GIRL TRIES SUICIDE THEN CALLS AID

Marion O'Leary, 16, Shoots
Herself Near Hackensack
Reservoir—Notes Time She
Fires.

(New York Times)
Marion O'Leary, 16 years old, of Oradell, N. J., went into the Hackensack reservoir in Oradell about 9 o'clock yesterday morning, took off her hat, and herself comfortable on the ground and shot herself. When she found she was not going to die immediately she crawled out of the bushes and screamed for help.

Mrs. Gerald Dederick, who lives nearby in Grove street, helped the girl into her cottage and called an ambulance from Hackensack Hospital. There the surgeons said a bullet had entered her abdomen and penetrated the liver, and she had a "fifty-fifty" chance to get well.

Before she was taken to the hospital Marion told Mrs. Dederick she had wanted to die, but refused to say why. She said that she looked at her wrist watch before she fired and noted that it was exactly 9:15.

The girl is the daughter of Alfred O'Leary of Grove street, Oradell, a former Shipping Board clerk. Her mother, who hurried to her, said:

"Several times recently my daughter has been going out nights and staying until a late hour, or, I might say, a late hour for so young a girl, perhaps 11 or 12 o'clock. I told her that this could not continue, and that it was no time for such a young girl to be out. She would pay no attention. It has only been this summer that she has started to go out evenings.

"This morning I told her again that if she continued to go out nights I would be forced to send her away to a home in Massachusetts. That is the only thing which I can think of which would have made her do what she did."

RECENT DEATHS

Rev. H. H. Read.
Word has been received here that Rev. H. H. Read, of Moose Jaw, had died on Thursday morning, as a result of injuries received in an automobile accident on the previous day. Mr. Read was married to Miss Louise Thomson, of Pictou, and is survived by his wife and three children. He belonged to Athol (N. S.), and was a graduate of Pictou Academy, Dalhousie University and Pine Hill College. He was minister of the leading Presbyterian church in Moose Jaw. Previous to going west he was minister of the Presbyterian church at Bathurst (N. B.). He was also for several years minister of the Presbyterian church in West St. John.

CLOTHES LINES SAVE BABY.
Infant Falls Five Stories, But Bounces at Every Floor.

(New York Times)
George Mengold, fifteen months old, was left in his crib yesterday morning near an open window on the fifth floor facing the rear yard of his home at 201 East Thirty-third street. When no one was looking, he crawled to the window and fell. His fall was broken, however, at every floor by clothes lines strung outside the windows, and, bouncing from one rope to the other, the baby finally landed on the roof of a shed in the yard.

When excited tenants rushed out, the baby was making himself heard. Dr. Vanderberg of Bellevue Hospital declared the baby had possibly sustained a fracture of some ribs in the right side and took him away for treatment.

THE ST. JOHN PROTESTANT ORPHANS HOME

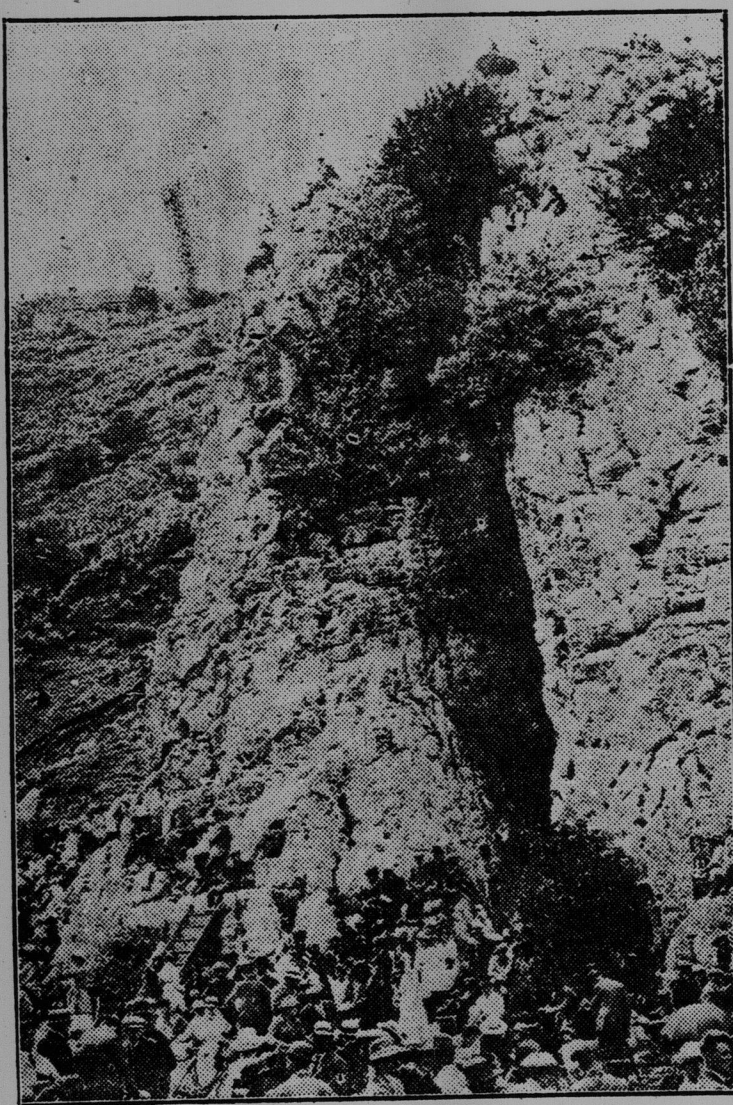

The following contributions, since August 1st, are thankfully acknowledged by the trustees, H. C. Rankin—D. C. Clark, \$200; per Harmony L. O. B. A. No. 176, Sussex, N. B., the following amounts—proceeds of quilt, \$106.75; valentine supper, \$129; tag day at Miller's, July 12th, \$22.81 (total \$294.00). Vassie Co., Ltd., \$20; A. Friend, Mrs. Helen E. Miller, Geo. C. Weldon, H. W. Cole, Co. Ltd., Jos. Allison, O. H. Warwick Co., F. P. Starr, W. H. Hayward Co., Schofield paper Co., \$25 each; F. H. Flewelling, \$20; West End Baseball League, \$19.44; Macaulay Bros. & Co., \$15; National Drug Co., F. H. Woolphrey & Co., Mr. and Mrs. W. S. Allison, W. G. Smith, Royal Hotel, A. H. Friday 9.55 p.m.; Saturday 12.55 p.m., until the end of September.

