBERMEN'S WAGES. Fredericton, N. B., Oct. 18.—Employment agents report a scarcity of experienced woodsmen. Wages as stated in advertisements, range from \$35 to \$50 a month with board. Last year at this time the wages offered were \$25 to \$35.

BRITISH EMPIRE STEEL IS DISCUSSED. Montreal, Oct. 18.—Owing to a belief that there is now under discussion a re-arrangement of the British Empire Corporation's plans, the second preferred stock of that organization today weakened 2 1/2 points to 39 1/2, at which figure it closed after a large number of shares had been sold. This stock sagged a point yesterday to 36.

It is feared in some quarters that there is danger of the pending deal not going through on the basis originally suggested by the new interests in the company. It is felt that these terms might prove too onerous, and that owing to the decided improvement in the corporation's earnings, it should be able to do any financing it may require on a much more favorable basis.

Strong bodies of irregulars attacked the National posts in Sligo, Ireland last night and this morning.

GOES ASHORE ON VOYAGE HERE COAL LADEN

The Refill Shaving Stick

New Bedford, Mass., Oct. 18.—The three masted British schooner Seaman A. O., bound for Jersey City for Parraboro, N. S., with hard coal ground on her bow and rig's reef early today. She made water rapidly and was expected to prove a total loss. Captain Morrissey and her crew of seven were taken off by the Cattyhawk coast guards.

The Seaman A. O., was bound from Perth Amboy for St. John with a cargo of hard coal for R. P. and W. F. Starr, agents, and scotch whisky, magic and Wigmore, this afternoon. There had been no further word received at the local office at press time this afternoon. This was one of a fleet of eight schooners which had been chartered to bring coal here from New York. The same fleet from six anchorage at City Islands about October 15 for this port.

British Scientist Discusses New Theory of Atomic Energy.

London, Sept. 18.—(By Mail)—By the liberation of the atom man may some day have under his control a force which will perform for him the entire work of the world, but if it gets beyond his control it may blow the earth and all its inhabitants to smithereens. Dr. Aston of Cambridge said in a lecture delivered before the members of the British Association. But the chances of such a catastrophe are practically negligible, he explained.

Dr. Aston began with a description of the infinite minuteness of the atom. "If a tiny hole were made in the side of an evacuated electric light bulb," he said, "so that the molecules of air could pass in at a rate of 1,000,000 a second, it would take 100,000,000 years before the bulb was full, and there are two atoms in each molecule of air."

The speaker told how Prof. Rutherford has discovered that all atoms were simply different combinations of electricity. The positive particles were centered together by the negative particles. Tables, houses, chairs, motor cars—in fact, all animate and inanimate substances, including man himself—were composed simply of electricity.

Dr. Aston began with a description of the infinite minuteness of the atom. DARING BREAK FROM SLIGO JAIL

Sligo, Ireland, Oct. 18.—Heavy firing in various parts of the town early yesterday proved to be for the purpose of covering the escape of thirteen irregular army prisoners from the jail. The men constructed ladders out of torn blankets, and after filing through the bars of the jail windows, let themselves down to an alleyway, then scaled the outer wall and lowered themselves to the ground.

The fugitives met armed men outside and heavy firing was begun by sympathizers with the irregulars throughout the town, evidently with a view to distracting the attention of the military. In the midst of this conflict, the prisoners got away clear.

NOTES ABOUT BAPTIST PEOPLE (Maritime Baptist). Rev. Robie M. Brown writes that he has accepted the pastorate of the church at Yarmouth, Me. He has had a successful pastorate at Harrington, Me.

Rev. R. E. Durkee writes that he is to leave his present pastorate on Cape Sable Island, N. S., December 1 and would be glad to visit a church with view to settlement. For health reasons, he desires an inland pastorate.

Rev. J. W. Brown, Ph. D., has closed his pastorate at Princeton, Me., and entered upon that of the Baptist church in Cherryfield, Me. We have an idea that Mr. Brown has not forgotten his love for the work in the Maritime Provinces, where we have room for such men.

Prof. F. E. Wheelock, chairman of the committee of administration at Acadia University, writes that 110 new members have registered and that the total registration at the line of writing is 200. More of the upper class students are expected to return.

Among those attending the meetings addressed by Dr. Campbell Morgan in St. John last week, we noticed Rev. D. J. Macpherson, J. S. Young, E. A. Allaby and L. F. Wallace from outside the city.

After a short pastorate in St. Albans, Vt., Rev. A. C. Berrie has accepted a call to the important Court.

Seattle, Wn., Oct. 18.—Captain Amundsen plans his flight from Wainwright, Alaska, across the North Pole next May or June, according to Captain S. C. Cochrane of the coast guard cutter Bear, which was here today after a voyage of 25,000 miles into the Arctic Ocean.

Ice in the Arctic is the worst since 1893, so Captain Cochrane reported. Captain Amundsen said he intends to go to Nome, Alaska, this winter, by dog team and to return to Wainwright for his flight with Lieut. Oskar Omial.
