During the nights other worlds in sight. The author of my text chimed the silver bells in the tower of the midninght heavens, saying; "When I, consider the heavens, the work of thy fingers; the moon and the stars, which thou hast ordained, what is man that thou art mindful of him?" We thank God for the day; we ought also to hank him for the night. Worlds worlds in sight of the naked eye, but more worlds revealed by telescope. At least one night in his lifetime every man ought to go into astronomical ob servatory and see what has been done the great World Builder. Thank God for lunar and stellar illumination! Further, on the instrument of ten strings celebrate the possession of our reason. A severe stroke upon the head or a sudden calamity or any one of 50 kinds of accident might dethrone our reason and leave us worse off than the brute, for the brute has a substitute for reason in what is called instinct, but a man's brain shattered and he has neither mind nor instinct. The asylums for the insane, though all the time multiplying, are not enough to shelter the demented. Through the cramming system employed in many of the schools of this country, there are tens of thousands of children having their brain depleted. Philosophers at ten years of age, geologists at 12 years of age. They will be the first amination day, but last in all matters of useful and successful life. If would be amusing to see how much chi are expected to learn and know if it were not connected with the tragedies of damaged intellects which follow. Amid the increasing dementia of the world let us appreciate the goodness of God to us if our mental faculties are in equipoise. Voyaging from New Zealand to Australia, a storm swooped upon us, and we saw all around us fragments of ships that had been caught in the tempest. And how thankful we were, sailing into Sydney harbor, that we had escaped! So that man and that woman whose intellect goes safely through the storms of this life, in which so many have foundered, might every day and every night employ one of the ten strings in gratitude for that particular mercy.

THE BLESSING OF FRIENDSHIP. Another string of this instrument I now touch-friendships, deep and abiding, by which I refer to those people who, when good or bad motive may be ascribed to you, ascribe the good; those concerning whom you do not wonder which side they will take when you are under discussion! those who would more gladly serve you than serve themselves: those to whom you can tell everything without reserve; those who are first in your home by person or by telegram when you have trouble. Oh, what a blessing to have plenty of friends! Aye, if you have only one good friend, you are blessed in that glad possession. With one such friend you can safely defy the world. But he must be a tried friend. You cannot tell who are your real friends till disasters come. The highest style of civilization the world has even seen is American civilization, and it is built out of the gospel of pardon and good morals. That gospel rocked our cradle, and it will epitaph our grave. It soothes our sorrows, brightens our hopes, inspires our courage, forgives our sins and saves our souls. It takes a man who is all wrong and makes which were young beasts, had started quickly, pitching him off backwards How much of the human family in him all right.