A Tailored Beaver For a First Hat

Could you think of anything smarter or more appropriate than a tailored beaver in some becoming shape?

First arrivals in our millinery salon are showing in black, navy and African brown; some are modishly faced with kid or colorful duvetyne.

There are Chin-chins, Bretons and straight sailor shapes. Crowns are round or octagonal and are sometimes dented here and there to give a softer appearance.

Undoubtedly the most practical and becoming hats for first of the season wear—just as appropriate for wearing all through the season, where a tailored hat fits in.

\$4.50 to \$12.00

(Second floor.)

August Showing of Fine Furs

The beauty and quality of these garments speak in no uncertain tones of the furriers skill.
This presentation includes Lovely Fur Coats made expressly for cold weather, and hosts of fine looking neck pieces and scarfs for between seasons.

Values are Better than you are expecting to find.

Coats are showing in Electric and Hudson Seal; plain or with deep shawl collar of contrasting fur.
Persian Lamb—Plain or marten trimmed.
Muskrat—Plain or trimmed with electric seal.
Neckpieces and Scarfs are in all favored shapes. Pelts are of Mole, Lynx, Kolinsky, Mink, Opossum, Jap. Marten, Wolf, Fox, Copper Sable, Seal, Ermine and others.

We will be pleased to show you the newest styles.

(Second Floor.)

Inviting Tug Fabrics All Fresh and New

LINGERIE CRINKLE—A soft fabric delightfully suitable for light weight kimono, night gowns, etc. White, pink, orchid and blue grounds with dainty butterfly, bird and cupid patterns.
CRISP ORGANDIES for fluffy frocks. Pink, green, grey, orchid and white.

RIPPLETTE—The new (rough-dry) fabric for house dresses, etc. Showing in white; also colored stripes and checks.

VELLA AND CLYDELLA FLANNELS—Most in demand just now for inner and outer light weight fall garments for women and children.

BIG PLAID GINGHAMS in attractive color combinations; also several smart checks and stripes.

WILL USE BAMBOO FOR MAKING PAPER

Scandinavian Engineers Designed Necessary Machinery for India—Growth of Industry.

(Montreal Gazette.)

Re-echo of intelligence disseminated some time ago that the adaptation of the bamboo of India was being considered as a fibre adaptable to paper making, was heard in conversation at the largest yesterday with Mr. Ivan Rehn, M. P., of Karlstad, chief engineer of the largest paper machine work in Scandinavia, who has been spending a couple of months in Canada investigating the paper plant equipments of this country. The first essay to use bamboo, on a large scale, in the same way that spruce and other woods are used in this and some other countries, in the production of pulp for paper manufacturing purposes, is just about to be inaugurated in India. Mr. Rehn says that the necessary buildings for this experimental plant have already been erected, and that his firm has recently forwarded the machinery required for its equipment, the capacity of this first installation of a modern paper mill in India contemplating a production of about 12,000 tons of pulp a year. Mr. Rehn says that this new Indian mill is expected to start operations in the near future. Mr. Rehn said that the development and perfection of sulphide pulp mill equipment had found their first exemplification in Scandinavia. The first sulphide mill, marking the introduction of making art which used old rags and such-like as its exclusive material, was built in Sweden about forty years ago, and their mechanical inventions, adaptable to the industry, have naturally accommodated themselves to its development. The mechanical works which he represents have contributed to the equipment of wood pulp paper mills in various parts of the world. Industry in Japan.

In 1918 his firm delivered the mechanical equipment for the first sulphide paper mill in Japan. The industry has continued to grow in that country where they have a wood similar to the

WHITE SMOKE SCREEN TO PROTECT INFANTRY

Baltimore, Aug. 21—A white smoke screen, denser and more impenetrable to vision than any smoke screen yet invented, was demonstrated yesterday at Camp Meade for the members of the reserve officers' training camp. It is a new invention, the secret of which is being guarded closely by chemists and army officers directing its use.

When the smoke candles were lighted, instead of seeing black clouds rise as they had seen them rise on the battlefields of France, reserve officers were surprised by the beautiful white clouds which rose from the ground. They were so dense that they seemed almost solid.

Major Earl J. Atkinson, commandant of the Edgewood Arsenal, said the white smoke candles are a distinct improvement over the black smoke candles, which were used during the war. They not only possess a greater obscuring power, he said, but produce smoke in greater quantities. They are not poisonous and produce no toxic effect.

"There is no point to infantry advancing in the open any more," said Maj. Atkinson. "The smoke candles can be thrown in front of an advancing line

MILLE LENGLEN'S SHOES.

A woman observer says that Mlle Lenglen really dances tennis, for she spins and whirles on her toes as she moves over the court. Her afternoon shoes have three-inch heels, and she says she likes to wear them "because they keep me poised on my toes, which is the position I use so much when playing tennis." On the tennis court she actually leaps straight up about four feet from the ground and turns half round in the air with one toe pointed toward the turf and the other ending a horizontal line.
